Based on quantitative research, the author observes differences in preferences among German and Chinese participants for varying product groups and mass customization stages. Contrasts in willingness-to-pay for mass-customized goods are explored and the investigated cultural influence is attributed to specific cultural dimensions.

Metabolic Phenotyping in Personalized and Public Healthcare Jeremy Nicholson, Ara Darzi, Elaine Holmes, John C. Lindon, 2016-02-11 Metabolic Phenotyping in Personalized and Public Healthcare provides information on the widespread recognition that a personalized or stratified approach to patient treatment may offer a more efficient and effective healthcare solution than phenotype-led approaches. In order to achieve that objective, a deep personal description is required at the level of the genome, proteome, metabolome, or preferably a combination of these aided by technology. This book, edited and written by the outstanding luminaries of this evolving field, evaluates metabolic profiling and its uses across personalized and population healthcare, while also covering the advent of new technology fields, such as surgical metabolomics. In addition, the text presents specific examples of where this technology has been used clinically and with efficacy, pointing towards a framework and protocol for usage as it hits the clinical mainstream. Translates the conjunction of new surgical tools for intraoperative, real-time, metabolite evaluation and direct analysis of biofluid samples into novel options for augmented clinical decision-making Discusses longitudinal sampling from individual patients for stratified medicine Covers high resolution analytical spectroscopy and sophisticated computational modelling for prediction of adverse reactions in critical care scenarios, prognostic evaluation of cancer from biofluidism, and prognostic prediction of metabolism or response of patients to pharmaceutical interventions Encapsulates recent technology options for broader population profiling considerations, in particular, the metabolome-wide association studies (MWAS) that aid the translational researcher in identifying metabolic patterns associated with disease Foreword written by Professor Dame Sally Davies who is the Chief Medical Officer for England

.357 Magnum Opus Ghezal Omar, 2020-02-21 Bounty hunter Sexx Pistol never kept track of the body count, until it was one of her own lying dead on the ground. Struck with grief, she swore she would leave Kassius Del Mar, the man she held accountable for her partner's death, and her violent past behind. But it's hard to pass up easy cash for a quick hit job. Lured back into the dark world of drugs, death and destruction, she and Kassius must team up once more to track down Bastian Braun on the orders of powerful crime lord, Lyndon Baines. Baines despises when his laundered money goes missing, and when Bastian goes missing with it, he sends Sexx Pistol and Kassius to take care of the problem. It seems simple enough, but Bastian's vast web of criminal contacts, crooked cops, and stores of cash make him annoyingly evasive. Baines' patience runs out when Bastian escapes the bounty hunters and Kassius kills the wrong guy. As frustrations and collateral damage rise, Sexx Pistol and Kassius will have to overcome their deeply entangled past to complete the job, or risk being Baines' next targets.

Advances in Semantic Media Adaptation and Personalization Marios C. Angelides, Phivos Mylonas, Manolis Wallace, 2009-03-17 The emergence of content- and context-aware search engines, which not only personalize searching and delivery but also the content, has caused the emergence of new infrastructures capable of end-to-end ubiquitous transmission of personalized multimedia content to any device on any network at any time. Personalizing and adapting content requires processing of content and recognizing patterns in users' behaviour on the other. Personalizing and adapting the semantic content of multimedia enables applications to make just-in-time intelligent decisions regarding this content, which in turn makes interaction with the multimedia content an individual and individually rewarding experience. Highlighting the changing nature of the field, *Advances in Semantic Media Adaptation and Personalization, Volume Two* discusses the state of the art, recent advances, and future outlooks for semantic media adaptation and personalization. Topics include: Collaborative Content Modeling Automatic Content Feature Extraction to Content Models Semantic Languages for Content Description Video Content Adaptation Adaptive Video Content Retrieval Content Similarity Detection Personalized Content Podcasting Adaptive Web Interaction As content and service providers recognize the value of new services and new markets, they will invest in technologies that adapt and personalize content. Industry, in response, has released new standards such as MPEG-7, MPEG21, and VC-1 that enable propagation of semantic media, adaptation, and personalization. Consequently, a broad range of applications are emerging across many industry sectors, such as music, film, games, television, and sports. Bringing together insight from researchers and practitioners, this book provides a sampling of the latest thinking in the field.

From principles, methodology and translational approaches to genome discoveries and clinical applications, *Essentials of Genomic and Personalized Medicine* will be a valuable resource for various professionals and students across medical disciplines, including human genetics and genomics, oncology, neuroscience, gene therapy, molecular medicine, pharmacology, and biomedical sciences. Updates with regard to diagnostic testing, pharmacogenetics, predicting disease susceptibility, and other important research components as well as chapters dedicated to cardiovascular disease, oncology, inflammatory disease, metabolic disease, neuropsychiatric disease, and infectious disease, present this book as an essential tool for a variety of professionals and students who are endeavouring into the developing the diverse and practical field of genomic and personalized medicine. * Full color throughout * Includes contributions on genetic counselling, ethical, legal/regulatory, and social issues related to the practice of genomic medicine from leaders in the field * Introductory chapter highlights differences between personalized and traditional medicine, promising areas of current research, and challenges to incorporate the latest research discoveries and practice * Ancillary material includes case studies and lab questions which highlight the collaborative approach to the science

Routledge Handbook of Political Advertising Christina Holtz-Bacha, Marion R. Just, 2017-02-24 This Handbook provides the most comprehensive overview of the role of electoral advertising on television and new forms of advertising in countries from all parts of the world currently available. Thematic chapters address advertising effects, negative ads, the perspective of practitioners and gender role. Country chapters summarize research on issues including political and electoral systems; history of ads; the content of ads; reception and effects of ads; regulation of political advertising on television and the Internet; financing political advertising; and prospects for the future. The Handbook confirms that candidates spend the major part of their campaign budget on television advertising. The US enjoys a special situation with almost no restrictions on electoral advertising whereas other countries have regulation for the time, amount and sometimes even the content of electoral advertising or they do not allow television advertising at all. The role that television advertising plays in elections is dependent on the political, the electoral and the media context and can generally be regarded as a reflection of the political culture of a country. The Internet is relatively unregulated and is the channel of the future for political advertising in many countries
