Red Eared Sliders Alex Coleman, 2021-04-08 The scientific name for the red-eared slider is *Chrysemys scripta elegans* and it belongs to the Emydidae family. It is an aquatic turtle, a strong swimmer, and in the wild, will commonly be seen basking on rocks, logs, or other surfaces above the water. Turtles are reptiles, and cold-blooded, so they must rely on external heat sources for warmth. They will bask in sunlight, and in the wild, burrow down into the earth to hibernate in winter. The three main concerns in keeping a Red-eared Slider healthy are warmth, clean water, and proper diet. Properly caring for a turtle is more complicated than most people think. An adult, not a child, must take primary responsibility for maintaining and cleaning the housing, feeding, and monitoring the turtle for any signs of illness. This beginner's guide provides vital information on the origin, physical attributes, temperament, health problems, feeding, and socialization of this wonderful pet.
