Switch Chip Heath, Dan Heath, 2010-02-16 Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results:

- The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients
- The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping
- The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service

In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. *Switch* shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

The Age of Surveillance Capitalism Shoshana Zuboff, 2019-01-15 The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called surveillance capitalism, and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the

phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new behavioral futures markets, where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new means of behavioral modification. The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a Big Other operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled hive of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

The Svetlana Boym Reader Svetlana Boym,2018-04-19 Svetlana Boym was a prolific writer, a charismatic professor, a novelist, and a public intellectual. She was also a fiercely resourceful and reflective immigrant; her most resonant book, *The Future of Nostalgia*, was deeply rooted in that experience. Even after *The Future of Nostalgia* carried her fame beyond academic circles, few readers were aware of all of her creative personas. She was simply too prolific, and her work migrated across most people's disciplinary boundaries—from literary and cultural studies through film, visual, and

material culture studies, performance, intermedia, and new media. The Svetlana Boym Reader presents a comprehensive view of Boym's singularly creative work in all its aspects. It includes Boym's classic essays, carefully chosen excerpts from her five books, and journalistic gems. Showcasing her roles both as curator and curated, the reader includes interviews and excerpts from exhibition catalogues as well as samples of intermedial works like Hydrant Immigrants. It also features autobiographical pieces that shed light on the genealogy of her scholarly work and rarities like an excerpt from Boym's first graduate school essay on Russian literature, complete with marginalia by her mentor Donald Fanger. Last but not least, the reader includes late pieces that Boym did not live to see through publication, as well as transcripts of her memorable last lectures and performances.

WOMEN & ECONOMICS: A Study of the Economic Relation between Men and Women as a Factor in Social Evolution Charlotte Perkins Gilman, 2017-08-07 *Women and Economics* is a book written by Charlotte Perkins Gilman and published in 1898. It is considered by many to be her single greatest work, and as with much of Gilman's writing, the book touched a few dominant themes: the transformation of marriage, the family, and the home, with her central argument: the economic independence and specialization of women as essential to the improvement of marriage, motherhood, domestic industry, and racial improvement. The 1890s were a period of intense political debate and economic challenges, with the Women's Movement seeking the vote and other reforms. Women were entering the work force in swelling numbers, seeking new opportunities, and shaping new definitions of themselves. It was near the end of this tumultuous decade that Gilman's very popular book emerged. Charlotte Perkins Gilman (1860-1935) was a prominent American feminist, sociologist, novelist, writer of short stories, poetry, and nonfiction, and a lecturer for social reform.

German Unification M. Donald Hancock, 2019-03-11 The East European revolutions of 1989 led to momentous changes throughout the region. Nowhere were they felt more dramatically than in Germany, where unification unexpectedly became reality, unfolding with breathtaking speed, unhindered by major obstacles. However, joy over the fall of the Berlin Wall and the opening of the borders was soon dampene

A Measured Life Richard Hoggart, 2020-03-06 Richard Hoggart's book, *The Uses of Literacy*, established his reputation as a uniquely sensitive and observant chronicler of English working-class life. This pioneering work, first published in 1957, examines changes in the life and values of the

English working class in response to mass media. It maps out a new methodology in cultural studies based around interdisciplinary and a concern with how texts in this case, mass publications are stitched into the patterns of lived experience. Mixing personal memoir with social history and cultural critique. The Uses of Literacy anticipates recent interest in modes of cultural analysts that refuse to hide the author behind the mask of objective social scientific technique. In its method and in its rich accumulation of the detail of working-class life, this volume remains useful and absorbing.

TIP 35: Enhancing Motivation for Change in Substance Use Disorder Treatment (Updated 2019) U.S. Department of Health and Human Services, 2019-11-19 Motivation is key to substance use behavior change. Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors' use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs. Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. Resistance to change is an expression of ambivalence about change, not a client trait or characteristic. Confrontational approaches increase client resistance and discord in the counseling relationship. Motivational approaches explore ambivalence in a nonjudgmental and compassionate way.

Trade and Investment in the 1990s Ryūzō Satō, Rama Ramachandran, Myra Arouson, 1996 One of the Center's forums has been a series of panel discussions moderated by Professor Robert Kavesh and featuring Nobel Laureate Paul A. Samuelson. Long-Term Credit Bank of Japan Visiting Professor of Political Economy. Joining in the discussion are business leaders from Japan and faculty members from the Stern School. In addition, every March the Sanwa Monograph Selection Committee meets to

award a research grant for a monograph on international financial markets. The Committee consists of two Nobel laureates, Merton Miller and James Tobin, and Professors Akiyoshi Horiuchi, Ryuzo Sato, Marti Subrahmanyam, and Richard Zeckhauser. After the meeting the Committee participates in an open panel discussion in which they are joined by the General Manager of the Sanwa Bank, New York.

A Fortunate Life Paddy Ashdown, 2010-09-25 Paddy Ashdown's autobiography was hailed as one of the most readable and exciting political life stories ever written of all – precisely because it was so very much more. This is the autobiography of an old-fashioned Man of Action, an adventurer, to be compared more readily to Fitzroy Maclean than David Steel. Ashdown's years as MP for Yeovil and leader of the Liberal Democrats pale alongside his time as a Royal Marine Commando, in the Special Boat Squadron, as a spy, on military service in Northern Ireland and Indonesia, and then subsequently – perhaps his finest and most heroic role, as the UN's High representative in war-torn Bosnia. As one reviewer remarked: "This must be the first political memoir to offer advice on the best way to execute a jungle ambush and on how to treat an open wound using red ants." Ashdown's appeal – which explains this book's hardback bestseller status – is that he transcends party political allegiances, and is seen as a genuinely honest and decent man unafraid to take on the hardest challenges.

