Michael Raduga

Production Phase-Out Regina Wagner,2017-08-03 Product development and ramp-up is a well-researched challenge for industry. However, how to end the production of a product is a blind spot for industry and science although practitioners are calling for scientific support. This book sheds light on the topic of production phase-out by offering measures that can turn a process that is perceived as uninspiring to a success pillar for companies. The book reveals cross-industry insights on the relatively new topic of phase-out. The interview findings are mirrored with the Phase-Out Process Model, which describes activities and tasks to be performed during a phase-out. As an instrument to support the implementation of the process model, the Phase-Out Production Planning and Control was developed as an add-on to standard production IT support. It enables companies to better forecast spare parts needs and expected remaining stock costs at the proposed end of production. Through a qualitative and a conceptual research phase, the findings of this dissertation show that there is a high potential of improving phase-out in the industry. This manuscript provides theoretical and managerial implications to pave the way towards enhancing phase-outs. This potential can be raised by implementing the proposed formalization structures and mathematical models based on empirical and conceptual research. This book, therefore, helps to promote the effective implementation of a formalized phase-out in company's management practice to make their business more efficient.

Phase-Out J. S. Frankel,2022 For Virgil West, seventeen, student and outcast, phasing out of this existence and into another is something he's neither prepared for nor is it something he wants. An object of derision at his school, he finds himself a target due to his phase-outs. Once he leaves this Earth and lands on a world that he calls Earth Two, he encounters other people who have gone through the same ordeal. The one thing that they have in common is that they all went through the same phase-out period of time and that they were no one special. Virgil meets Jiao-jie, a Chinese girl his age. In turn, they meet some older people who have come from all walks of life. Together, they forge a new society and try to learn more about the world they're on. Life continues, but when an old enemy returns, Virgil finds out that their new Earth may not be big enough for them. The battle between good and evil, as well as survival, begins again. However, this time, only one side can win.

THE PHASE Michael Raduga,2012-12-21 The practice of phase states of the mind is the hottest and most promising pursuit of the modern age. Unlike in the past, the notions of out-of-body experience and astral projection have already lost their mystical halo, and their real basis has been studied in minute detail from the most non-nonsense approach. Now, this phenomenon is accessible to everyone, regardless of their worldview. It is now known how to easily master it and apply it effectively. It gives each and every person something that previously could only be dreamt about - a parallel reality and the possibility of existing in two worlds.

Phasing Out Lead from Gasoline in Central and Eastern Europe Magda Lovei,1997-01-01 Annotation Implementing the Environmental Action Programme for Central and Eastern Europe As a result of increasing awareness of the dangers of lead to human health and measures to tackle urban air pollution, the use of lead additives in gasoline has been declining rapidly worldwide since the 1970s. A number of countries have completely eliminated the use of lead additives in gasoline, but in Central and Eastern Europe, lead still ranks as one of the most serious and widespread environmental hazards--yet one that is relatively inexpensive to remedy. At a major international conference on the environment held in Switzerland in 1993, fifty countries endorsed the Environmental Action Programme for Central and Eastern Europe, which addressed environmental priority issues such as lead exposure. Phasing out Lead from Gasoline in Central and Eastern Europe summarizes the findings of case studies on lead phase-out as a first-step study designed to assist in the implementation of the Environmental Action Programme. It examines major sources and levels of lead exposure in the region, looks at the costs of phasing out leaded gasoline, describes progress in reducing lead exposure over the past 5-8 years, identifies human health improvements, and draws on lessons of experience from countries in the region. One of the case studies, for example, describes in detail the complete phase-out of leaded gasoline in the Slovak Republic. Although it recognizes the importance of dealing with all significant sources of lead exposure, the study focuses on lead exposure from the exhaust of vehicles using leaded gasoline.

Nuclear Terrorism and Global Security Alan J. Kuperman,2013-04-17 This book examines the prospects and challenges of a global phase-out of highly enriched uranium—and the risks of this material otherwise being used by terrorists to make atom bombs. Terrorist groups, such as Al Qaeda, have demonstrated repeatedly that they seek to acquire nuclear weapons. Unbeknownst even to many security specialists, tons of bomb-grade uranium are trafficked legally each year for ostensibly peaceful purposes. If terrorists obtained even a tiny fraction of this bomb-grade uranium they could potentially construct a nuclear weapon like the one dropped on Hiroshima that killed tens of thousands. Nuclear experts and policymakers have long known of this danger but – so far – have taken only marginal steps to address it. This volume begins by highlighting the lessons of past successes where bomb-grade uranium commerce has been eliminated, such as from Argentina’s manufacture of medical isotopes. It then explores the major challenges that still lie ahead: for example, Russia’s continued use of highly enriched uranium (HEU) in dozens of nuclear facilities. Each of the book’s thirteen case studies offers advice for reducing HEU in a specific sector. These insights are then amalgamated into nine concrete policy recommendations for U.S. and world leaders to promote a global phase-out of bomb-grade uranium. This book will be of much interest to students of nuclear proliferation, global governance, international relations and security studies.
