My Favorite Place on Earth Jerry Camarillo Dunn,2009-04-21 See the world through the eyes of some of the most celebrated and admired people of our time in this engaging new travel book. Award-winning author and National Geographic Traveler writer Jerry Camarillo Dunn takes you on a remarkable journey with such amazing and diverse figures as Sandra Day O'Connor and the Dalai Lama, actors Robin Williams and Morgan Freeman, astronauts Buzz Aldrin and Sally Ride, explorer Jean-Michel Cousteau, real estate mogul Donald Trump, entertainer Jerry Seinfeld, food guru Alice Waters, and author Tony Hillerman. His simple question to these people: What is your favorite travel discovery? The answers are both surprising and engaging—ranging from Bali Indonesia to a well-used bench at San Francisco's Crissy Field, from the Hopi Mesas in Arizona to the Old City of Jerusalem. In page after page, celebrated contributors describe the special appeal of each place—be it the amazing beauty, or the character of the people, or simply the hushed joy of solitude. To enhance the stories further, Dunn scoured the files of National Geographic to create sidebars full of intriguing information about each place—and even steers you to websites that tell how you can visit them yourself. But the real allure is the entertaining narrative, inviting readers to experience the excitement of traveling with these celebrated personalities to their favorite places on Earth. Applying the Results of Neuropsychological and Psychological Assessments Dawn E. Bureau,Daniel K. Reinstein,2017-11-03 Neuropsychological and

psychological evaluations in school settings are often rich in detail about a child’s cognitive, academic and emotional functions, and come with specific recommendations to support the child’s performance in school. However, there is often a gap between the assessment results and the implementation of the recommendations, since learning specialists and teachers frequently do not have the means to both interpret and implement the recommendations. This manual presents clear and specific guidelines for school counselors and teachers to decode and put into practice evaluation findings. The book begins by describing various functional domains that are assessed in a neuropsychological evaluation, and then notes how to recognize behavior and learning styles impacted by difficulty in one of more of the domains. Furthermore, it outlines activities that could be used in the classroom or other environments to support a child’s weaknesses, develop new skills, or appear to particular strengths. Finally, ready-to-use worksheets and activities are offered. This is an essential tool for school psychologists, special education teachers, and learning specialists and counselors.

Double Time Jane Roper,2012-05-08 Becoming a mother is rarely what you expect. Jane Roper never expected she'd have twins—or that they'd be such a spirited twosome. She didn't expect that finding the right balance of work and home would be so tricky. And she certainly didn't expect she'd grapple with a diagnosis of bipolar disorder during her daughters' toddler years. But she also didn't anticipate just how much joy, laughter and self-discovery motherhood would bring. Full of warmth, honesty, occasional advice, and a generous helping of humor, *Double Time* is a smart and engaging account of the first three years with multiples and a refreshingly candid and vulnerable look at clinical depression. It's a memoir that will resonate countless women—especially those parenting in double time.
