Unaccompanied Javier Zamora,2018-05-01 New York Times Bestselling Author of Solito Every line resonates with a wind that crosses oceans.—Jamaal May Zamora's work is real life turned into myth and myth made real life. —Glappitnova Javier Zamora was nine years old when he traveled unaccompanied 4,000 miles, across multiple borders, from El Salvador to the United States to be reunited with his parents. This dramatic and hope-filled poetry debut humanizes the highly charged and polarizing rhetoric of border-crossing; assesses borderland politics, race, and immigration on a profoundly personal level; and simultaneously remembers and imagines a birth country that's been left behind. Through an unflinching gaze, plainspoken diction, and a combination of Spanish and English, Unaccompanied crosses rugged terrain where families are lost and reunited, coyotes lead migrants astray, and the thin white man let us drink from a hose / while pointing his shotgun. From Let Me Try Again: He knew we weren't Mexican. He must've remembered his family coming over the border, or the border coming over them, because he drove us to the border and told us next time, rest at least five days, don't trust anyone calling themselves coyotes, bring more tortillas, sardines, Alhambra. He knew we would try again. And again—like everyone does. Javier Zamora was born in El Salvador and immigrated to the United States at the age of nine. He earned a BA at UC-Berkeley, an MFA at New York University, and is a 2016-2018 Wallace Stegner Fellow at Stanford University.

<i>Harper's Textbook of Pediatric Dermatology</i> Peter H. Hoeger,Veronica Kinsler,Albert C. Yan,Christine Bodemer,Margarita Larralde,David Luk,Vibhu Mendiratta,Diana Purvis,2019-12-04 A consummate classic with a fresh approach to pediatric dermatology Children’s skin is different. Maturation affects the epidermal barrier, the cutaneous microbiome, adnexal structures, vasculature, and transcutaneous absorption of drugs. The immature skin is more susceptible to pathogens and environmental disruption. Many genetic disorders are either present at birth or manifest early in childhood. Skin diseases thus present differently in children than in adults. Pediatric dermatology has seen significant advances over the last decade, particularly in the field of molecular genetics research, which has furthered our understanding of the pathogenesis of many skin diseases and the development of new approaches to treatment. This fourth edition of the Harper classic provides state-of-the-art information on all aspects of skin disease in children. It covers the diagnosis and treatment of all conditions - both common and rare - with a consistently evidence-based approach. Existing content has been refreshed and fully updated to reflect emerging thinking and to incorporate the latest in research and clinical data - especially at the genetic level. This new fourth edition includes: Greater focus on the genetics behind skin disease, including new genes/genodermatoses, progress in genetic analysis, and stem cell transplants Increased coverage of lasers and other technologies used to treat skin disease More summary tables, learning points, tables of differential diagnosis, and clinical algorithms for diagnosis and management Additional online features, including patient information links and multiple choice questions Harper's Textbook of Pediatric Dermatology delivers crucial clinical insights and up-to-date research information that spans the breadth of the field. As the most comprehensive reference book on this subject available, this revised fourth edition will support and guide the daily practice of both dermatologists and pediatricians across the world.
