Top Secret Ways to Find People Nona Hollers,2010-11-23 Two of the most accessible and most accurate ways to find people nowadays is using the white pages, which is the offline method, and doing an online people search through the use of the internet. By means of flipping through the white pages, you are able to know the present address, exact location and the phone numbers of the people you are looking for. An online people search works like the white pages but instead of flipping through pages manually you use the internet protocol to search for the person you are looking for. It has its own database of information and names, addresses, and personal data of just about any person in the world. An online people search is better than using the white pages for the obvious reason that it is more convenient to perform compared to a manual scan. In terms of data being more up-to-date, both can be very reliable as white pages get updated at least once a year and online data in just about the same frequency.If you have the person's first name, middle initial, and family name, address and/or phone number correctly, then you can instantly find that person listed in the white pages and in the internet. Through an online people search though, you can go a further step and check the educational and career achievements, family background and other confidential personal information. These search features are free resources if you need just the very basic information. There are websites that require payment for some complicated data. With these resources, you can easily be your own private eye and do your own investigation for a fraction of the cost of hiring professional services.

How to Disappear Frank Ahearn,Eileen Horan,2019-10 For the first time in paperback we bring you the authoritative and comprehensive guide for people who seek to protect their privacy as well as for anyone who's ever entertained the fantasy of disappearing--whether actually dropping out of sight or by eliminating the traceable evidence of their existence. Written by the world's leading experts on finding people and helping people avoid being found, How to Disappear covers everything from tools for disappearing to discovering and eliminating the nearly invisible tracks and clues we tend to leave wherever we go. Learn the three keys to disappearing, all about your electronic footprints, the dangers and opportunities of social networking sites, and how to disappear from a stalker. Frank Ahearn and Eileen Horan provide field-tested methods for maintaining privacy, as well as tactics and strategies for protecting personal information and preventing identity theft. They explain and illustrate key tactics such as misinformation (destroying all the data known about you); disinformation (creating fake trails); and, finally, reformation--the act of getting you from point A to point B without leaving clues. Ahearn illustrates every step with real-life stories of his fascinating career, from undercover work to nab thieving department store employees to a stint as a private investigator; and, later, as a career skip tracer who finds people who don't want to be found. In 1997, when news broke of President Bill Clinton's dalliance with a White House intern, Ahearn was hired to find her. When Oscar statuettes were stolen in Beverly Hills, Ahearn pinpointed a principal in the caper to help solve the case. When Russell Crowe threw a telephone at a hotel clerk in 2005, Ahearn located the victim and hid him from the media. An indispensable resource not just for those determined to become utterly anonymous, but also for just about anyone in the brave new world of on-line information, How to Disappear sums up Ahearn's dual philosophy: Don't break the law, but know how to protect yourself.

The Long Term Missing Silvia Pettem,2017-03-17 When loved-ones go missing, the lives of their family members are turned upside-down. As the days and months turn into years, some families are caged in by their grief, while others become proactive — renewing police contacts, keeping up with the latest technologies, and educating themselves as they strive to become their long-term missing persons' advocates. By inspiring hope, as well as providing answers and practical advice, The Long Term Missing: Hope and Help for Families assists families in navigating the uncharted territory they never chose to enter. Author Silvia Pettem also provides families with information to better understand how law-enforcement and related agencies work to solve missing persons cases. Along the way, she takes her readers behind the scenes, while emphasizing that every

unidentified person is a missing person to someone else. With real cases, both solved and unsolved, the book also illustrates the resources available and the actions that family members, civilians, and law enforcement agencies can take to search for long-term missing persons, to identify previously unknown remains, and to bring the missing persons home. The Long Term Missing: Hope and Help for Families inspires hope and gives answers as it empowers family members of long term missing persons to be proactive and to become their missing persons’ advocates.

Cold Case Research Resources for Unidentified, Missing, and Cold Homicide Cases Silvia Pettem,2012-07-27 Cases in which all investigative leads appear to be exhausted are frustrating for both investigators and victims’ families. Cold cases can range from those only a few months old to others that go back for decades. Presenting profiles and actual case histories, Cold Case Research: Resources for Unidentified, Missing and Cold Homicide Cases illustrates how investigators can successfully apply resources that will enable them to reopen and solve cases gathering dust in the file room. Today’s investigators have found that, to solve cold cases, they need to be internet savvy and make the best use of the rapidly changing methodologies of the twenty-first century, but they also have to be time travelers and open the door to the past. This volume weaves together the nearly forgotten skill sets of traditional historical researchers with the latest online tools, including TLO, a premier investigative system; and NamUs, the revolutionary database for missing persons and unidentified remains. Along with practical applications, Cold Case Research gives investigators the tools they need to save time and money and to jump-start their cold cases, while keeping others from going cold in the future. Topics discussed include: Implementing cold case units People searches and working with databases Overlooked DNA in PKU cards The plight of the missing and unknown Applying historical and geographical context Online and off-line newspaper research Public and published records The use of volunteers Contact with co-victims Cold-case review teams and information-sharing resources Taking advantage of the media Using a thinking-outside-the-box approach, this volume helps fill major gaps in traditional cold case investigation training and techniques, enabling investigators to confidently reopen and crack the mystery of cases long thought unsolvable. Silvia Pettem was quoted in a January 29, 2012 article on missing persons in the Colorado Springs Gazette.
