⬜ **Copyright Questions and Answers for Information Professionals** Laura N. Gasaway,2012-12-15 Copyright law is a critical issue for authors, librarians, publishers, and information vendors. It is also a complex area, with many shades of gray. Librarians continually need to seek answers to questions ranging from the reproduction of copyrighted works for library users, through the performance of audiovisual works, to the digitization and display of protected works on library websites. This book presents updated versions of the author's copyright columns published in Against the Grain, the leading journal in acquisitions librarianship since the late 1990s. It is the first volume in the series Charleston Insights in Library, Archival, and Information Sciences. The aim of the Charleston Insights series is to focus on important topics in library and information science, presenting the issues in a relatively jargon-free way that is accessible to all types of information professionals, including librarians, publishers, and vendors, and this goal shapes the pragmatic and accessible tone of the book. The volume is presented in question-and-answer format. The questions are real, submitted by librarians, educators, and other information professionals who have attended the author's copyright law workshops and presentations or submitted them to her by e-mail or telephone. The author has selected the questions and answers that have general applicability. She has then arranged them into logical chapters, each prefaced by a short introduction to the topic. Because it is written in an accessible and clear style, readers may want to review the entire work or they can just access particular chapters or even specific questions as they need them. The volume includes an index to facilitate reference use.

⬜ **Calvinism** Brad J. Waggoner,E. Ray Clendenen,2008-06-01 What impact is the Calvinist/non-Calvinist debate having on the Southern Baptist Convention today?

This book holds a theological conversation between followers of Christ about issues on which they often disagree. And while such controversial points of doctrine cannot be ignored, neither should they put up impenetrable walls between groups that are committed to the same essential Christian beliefs. Calvinism: A Southern Baptist Dialogue brings together new presentations from noted Southern Baptists including Daniel Akin, Tom Ascol, David Dockery, Charles Lawless, and Ed Stetzer that address misperceptions, stereotypes, and caricatures of the debate over Reformed theology. Each strives to speak the truth in love and humility while seeking clarity in the presentation of the Gospel, improving the health of our churches, and seeking the kingdom of Christ above all. Endorsements: What do we have to agree on? The doctrines of what it means for us to be lost, and of how we are saved could not be more important. This book explores how much we can disagree over these things and still work together. If you care about both evangelistic cooperation and doctrinal integrity, this book is a book for you. —Mark Dever, pastor, Capitol Hill Baptist Church and president of 9Marks.org

⯄ Active Directory Cookbook Laura E. Hunter,Robbie Allen,2008-12-16 When you need practical hands-on support for Active Directory, the updated edition of this extremely popular Cookbook provides quick solutions to more than 300 common (and uncommon) problems you might encounter when deploying, administering,

and automating Microsoft's network directory service. For the third edition, Active Directory expert Laura E. Hunter offers troubleshooting recipes based on valuable input from Windows administrators, in addition to her own experience. You'll find solutions for the Lightweight Directory Access Protocol (LDAP), ADAM (Active Directory Application Mode), multi-master replication, Domain Name System (DNS), Group Policy, the Active Directory Schema, and many other features. The Active Directory Cookbook will help you: Perform Active Directory tasks from the command line Use scripting technologies to automate Active Directory tasks Manage new Active Directory features, such as Read-Only Domain Controllers, fine-grained password policies, and more Create domains and trusts Locate users whose passwords are about to expire Apply a security filter to group policy objects Check for potential replication problems Restrict hosts from performing LDAP queries View DNS server performance statistics Each recipe includes a discussion explaining how and why the solution works, so you can adapt the problem-solving techniques to similar situations. Active Directory Cookbook is ideal for any IT professional using Windows Server 2008, Exchange 2007, and Identity Lifecycle Manager 2007, including Active Directory administrators looking to automate task-based solutions. It is rare for me to visit a customer site and not see a copy of Active Directory Cookbook on a shelf somewhere, which is a testament to its usefulness. The Cookbook takes the pain out of everyday AD tasks by providing concise, clear and relevant recipes. The fact that the recipes are provided using different methods (graphical user interface, command line and scripting) means that the book is suitable for anyone working with AD on a day-to-day basis. The introduction of PowerShell examples in this latest edition will be of particular interest for those looking to transition from VBScript. Laura has also done a great job in extending the Cookbook in this edition to encompass the broad range of changes to AD in Windows Server 2008. --Tony Murray, Founder of Activedir.org and Directory Services MVP If you already understand Active Directory fundamentals and are looking for a quick solution to common Active Directory related tasks, look no further, you have found the book that you need. --Joe Richards, Directory Services MVP The Active Directory Cookbook is the real deal... a soup-to-nuts catalog of every administrative task an Active Directory administrator needs to perform. If you administer an Active Directory installation, this is the very first book you have to put on your shelf. --Gil Kirkpatrick, Chief Architect, Active Directory and Identity Management, Quest Software and Directory Services MVP

A General View of the Law of Property James Andrew Strahan,1897

On Being a Department Head, a Personal View John B. Conway,1996 'For years, higher education prospered. It loudly proclaimed that college graduates command far greater lifetime incomes. Ample funding followed. We produced. But that argument has begun to sour. A college degree has long since stopped being a guarantee of prosperity or even job security. Society has begun to question its support for universities. In this environment, mathematicians and all academics must begin to change, compete, and seek resources that will be used with greater care. It is the only solution if we hope to maintain the integrity of the enterprise...I want to offer advice to department heads out there. I want to try to educate the rank and file about a variety of aspects of the job of being a department head. I also want to tell you my opinion about this job and perhaps also a little about love, death, and the vagaries of the human condition.' - from the Preface This unique book presents a witty, well-written personal view about the experience of being a department head. Those in academia will profit from the author's inside view, and other department heads and chairs – new and old – will benefit from the experiences of this keenly observant colleague.
