Learn How Professionals Trade the Penny Stock Market T. S. Mccloughan, 2013-01-27 The stocks that trade in the Penny Stock Market often provide opportunities for 20% or greater returns in minutes to days not years! Case in point; on December 18, 2012 we alerted our members to Superior

Venture Corp (SVEN) on our free daily stocks to watch list. That day the stock vaulted +183% from the previous days close. Now honestly, when is the last time you heard of a stock that trades on the larger market gaining 183% in a year, let alone....in a single day! What accounts for these explosive moves? Penny stocks are generally not covered by analysts or large investment firms. Because of this companies that reside in this market typically gain exposure and public interest in their stock by investing in large scale promotional campaigns (I'm sure you have received numerous promotional campaigns like this in the mail from time to time). An interesting thing happens when these campaigns are released. The next time you receive such a promotional campaign take the time and look up the stock. You will probably notice that the stock had moved up significantly prior to the time you physically received the ad. Why? Because those that paid (often great sums of money) for monthly subscriptions to those companies that produce and promote the actual campaigns get a heads up before these ad campaigns are released and take position early on. In the early phase of the promotion more and more people take position moving the stock price higher. By the time the mass of the general public (you) receive the ad, the stock price has already made the bulk of its move and all too often when the general public (you) take position it's too late. The best way to invest in penny stocks therefore is to buy them before they are heavily promoted and hyped up in price. That's where we come in. In our manual 'Learn How Professionals Trade the Penny Stock Market' we will show you a step-by-step method of how to find those penny stocks that will be heavily promoted, or those already in the early phase of heavy promotion. The bottom line - You will learn how to get into the stock at the early phase of that promotional campaign and where real money can be made! Like those that pay a great deal of money for the privilege of knowing ahead of time which stocks are being heavily promoted, you too can buy them ahead of the big PR campaigns and wait to cash in with the big run-up that typically follows the release of the campaign to the general public. Now for the good news.....We've done all the hard work for you! You will learn our proprietary method of analysis on how we scan over 12,500 equities every day searching for those penny stocks (microcap stocks) poised to breakout and make explosive gains! You will find our track record of success (which we proudly post at the end of each day of trading on our site) is proof that our methodology at Trading-Pennies.com by no means ordinary.

With the right knowledge and a bit of counseling, you can select winners and pare away losers to come out ahead. Most people do not have sufficient knowledge of their operation or what to expect short and long term. This book will open their eyes to a new world of investment possibilities, which should always revolve around a good return. You can make money on anything called an investment, and penny stocks are no exception. If you buy enough, and perhaps diversify to a considerable degree, you will increase your odds of success. Many investors in penny stocks love speculation in the hopes of finding the next greatest thing. They hope to be in on the ground floor of a Microsoft or Wal-mart for example. While this seldom happens, it can of course, and no doubt will at some future time. Pinning your hopes on penny stocks, the naysayers maintain, can keep you penniless. Only time will tell and you could fool them all. There is the other side of the coin, however, which is included in this book. Penny stocks are risky and the territory is riddled with corpses of investors who have gone belly up. It is important to weight the evidence and assess the odds before jumping in.
