**Bad Pharma** Ben Goldacre, 2014-04 Argues that doctors are deliberately misinformed by profit-seeking pharmaceutical companies that casually withhold information about drug efficacy and side effects, explaining the process of pharmaceutical data manipulation and its global consequences. By the best-selling author of *Bad Science*.

**Pharma** Gerald Posner, 2021-04-13 Exorbitant prices for lifesaving drugs, safety recalls affecting tens of millions of Americans, and soaring rates of addiction and overdose on prescription opioids have caused many to lose faith in pharmaceutical companies. Now, Americans are demanding national reckoning with a monolithic industry. In *Pharma*, award-winning journalist and New York Times best-selling author Gerald Posner uncovers the real story of the Sacklers, the family that became one of America's wealthiest from the success of OxyContin, their blockbuster narcotic painkiller at the center of the opioid crisis. The unexpected twists and turns of the Sackler family saga are told against the startling chronicle of a powerful industry that sits at the intersection of public health and profits. *Pharma* reveals how and why American drug companies have put earnings ahead of patients--

*Follow the Science* Sharyl Attkisson, 2024-04-23 The respected independent journalist and New York Times bestselling author of *Stonewalled* and *Smeared* exposes the corruption that has ruled the pharmaceutical industry for decades. Through blatant lies, deep cover-ups, and high-level collusion with government and media, Big Pharma has continuously put profits over people. Now, with her signature investigative rigor and uncompromising commitment to the truth, Sharyl Attkisson takes readers on a journey through the dark underbelly of the pharmaceutical industry. Despite growing skepticism over the past three decades over high prices and a lack of innovation, Big Pharma's critics have often been silenced or labeled science deniers. Even major media stories have been suppressed to placate pharmaceutical advertisers. The rift has only grown since the major pharmaceutical companies and their allies attacked anyone worried about the Covid-19 vaccines and major new treatments failed to significantly affect outcomes despite skyrocketing costs. *Follow the Science* will challenge your assumptions, open your eyes, and inspire you to take action. With its powerful message of truth and justice, this book is a must-read for anyone who cares about the future of our healthcare system.

**The \$800 Million Pill** Merrill Goozner, 2004-04-22 Demonstrates that important new drugs are the results of work done at taxpayer-funded universities and at the National Institutes of Health, not by the pharmaceutical firms who profit from the sale of prescription drugs.

*Sickening* John Abramson, 2022-02-08 The inside story of how Big Pharma's relentless pursuit of ever-higher profits corrupts medical knowledge—misleading doctors, misdirecting American health care, and harming our health. The United States spends an excess \$1.5 trillion annually on health care compared to other wealthy countries—yet the amount of time that Americans live in good health ranks a lowly 68th in the world. At the heart of the problem is Big Pharma, which funds most clinical trials and therefore controls the research agenda, withholds the real data from those trials as corporate secrets, and shapes most of the information relied upon by health

care professionals. In this no-holds-barred exposé, Dr. John Abramson—one of the foremost experts on the drug industry’s deceptive tactics—combines patient stories with what he learned during many years of serving as an expert in national drug litigation to reveal the tangled web of financial interests at the heart of the dysfunction in our health-care system. For example, one of pharma’s best-kept secrets is that the peer reviewers charged with ensuring the accuracy and completeness of the clinical trial reports published in medical journals do not even have access to complete data and must rely on manufacturer-influenced summaries. Likewise for the experts who write the clinical practice guidelines that define our standards of care. The result of years of research and privileged access to the inner workings of the U.S. medical-industrial complex, *Sickening* shines a light on the dark underbelly of American health care—and presents a path toward genuine reform.

**Drug Wars** Robin Feldman, Evan Frondorf, 2017-06-09 While the shockingly high prices of prescription drugs continue to dominate the news, the strategies used by pharmaceutical companies to prevent generic competition are poorly understood, even by the lawmakers responsible for regulating them. In this groundbreaking work, Robin Feldman and Evan Frondorf illuminate the inner workings of the pharmaceutical market and show how drug companies twist health policy to achieve goals contrary to the public interest. In highly engaging prose, they offer specific examples of how generic competition has been stifled for years, with costs climbing into the billions and everyday consumers paying the price. *Drug Wars* is a guide to the current landscape, a roadmap for reform, and a warning of what is to come. It should be read by policymakers, academics, patients, and anyone else concerned with the soaring costs of prescription drugs.