The Breakthrough Experience Dr. John F. Demartini, 2002-03-01 This book is about breaking through the barriers that keep us from experiencing our true nature as light. It presents inspiring science and philosophy in a way that is completely accessible to anyone, to reveal and explore the universal laws and principles that underlie our very existence. Those principles are set forth in extraordinary but true stories of ordinary people having astonishing and moving life experiences, and they make the most profound concepts easily understood. Most important, it is an extremely real and practical manual for understanding why we live the way we do, and how to transform our lives into

our highest vision. You will learn a formula to manifest your dreams, discover the secrets of opening your heart beyond anything you have imagined, find out how to increase love and appreciation for every aspect of your life, receive profound insights on how to create more fulfilling and caring relationships, reawaken your birthright as a true genius, transcend the fears and illusions surrounding the myth of death, and reconnect with your true mission and purpose on Earth. That is all true, but mainly, this book will deeply touch and inspire you with respect to your own greatness and potential—and the magnificence of every single human soul. This is not just a book, it is what the title implies—an Experience—and it is impossible to go through it without being moved, challenged, and changed. Welcome to . . . The Breakthrough Experience.

Rethinking Basic Design in Architectural Education Mine Ozkar, 2017-03-27 Rethinking Basic Design in Architectural Education provides historical and computational insights into beginning design education for architecture. Inviting the readers to briefly forget what is commonly known as basic design, it delivers the account of two educators, Denman W. Ross and Arthur W. Dow, from the turn of the twentieth century in Northeast America, interpreting key aspects of their methodology for teaching foundations for design and art. This alternate intellectual context for the origins of basic design as a precursor to computational design complements the more haptic, more customized, and more open-source design and fabrication technologies today. Basic design described and illustrated here as a form of low-tech computation offers a setting for the beginning designer to consciously experience what it means to design. Individualized dealings with materials, tools, and analytical techniques foster skills and attitudes relevant to creative and technologically adept designers. The book is a timely contribution to the theory and methods of beginning design education when fast-changing design and production technology demands change in architecture schools' foundations

curricula.

East German intelligence and Ireland, 1949–90 Jérôme aan de Wiel, 2015-02-01 This book is an in-depth examination of the relations between Ireland and the former East Germany between the end of the Second World War and the fall of the Berlin Wall. It explores political, diplomatic, economic, media and cultural issues. The long and tortuous process of establishing diplomatic relations is unique in the annals of diplomatic history. Central in this study are the activities of the Stasi. They show how and where East German intelligence obtained information on Ireland and Northern Ireland and also what kind of information was gathered. A particularly interesting aspect of the book is the monitoring of the activities of the Irish Republican Army and the Irish National Liberation Army and their campaigns against the British army in West Germany. The Stasi had infiltrated West German security services and knew about Irish suspects and their contacts with West German terrorist groups. East German Intelligence and Ireland, 1949–90 makes an original contribution to diplomatic, intelligence, terrorist and Cold War studies.

The Truths We Hold Kamala Harris, 2020-08-04 The #1 New York Times bestseller From Vice President Kamala Harris, one of America's most inspiring political leaders, a book about the core truths that unite us, and the long struggle to discern what those truths are and how best to act upon them, in her own life and across the life of our country A life story that genuinely entrances. —Los Angeles Times Vice President Kamala Harris's commitment to speaking truth is informed by her upbringing. The daughter of immigrants, she was raised in an Oakland, California community that cared deeply about social justice; her parents--an esteemed economist from Jamaica and an admired cancer researcher from India--met as activists in the civil rights movement when they were graduate students at Berkeley. Growing up, Harris herself never hid her passion for justice, and when she

became a prosecutor out of law school, a deputy district attorney, she quickly established herself as one of the most innovative change agents in American law enforcement. She progressed rapidly to become the elected District Attorney for San Francisco, and then the chief law enforcement officer of the state of California as a whole. Known for bringing a voice to the voiceless, she took on the big banks during the foreclosure crisis, winning a historic settlement for California's working families. Her hallmarks were applying a holistic, data-driven approach to many of California's thorniest issues, always eschewing stale tough on crime rhetoric as presenting a series of false choices. Neither tough nor soft but smart on crime became her mantra. Being smart means learning the truths that can make us better as a community, and supporting those truths with all our might. That has been the pole star that guided Harris to a transformational career as the top law enforcement official in California, and it is guiding her now as a transformational United States Senator, grappling with an array of complex issues that affect her state, our country, and the world, from health care and the new economy to immigration, national security, the opioid crisis, and accelerating inequality. By reckoning with the big challenges we face together, drawing on the hard-won wisdom and insight from her own career and the work of those who have most inspired her, Kamala Harris offers in *THE TRUTHS WE HOLD* a master class in problem solving, in crisis management, and leadership in challenging times. Through the arc of her own life, on into the great work of our day, she communicates a vision of shared struggle, shared purpose, and shared values. In a book rich in many home truths, not least is that a relatively small number of people work very hard to convince a great many of us that we have less in common than we actually do, but it falls to us to look past them and get on with the good work of living our common truth. When we do, our shared effort will continue to sustain us and this great nation, now and in the years to come.
