Katherine Philips (1631/2-1664): Printed

Publications 1651-1664 Paula Loscocco,2017-03-02

Katherine Philips was a major seventeenth-century poet and playwright who became widely known for her innovative use of Donnean poetics to express passionate female friendship, her occasional verses on private friends and public figures, and her moral and political acuity. She had the mixed fortune of being enshrined in posthumous volumes that both celebrated and misrepresented her achievement. Fortunately recent research has clarified our understanding of who Philips was and how she conducted her literary career.

Forms of Engagement Elizabeth Scott-Baumann, 2013-06-13 What does it mean for a woman to write an elegy, ode, epic, or blazon in the seventeenth century? How does their reading affect women's use of particular poetic forms and what can the physical appearance of a poem, in print and manuscript, reveal about how that poem in turn was read? *Forms of Engagement* shows how the aesthetic qualities of early modern women's poetry emerge from the culture in which they write. It reveals previously unrecognized patterns of influence between women poets Katherine Philips, Lucy Hutchinson, and Margaret Cavendish and their peers and predecessors: how Lucy Hutchinson responded to Ben Jonson and John Milton, how Margaret Cavendish responded to Thomas Hobbes and the scientists of the early Royal Society, and how Katherine Philips re-worked Donne's lyrics and may herself have influenced Abraham Cowley and Andrew Marvell. This book places analysis of form at the centre of an historical study of women writers, arguing that reading for form is reading for influence. Hutchinson, Philips, and Cavendish were immersed in mid-seventeenth century cultural developments, from the birth of experimental philosophy, to the local and state politics of civil war and the rapid expansion of women's print publication. For women poets, reworking poetic forms such as elegy, ode, epic, and couplet was a fundamental engagement with the culture in which they wrote. By focusing on these interactions, rather than statements of exclusion and rejection, a formalist reading of these women

can actually provide a more nuanced historical view of their participation in literary culture.

English Women's Poetry, 1649-1714 Carol

Barash, 1996 This study reconstructs the political origins of English women's poetry between the execution of Charles I and the death of Queen Anne. Based on extensive archival research in England and the United States, Barash argues that ideas about women's voices and women's communities were crucial to the shaping of an English national literature after the civil wars. Women entered print culture--as poets

and as women--by situating their writing in defence of embattled monarchy. In particular, Barash points to women poets' fascination with the figure of the female monarch (both real and mythic). Their sense of poetic legitimacy derives from the communities they generate around figures of female authority, particularly James II's second wife, Mary of Modena, and later Queen Anne. Writers discussed include Aphra Behn, Katherine Philips, Anne Killigrew, Jane Barker, and Anne Finch.

The Oxford Handbook of Early Modern Women's Writing in English, 1540-1700 Elizabeth Scott-Baumann, Danielle Clarke, Sarah C. E. Ross, 2022-09-22 The Oxford Handbook of Early Modern Women's Writing in English, 1540-1700 brings together new work by scholars across the globe, from some of the founding figures in early modern women's writing to those early in their careers and defining the field now. It investigates how and where women gained access to education, how they developed their literary voice through varied genres including poetry, drama, and letters, and how women cultivated domestic and technical forms of knowledge from recipes and

needlework to medicines and secret codes. Chapters investigate the ways in which women's writing was an integral part of the intellectual culture of the period, engaging with male writers and traditions, while also revealing the ways in which women's lives and writings were often distinctly different, from women prophetesses to queens, widows, and servants. It explores the intersections of women writing in English with those writing in French, Spanish, Latin, and Greek, in Europe and in New England, and argues for an archipelagic understanding of women's writing in Scotland, Wales, Ireland, and England. Finally, it reflects on—and challenges—the methodologies which have developed in, and with, the field: book and manuscript history, editing, digital analysis, premodern critical race studies, network theory, queer theory, and feminist theory. The Oxford Handbook of Early Modern Women's Writing in English, 1540-1700 captures the most innovative work on early modern women's writing in English at present.

Remote Control, 2004

Solitude and Speechlessness Andrew

Mattison, 2019-07-26 Recent literary criticism, along with academic culture at large, has stressed collaboration as essential to textual creation and sociability as a literary and academic virtue. *Solitude and Speechlessness* proposes an alternative understanding of writing with a complementary mode of reading: literary engagement, it suggests, is the meeting of strangers, each in a state of isolation. The Renaissance authors discussed in this study did not necessarily work alone or without collaborators, but they were uncertain who would read their writings and whether those readers would understand them. These concerns are represented in their work through tropes, images, and characterizations of isolation. The figure of the isolated, misunderstood, or misjudged poet is a preoccupation that

relies on imagining the lives of wandering and complaining youths, eloquent melancholics, exemplary hermits, homeless orphans, and retiring stoics; such figures acknowledge the isolation in literary experience. As a response to this isolation of literary connection, Solitude and Speechlessness proposes an interpretive mode it defines as strange reading: a reading that merges comprehension with indeterminacy and the imaginative work of interpretation with the recognition of historical difference.
