Time-resolved Diffraction J. R Helliwell,P. M. Rentzepis,1997-12-18 Recent technological advances in synchrotron and neutron sources, detectors, and computer

hardware and software have made possible diffraction techniques which collect data at successive moments in time. This is the first book to bring together reviews and research articles covering the three branches of time-resolved diffraction--X-ray, electron, and neutron field. Time-Resolved Diffraction covers gases, liquids, amorphous solids, fibers, and crystals and does so in a multidisciplinary framework which includes examples from molecular biology and chemistry, as well as techniques from physics and materials science. The various time scales of data collection cover ten orders of magnitude, from the sub-pico domain to the kilosecond. Research scientists and graduate students will find this book the most complete compendium of work in this developing field.

Wireless Communications Networks for the Smart Grid Quang-Dung Ho,Yue Gao,Gowdemy Rajalingham,Tho Le-Ngoc,2014-09-19 This brief presents a comprehensive review of the network architecture and communication technologies of the smart grid communication network (SGCN). It then studies the strengths, weaknesses and applications of two promising wireless mesh routing protocols that could be used to implement the SGCN.

Packet transmission reliability, latency and robustness of these two protocols are evaluated and compared by simulations in various practical SGCN scenarios. Finally, technical challenges and open research opportunities of the SGCN are addressed. Wireless Communications Networks for Smart Grid provides communication network architects and engineers with valuable proven suggestions to successfully implement the SGCN. Advanced-level students studying computer science or electrical engineering will also find the content helpful.

Doing the Time Warp Sarah Taylor Ellis,2022-01-27 Doing the Time Warp explores how song and dance – sites of aesthetic difference in the musical – can 'warp' time and enable marginalized and semi-marginalized fans to imagine different ways of being in the world. While the musical is a bastion of mainstream theatrical culture, it also supports a fan culture of outsiders who dream themselves into being in the strange, liminal timespaces of its musical numbers. Through analysing musicals of stage and screen – ranging from Rent to Ragtime, Glee to Taylor Mac's A 24-Decade History of Popular Music – Sarah Taylor Ellis investigates how alienated subjects find moments of coherence and connection in musical theatre's imaginaries of song and dance. Exploring an

array of archival work and live performance, such as Larry Gelbart's papers in the UCLA Performing Arts Collections and the shadowcast performances of Los Angeles's Sins o' the Flesh, Doing the Time Warp probes the politics of musicals and consider show the genre's 'strange temporalities' can point towards new futurities for identities and communities in difference.

Advancements in Real–Time Simulation of Power and Energy Systems Panos Kotsampopoulos,Md Omar Faruque,2021-05-20 Modern power and energy systems are characterized by the wide integration of distributed generation, storage and electric vehicles, adoption of ICT solutions, and interconnection of different energy carriers and consumer engagement, posing new challenges and creating new opportunities. Advanced testing and validation methods are needed to efficiently validate power equipment and controls in the contemporary complex environment and support the transition to a cleaner and sustainable energy system. Real-time hardware-in-the-loop (HIL) simulation has proven to be an effective method for validating and de-risking power system equipment in highly realistic, flexible, and repeatable conditions. Controller hardware-in-the-loop (CHIL) and power hardware-in-the-loop (PHIL) are the two main HIL simulation methods used in industry and

academia that contribute to system-level testing enhancement by exploiting the flexibility of digital simulations in testing actual controllers and power equipment. This book addresses recent advances in real-time HIL simulation in several domains (also in new and promising areas), including technique improvements to promote its wider use. It is composed of 14 papers dealing with advances in HIL testing of power electronic converters, power system protection, modeling for real-time digital simulation, co-simulation, geographically distributed HIL, and multiphysics HIL, among other topics.