Bottle of Lies Katherine Eban, 2020-06-23 A NEW YORK TIMES BESTSELLER New York Times 100 Notable Books of 2019 New York Public Library Best Books of 2019 Kirkus Reviews Best Health and Science Books of 2019 Science Friday Best Books of 2019 New postscript by the author From an award-winning journalist, an explosive narrative investigation of the generic drug boom that reveals fraud and life-threatening dangers on a global scale—*The Jungle* for pharmaceuticals Many have hailed the widespread use of generic drugs as one of the most important public-health developments of the twenty-first century. Today, almost 90 percent of our pharmaceutical market is comprised of generics, the majority of which are manufactured overseas. We have been reassured by our doctors, our pharmacists and our regulators that generic drugs are identical to their brand-name counterparts, just less expensive. But is this really true? Katherine Eban’s *Bottle of Lies* exposes the deceit behind generic-drug manufacturing—and the attendant risks for global health. Drawing on exclusive accounts from whistleblowers and regulators, as well as thousands of pages of confidential FDA documents, Eban reveals an industry where fraud is rampant, companies routinely falsify data, and executives circumvent almost every principle of safe manufacturing to minimize cost and maximize profit, confident in their ability to fool inspectors. Meanwhile, patients unwittingly consume medicine with unpredictable and dangerous effects. The story of generic drugs is truly global. It connects middle America to China, India, sub-Saharan Africa and Brazil, and represents the ultimate litmus test of globalization: what are the risks of moving drug manufacturing offshore, and are they worth the savings? A decade-long

investigation with international sweep, high-stakes brinkmanship and big money at its core, *Bottle of Lies* reveals how the world's greatest public-health innovation has become one of its most astonishing swindles.

**Mergers and Acquisitions** Mark Thomas, Janna L. Rose, 2024-04-05 Covid-19 has brought so much uncertainty, but one certainty is that the vaccine race will generate winners and losers in the pharmaceutical and biotechnology industries. This will have a major impact on merger and acquisition activity. While the plethora of merger and acquisition deals are abundantly reported by the news media, there is a clear lack of in-depth analysis on the multiple rationales and various challenges in the life sciences industry. By offering contributions from a variety of experts in the biotechnology and pharmaceutical industries, as well as experts on mergers and acquisitions, this edited collection will draw upon the knowledge of a variety of different actors within the fields of pharma and biotech. This book offers a timely exploration of the complexities of mergers and acquisitions in the pharmaceutical and biotechnology industries while seeking to bridge the gap between theory and practice. It presents a critical analysis of the rationale for acquisitions and studies the challenges of ensuring a successful deal. In the light of the Covid-19 pandemic, it will also explore the impact this may have on the industry, which may further stimulate merger and acquisition activity. It will be of interest to researchers, academics, policymakers, and students in the fields of strategy, management, governance, and the biotechnology and pharmaceutical industries.

*The Moral Corporation* P. Roy Vagelos, Louis Galambos, 2006-04-03 Merck and the pharmaceutical industry are headline news today. Controversies over public safety, prices, and the ability of the industry to develop the new drugs and vaccines that society needs have been covered worldwide. Roy Vagelos, who was head of research and then CEO at Merck from the mid-1970s through the early 1990s, addresses these issues here. Success with targeted research started Merck on a path that would lead to a series of block-buster therapies that carried the firm to the top of the global industry in the 1990s and Vagelos into the top position at the company. Trained as a physician and scientist, he had to learn how to run a successful business while holding to the highest principles of ethical behavior. He was not always successful. He and his co-author explain where and why he failed to achieve his goals and carefully analyze where he succeeded.

