Pediatrician's Guide to Discussing Research with Patients Christina A. Di Bartolo, Maureen K. Braun,2017-01-11 With the proliferation of research studies posted online, media outlets scrambling to pick up stories, and individuals posting unverified information via social media, the landscape for parents trying to understand the latest science as it pertains to their children has never been more challenging to navigate. This book is intended to assist pediatricians when discussing research findings with parents. It provides an overview of research practices and terminology, clarifies misconceptions about studies and findings, and explains the limitations of research when applied to medical decision making. Through this framework, physicians can explain their reasoning behind specific clinical recommendations.
