Family Support in Community Pediatrics Francis E. Rushton,1998-07-28 Written by a pediatrician for pediatric clinicians on the front line in response to the ever increasing obligations they acquire for the well being of children, this book focuses on the potential of health care to impact the social morbidities that affect children's health. Dr. Rushton does not suggest that child health practitioners must do more, but rather they must reorient their efforts in order to achieve optimal outcomes for children. As specialists in child health, pediatric clinicians have skills they can utilize to ensure better outcomes for children, but doing so will require a reorganization of health supervision and the establishment of links with other social services. Group visits, psychosocial screening, school health, public-private partnerships, home visitation, parent-child centers, and use of auxiliary anticipatory guidance specialists are all tools described in the development of a coordinated, community-based, family-centered approach to pediatric health care supervision. This is a book for private practitioners, community health professionals, academicians who support them, and all those others who want to ensure that our children are nurtured by the child health care system. The crux of this book is to provide a template for thoughtful consideration by the thousands of pediatric providers who care deeply about their profession.

Pediatric Collections: LGBTQ+: Support and Care Part 2: Health Concerns and Disparities American Academy of Pediatrics (AAP),2021-04-30 Pediatric Collections offers what you need to know - original, focused research in a snapshot approach. Although most lesbian, gay, bisexual, transgender, and questioning youths are quite resilient and emerge from adolescence as healthy adults, the effects of stigma and heterosexism can contribute to health disparities. From a public health perspective, transgender and gender diverse (TGD) individuals, compared with their cisgender peers, experience substantially higher lifelong rates of anxiety, depression, self-harm and suicidality, substance use, eating disorders, victimization, homelessness, and incarceration. Pediatric primary care providers (PPCPs) can help foster early access to mental health, family support, and ongoing gender-affirming care that, ultimately, reduces the risk of gender dysphoria, isolation, and shame that many TGD youth unfortunately face. Part 2 of this first-of-its-kind 3-part series can help PPCPs become stronger allies for TGD patients and their families in the clinic, community, and beyond, providing the promise of both a medical home and a future that celebrates people for being true to themselves.

Hutton,2012-12-13 Advances in the biomedical sciences, especially genomics, proteomics, and metabolomics, taken together with the expanding use of electronic health records, are radically changing the IT infrastructure and software applications needed to support the transfer of knowledge from bench to bedside. Pediatric Collections: LGBTQ+: Support and Care Part 1: Combatting Stigma and Discrimination American Academy of Pediatrics (AAP), 2021-03-26 *Pediatric Collections* offers what you need to know - original, focused research in a snapshot approach. LGBTQ+ youths report experiencing more bullying than their non-LGBTQ peers. Bullying of lesbian, gay, bisexual, transgender, and questioning youths stems from stigma, which is the social devaluation and discrediting that occurs when several processes co-occur and are reinforced by power, including labeling, stereotyping, separation, status loss, and discrimination. Part 1 of this first-of-its-kind 3-part series can help pediatric primary care providers can do much to combat stigma and discrimination for their LGBTQ+ patients. Signage and paperwork in clinics should reflect people of every race, disability, sexuality, and gender identity. Patients and caregivers should be screened for literacy, and educational resources should always be provided in locally relevant languages, because transgender children can be found in any ethnic and/or linguistic group. Additionally, the use of gender neutral, third person singular pronouns in publications can help to dissipate gendered assumptions. The incorporation of LGBTQ+-friendly children's books into waiting room collections and avoidance of gender-segregated toy areas can also support developing brains and encourage children's self-expressions. As physicians empowered with LGBTQ+ health competency, we can break down the cycles of ignorance, shame, and toxic stress that harm children who identify as LGBTQ+ and improve their chances of leading happy, healthy adult lives.

Pediatric Collections: LGBTQ+: Support and Care Part 3: Caring for Transgender Children American Academy of Pediatrics (AAP), 2021-05-31 Transgender people face alarmingly high rates of verbal harassment and physical violence, including at home and at school. Transgender youths face significant mental health issues as a consequence, including depression and suicidality, anxiety, body image distortion, substance abuse, and post-traumatic stress disorder. Part 3 of this first-of-its-kind 3-part series helps show how pediatric primary care providers (PPCPs) are uniquely situated to screen, identify, and care for transgender and gender-diverse youths. As children and adolescents become increasingly aware of gender diversity, PPCPs should be attentive to physical and emotional cues that point to gender-related distress. Early identification of distress in transgender patients, supported exploration of identity, and affirmation helps foster healthy growth and development in a particularly vulnerable population. It also leads to positive long-term health outcomes, including decreased morbidity and mortality.