**A Roadmap for Curing Cancer, Alzheimer's, and Cardiovascular Disease** Paul J. Marangos, 2017-04-25 Cancer, dementia, and cardiovascular disease are responsible for almost two million deaths each year in the United States alone and represent the largest immediate threat to humanity. Over the last century, we have made spectacular advances that have transformed our society – splitting the atom, space travel, telecommunications, and the Internet – but with medical research focused mostly on science for the sake of science, it has yielded precious few cures. *A Roadmap for Curing Cancer, Alzheimer's, and Cardiovascular Disease* represents a first of its kind effort to address both the reasons for this and to posit solutions to fix our broken system, in an effort to finally end this cure crisis. Dr. Marangos draws on 45 years of experience in every aspect of the biomedical R&D field, from basic drug discovery research at the NIH to the co-founding of five drug companies. He has published 252 research papers and edited four books on drug discovery, is

co-inventor on 14 patents, and founded The Journal of Molecular Neuroscience. He argues that from a development perspective, the regulatory, patent, and legal hurdles that force industry to pursue so-called me-too drugs rather than cures for terminal diseases must be re-thought. Leadership accountability, strategy, focus, and urgency need to be re-evaluated, and major reforms to the NIH, FDA, and patent codes are proposed to remedy these impediments to cures. Written for anyone frustrated with the seemingly endless threat of terminal disease, this book seeks to inform, energize, and provide the rationale for the public and industry stakeholders, as well as clinicians and researchers, to resurrect the physician-patient relationship and demand that we get serious about ridding society of this scourge on humanity. - This work contains the views and opinions of the author and are in no way intended to harm the reputation of any person, agency, organization, or commercial entity discussed herein. - First comprehensive analysis of the failures in curing cancer, Alzheimer's, and cardiovascular disease with solutions proposed Defines deficiencies in academic life science research, including conflicting incentives, QA/QC issues, and how to fix them Provides a rationale for FDA reform especially as it relates to terminal disease drugs Details how a reformed NIH, regulators, and industry can partner to form a NASA-type effort to speed cures of terminal diseases Provides the first detailed roadmap for life science researchers to conquer terminal disease

*The Antidote* Barry Werth, 2014-02-04 In this timely and much praised book, Barry Werth draws upon inside reporting that spans more than two decades. He provides a groundbreaking close-up of the upstart pharmaceutical company Vertex and the ferocious but indispensable world of Big Pharma that it inhabits. In 1989, the charismatic Joshua Boger left Merck, then America's most admired business, to found a drug company that would challenge industry giants and transform health care. Werth described the company's tumultuous early days during the AIDS crisis in *The Billion-Dollar Molecule*, a celebrated classic of science and business journalism. Now he returns to tell a riveting story of Vertex's bold endurance and eventual success. The \$325 billion-a-year pharmaceutical business is America's toughest and one of its most profitable. It's riskier and more rigorous at just about every stage than any other business, from the towering biological uncertainties inherent in its mission to treat disease; to the 30-to-1 failure rate in bringing out a successful medicine even after a molecule clears all the hurdles to get to human testing; to the multibillion-dollar cost of ramping up a successful product; to operating in the world's most regulated industry, matched only by nuclear power. Werth captures the full scope of Vertex's twenty-five-year drive to deliver breakthrough medicines. At a time when America struggles to maintain its innovative edge, *The Antidote* is a powerful inside look at one of the most intriguing and important business stories of recent decades.

**Market Restraints in the Retail Drug Industry** F. Marion Fletcher, 2016-11-11 Founded in 1921 as a separate Wharton department, the Industrial Research Unit has a long record of publication and research in the labor market, productivity, union relations, and business report fields. Major Industrial Research Unit studies as published as research projects are completed. This volume is Study no. 43.

