*How to Safety Rate Red Light Cameras* Donald S. Sawicki,2011-05-01 Many communities use red light cameras as a revenue source, then claim it is for safety. Some places go so far as to shorten the yellow duration forcing more drivers to run the light (more revenue, less safety and harder braking). To make matters worse many states use an unrealistic (fast) driver reaction time to determine yellow light duration. A way to safety rate a traffic stoplight (including red light cameras) is to determine potential maximum driver braking. Using a realistic driver reaction time, a realistic (objective and predictable) braking number can be determined. Using a braking g's scale (deceleration compared to acceleration due to gravity), braking g's can be used to determine (braking) safety and comparing other stoplights. How To Safety Rate Red Light Cameras explains how to determine braking g's using speed limit, yellow light duration, road grade (incline), and stop bar to clear point (usually intersection) distance. Includes a discussion of factors involved, mathematical model and proof, equations, and braking scale levels. Lookup tables (English and Metric) provided for quickly estimating braking g's. Are Stoplights in your community safe -- this book will show you how to objectively and clearly rate a stoplight.

**Right of Way** Angie Schmitt,2020-08-27 The face of the pedestrian safety crisis looks a lot like Ignacio Duarte-Rodriguez. The 77-year old grandfather was struck in a hit-and-run crash while trying to cross a high-speed, six-lane road without crosswalks near his son's home in Phoenix, Arizona. He was one of the more than 6,000 people killed while walking in America in 2018. In the last ten years, there has been a 50 percent increase in pedestrian deaths. The tragedy of traffic violence has barely registered with the media and wider culture. Disproportionately the victims are like Duarte-Rodriguez--immigrants, the poor, and people of color. They have largely been blamed and forgotten. In Right of Way, journalist Angie Schmitt shows us that deaths like Duarte-Rodriguez's are not unavoidable "accidents." They don't happen because of jaywalking or distracted walking. They are predictable, occurring in stark geographic patterns that tell a story about systemic inequality. These deaths are the forgotten faces of an increasingly urgent public-health crisis that we have the tools, but not the will, to solve. Schmitt examines the possible causes of the increase in pedestrian deaths as well as programs and movements that are beginning to respond to the epidemic. Her investigation unveils why pedestrians are dying--and she demands action. Right of Way is a call to reframe the problem, acknowledge the role of racism and classism in the public response to these deaths, and energize advocacy around road safety. Ultimately, Schmitt argues that we need improvements in infrastructure and changes to policy to save lives. Right of Way unveils a crisis that is rooted in both inequality and the undeterred reign of the automobile in our cities. It challenges us to imagine and demand safer and more equitable cities, where no one is expendable.

*Meeting SECURE* Daniel M Yulo,2023-04-18 Meeting SECURE Someone is killing dolphins, the crew of a salvage ship is found murdered after a mysterious object is salvaged from the ocean floor, a computer analyst's body washes ashore along the Potomac, and top-secret files have been downloaded from the national defense network. The FBI may have a mole and the NSA suspects the breach was an inside job. Both agencies call Anthony Star and his paramilitary investigators code named SECURE to solve the crimes. Star's investigations uncover a Korean operative who is connected to the cases. When a key suspect is killed by a car bomb, Star puts his team into high gear. Could the mysterious object that was salvaged from the ocean floor be related to a top-secret mission sixty years ago? Is there a connection between the analyst's death and the security breach? Could the Korean's be responsible or do they have a more ominous plan? With time running short, Star will need all the skills and talents of his SECURE team, together with his state-of-the-art computer system to unravel the cases and find the terrorists before a catastrophe is unleashed in Washington.

Red Light Camera Systems Cynthia Munoz,2015 Red light running is one of the major causes of crashes, deaths, and injuries at signalised intersections. The Federal Highway Administration (FHWA) and National Highway Traffic Safety Administration (NHTSA) support a comprehensive approach to intersection safety that incorporates engineering, education, and enforcement countermeasures to prevent red light running and improve intersection safety. Red light cameras can be a very effective countermeasure to prevent red light running. There are a number of studies that indicate reduction in crashes at signalised intersections due to red light cameras. The fundamental objective of the research in this book is to determine the effectiveness of RLC systems in reducing crashes. A description of all project efforts is described in this book.