Geographies of the Super-rich Iain Hay,2013-01-01 ÔGlobalization, it seems, has propelled the worldÕs uber-wealthy to new heights of power and money, with tremendous repercussions for the other 99.9 percent of us. At a time when neoliberalism has propelled the world into a new Gilded Age, with

rising inequality everywhere, an aggressive class war being waged by the wealthy, and billionaires inserting themselves bluntly into the political arena, understanding the behavior and spatiality of the super-rich has acquired a pressing urgency. This volume offers a richly textured suite of essays concerning how the super-rich have restructured local places, transforming landscapes as varied as London and Kentucky, Ireland and St. Barts, as well as domains as varied as art, thoroughbred horses, and housing.Õ Ð Barney Warf, University of Kansas, US ÔThe worldÕs super-rich, made up of just 11 million people, have access to about US\$42.0 trillion of wealth. These are people who each have a spare million of ÒliquidÓ wealth. Their wealth is roughly equal to two thirds of global GDP. They own most of everything. As the editor of this books states Ò. . . library shelves and the pages of journals remain largely devoid of geographical work on the super-rich Ð a startling lacuna this volume sets out to fillÓ. The super-rich now own most of the planet. During the last year their share fell slightly. Times may be changing. Now is the time to begin to study the superÐrich in detail, especially if you are worried about where all the wealth has gone.Õ Ð Danny Dorling, University of Sheffield, UK This timely and path-breaking book brings together a group of

distinguished and emerging international scholars to critically consider the geographical implications of the worldÕs super-rich, a privileged yet remarkably overlooked group. Emerging from this unique collection is an enlightening picture of the influence of the super-rich over a diverse range of affairs, extending from the shape of urban and rural landscapes to the future of art history. By concentrating on those at the apex of the economic pyramid, this book provides valuable insights to the institutions, practices and cultural values of our society, as well as allowing us a more comprehensive view of the consequences of global capitalism. Presenting case studies from across the globe Ð from Singapore to St Barts, London to Lexington Ð the spatial and cultural span of the book is wide-ranging and diverse. This truly unique book will prove a fascinating read for academics, researchers and students in the fields of geography, regional and urban studies, sociology, political science and development studies.

Emerging Workforce Trends in the U.S. Energy and Mining Industries National Research Council,Policy and Global Affairs,Board on Higher Education and Workforce,Division on Earth and Life Studies,Board on Earth Sciences and Resources,Committee on Earth Resources,2015-09-04 Energy and mineral resources are essential for the nation's fundamental functions, its economy, and security. Nonfuel minerals are essential for the existence and operations of products that are used by people every day and are provided by various sectors of the mining industry. Energy in the United States is provided from a variety of resources including fossil fuels, and renewable and nuclear energy, all with established commercial industry bases. The United States is the largest electric power producer in the world. The overall value added to the U.S. gross domestic product (GDP) in 2011 by major industries that consumed processed nonfuel mineral materials was $2.2 trillion. Recognizing the importance of

understanding the state of the energy and mining workforce in the United States to assure a trained and skilled workforce of sufficient size for the future, the Department of Energy's (DOE's) National Energy technology Laboratory (NETL) contracted with the National Research Council (NRC) to perform a study of the emerging workforce trends in the U.S. energy and mining industries. Emerging Workforce Trends in the U.S. Energy and Mining Industries: A Call to Action summarizes the findings of this study.

Smart Energy Control Systems for Sustainable Buildings John Littlewood,Catalina Spataru,Robert J. Howlett,Lakhmi C. Jain,2017-05-26 There is widespread interest in the way that smart energy control systems, such as assessment and monitoring techniques for low carbon, nearly-zero energy and net positive buildings can contribute to a Sustainable future, for current and future generations. There is a turning point on the horizon for the supply of energy from finite resources such as natural gas and oil become less reliable in economic terms and extraction become more challenging, and more unacceptable socially, such as adverse public reaction to 'fracking'. Thus, in 2016 these challenges are having a major influence on the design, optimisation, performance measurements, operation and

preservation of: buildings, neighbourhoods, cities, regions, countries and continents. The source and nature of energy, the security of supply and the equity of distribution, the environmental impact of its supply and utilization, are all crucial matters to be addressed by suppliers, consumers, governments, industry, academia, and financial institutions. This book entitled 'Smart Energy Control Systems for Sustainable Buildings' contains eleven chapters written by international experts based on enhanced conference papers presented at the Sustainability and Energy in Buildings International conference series. This book will be of interest to University staff and students; and also industry practioners.
