Primary Education Thinking Skills (P.E.T.S.TM) Book 1 - Updated Edition, 2012 PETSTM (Primary Education Thinking Skills) is a systematized enrichment and diagnostic thinking skills program. Lessons are presented in convergent analysis, divergent synthesis, visual/spatial thinking, and evaluation, suitable for grades K-3. The program aligns to the higher levels of Bloom's Taxonomy. PETSTM 1, the red book, introduces the six thinking specialists of Crystal Pond Woods: Dudley the Detective, the convergent/deductive thinker, Isabel the Inventor, the divergent/inventive thinker, Sybil the Scientist, the convergent/analytical thinker, Yolanda the Yarnspinner, the divergent/creative thinker, Max the Magician, the visual/spatial thinker, Jordan the Judge, the evaluative thinker. Included in the 24 lessons are encounters with the animal characters who are engaged in problem-solving scenarios calling for their types of thinking -- four lessons involving each character (two whole class lessons to help identify talented learners with accompanying reproducible activities, and two small group lessons for identified students and accompanying reproducible activities). PETSTM helps build behavioral portfolios for talented learners that support a differentiated approach to their education, integrates flexibly into any existing primary curriculum, and offers opportunities for learners with different strengths to shine--Amazon.com.

Caring for Family Pets Radford G. Davis D.V.M., M.P.H., 2011-10-20 This book helps pet owners fully understand what it means to care for a companion animal, from choosing a pet to veterinary visits and beyond. Pets are extremely popular in the United States. According to a recent survey, one third of American homes contain one or more cats; almost 40 percent of U.S. households include at least one dog. Pets serve as cherished companions for everyone from young children to senior citizens. However, there are responsibilities and risks involved with pet ownership, and the proper care of these animals that many consider family involves much more than keeping a water dish and food bowl full. This book is written by top animal health experts to explain our roles, rights, and health care challenges when bringing animals into our homes. Topics such as health, first aid, companion animal diseases, common surgeries, and alternative care for pets are all addressed. Information is also provided about pet birds, large pets such as horses, exotics such as snakes and reptiles, and pocket pets such as hamsters, gerbils, guinea pigs, and rats.

PETS Scott Tilley, 2021-12-10 It doesn't matter if you are a cat person or a dog person - if you like pets, then you know how important they are in our lives. Not every cat is Garfield, scarfing down lasagna whenever possible. Not every dog is Lassie, able to rescue children who have fallen down a well. But every pet is special: purebreds, mutts and mixes, and everything in-between. Who can say no to a friendly smile? *PETS* is a collection of tales (tails?) about our furry friends. Service dogs. Rescues. Family companions. Childhood friends. Strays. Saviors. These are some of the roles pets play in our lives. *PETS* captures these stories for everyone to enjoy.

Pets Erica Fudge, 2014-12-05 'When I play with my cat, who knows if I am not a pastime to her more than she is to me?' - Michel de Montaigne. Why do we live with pets? Is there something more to our relationship with them than simply companionship? What is it we look for in our pets and what does this say about us as human beings? In this fascinating book, Erica Fudge explores the nature of this most complex of relationships and the difficulties of knowing what it is that one is living with when one chooses to share a home with an animal. Fudge argues that our capacity for compassion and ability to live alongside others is evident in our relationships with our pets, those paradoxical creatures who give us a sense of comfort and security while simultaneously troubling the categories human and animal. For what is a pet if

it isn't a fully-fledged member of the human family? This book proposes that by crossing over these boundaries pets help construct who it is we think we are. Drawing on the works of modern writers, such as J. M. Coetzee, Elizabeth Marshall Thomas and Jacques Derrida, Fudge shows how pets have been used to think with and to undermine our easy conceptions of human, animal and home. Indeed, *Pets* shows our obsession with domestic animals that reveals many of the paradoxes, contra - dictions and ambiguities of life. Living with pets provides thought-provoking perspectives on our notions of possession and mastery, mutuality and cohabitation, love and dominance. We might think of pets as simply happy, loved additions to human homes but as this captivating book reveals perhaps it is the pets that make the home and without pets perhaps we might not be the humans we think we are. For anyone who has ever wondered, like Montaigne, what their cat is thinking, it will be illuminating reading.