**The Pharmaceutical Industry** Lesley Richmond, Julie Stevenson, 2017-10-05 The pharmaceutical industry has changed beyond all recognition in the past 100

years. The modern industry is constantly in the news as new breakthroughs in medical treatment are announced, often provoking ethical and social debates about the implications of new technologies. This volume facilitates the study of the industry by providing information on the present location of pharmaceutical archives. The core of the book consists of a business-by-business guide to the industry's records. Each entry includes a brief history of the company, a summary of its surviving archives and a bibliography of related publications. Similar entries exist for trade associations and schools of pharmacy associated with the industry and there are two appendices listing small collections of records held and relevant public records. The historical compendium is supplemented by three introductory essays, written by leading academics in the field, outlining the history of the industry and describing the nature and uses of the archival records which it has created. These essays are supplemented by a select chronology of pharmaceutical legislation and a select bibliography of histories relating to the pharmaceutical industry in general. A users guide helps readers understand how the business entries were constructed and is supplemented by a glossary of terms used in this book. As such, this book will no doubt prove an invaluable resource to researchers undertaking comparative studies of the pharmaceutical industry, the history of medicine and the retailing of medical drugs.

#### Mergers and Acquisitions in the Global Pharmaceutical Industry

Mennen, Abayomi, Zhou, Jian, Mead, 2010-12 Project Report from the year 2006 in the subject Communications - Public Relations, Advertising, Marketing, Social Media, grade: 65 % - B, University of Sunderland, course: Global Corporate Strategy, language: English, abstract: Mergers and acquisitions are of major importance in the pharmaceutical industry. In order to evaluate the dynamics of this particular industry, this paper critically evaluates the pre- and post- merger situation of GlaxoSmithKline concerning its ready-access to markets, know-how and management capability. Furthermore, strengths and weaknesses and merger's outcomes will be outlined. Critical push and pull factors affecting M&A activity in North America will be analysed, using Pfizer and Pharmacia as an example. In addition, general reasons for M&A failure in the pharmaceutical industry will be illustrated focussing on the M&A activity of GlaxoSmithKline. Finally, using two global pharmaceutical players (GSK and Astrazeneca), the merits and demerits of the McKinsey's five step programme will be discussed.

**Pharma and Profits** John L. LaMattina, 2022-06-01 High-level commentary on various facets of the pharmaceutical industry from a key leader in the field. This book clearly explains the value that the pharmaceutical industry offers to society which is often underreported against the more negative topic of high drug prices. It also offers an overview for drug discovery and development professionals, highlighting the challenges that such drug hunters should be aware of when developing new drugs. Case studies to illustrate topics like hepatitis C, mRNA vaccines, insulin, and price controls are included to aid in seamless reader comprehension. Written by John LaMattina, former president of Pfizer Global Research and Development and well-known speaker and writer for the pharma industry, sample topics covered and questions explored within the work include: Fiscal consequences of curing hepatitis C mRNA vaccines and the race for a cure Why the government does not deserve a piece of Biopharma's profits Paying for drugs whose ultimate value

is unknown The impact of reduced revenues on R&D This book is a must-read for biopharmaceutical professionals and executives who wish to gain high-level insight into key challenges that must be first understood, then overcome, within the pharmaceutical industry.

The Merck Druggernaut Fran Hawthorne, 2004-07-05 An in-depth look at big pharma's flagship company The Merck Druggernaut takes readers inside Merck, the world's second most profitable drug company and maker of the world's bestselling drug, Prilosec. Consistently named one of Fortune magazine's Most Admired Companies, Merck struggles to maintain its reputation for being the most ethical of the big drug makers, refusing to slash research and development budgets in the face of declining profits, falling stock market prices, and questionable accounting. Author Fran Hawthorne, one of the leading journalists covering healthcare, has written an excellent examination of a business paragon with much-needed insight on the cutthroat world of pharmaceuticals. It's a story that will interest the business world as well as consumer and healthcare advocates by detailing the vital issues in medicine and healthcare today. More than just a compelling story of success in a difficult industry, more than simply the biography of one of big business's most recognizable names, The Merck Druggernaut takes a thoughtful look at some of the major issues of our time and the way those issues intertwine with the world of business. Fran Hawthorne (New York, NY) is the Assistant Managing Editor at Crain's New York Business. She has been covering business for more than twenty years for such publications as Fortune, BusinessWeek, and Institutional Investor, with a prevailing interest in healthcare and pharmaceuticals. At Crain's, she spearheads the publication of two to three special healthcare issues per year.
