Atlas of High Resolution Infrared Spectra of Carbon Dioxide, February 1983 ,1983

AFCRL Atmospheric Absorption Line Parameters Compilation R. A. McClatchey,1973 The report describes a compilation of the molecular spectroscopic parameters for a number of infrared-active molecules occurring naturally in the terrestrial atmsophere. The following molecules are included in this compilation: water vapor; carbon dioxide; ozone; nitrous oxide; carbon monoxide; methane; and oxygen. The spectral region covered extends from less than 1 micrometer to the far infrared, and data are presented on more than 100, 000 spectral lines. The parameters included in the compilation for each line are: frequency, intensity, half-width, energy of the lower state of the transition, vibrational and rotational identifications of the upper and lower energy states, an isotopic identification, and a molecular identification. A discussion is provided separately for each molecular species, indicating the sources and accuracy of the data and a general discussion of how the data were obtained.

The Hero and the Outlaw: Building Extraordinary Brands Through the Power of Archetypes Margaret Mark,Carol S. Pearson,2001-02-06 A brand’s meaning—how it resonates in the public heart and mind—is a company’s most valuable competitive advantage. Yet, few companies really know how brand meaning works, how to manage it, and how to use brand meaning strategically. Written by best-selling author Carol S. Pearson (The Hero Within) and branding guru Margaret Mark, this groundbreaking book provides the illusive and compelling answer. Using studies drawn from the experiences of Nike, Marlboro, Ivory and other powerhouse brands, the authors show that the most successful brands are those that most effectively correspond to fundamental patterns in the unconscious mind known as archetypes. The book provides tools and strategies to: • Implement a proven system for identifying the most appropriate and leverageable archetypes for any company and/or brand • Harness the power of the archetype to align corporate strategy to sustain competitive advantage

communications problems in matlab you learn
how to be more efficient by using ready to use
algorithms and data generated with matlab and
wireless communications products
