Fears and Phobias Isaac M. Marks, 2013-09-03 *Fears and Phobias* reviews and synthesizes the different viewpoints of learning theory, psychoanalysis, ethology, and clinical psychiatry with regards to fears and phobias. The causes and treatment of phobias are examined, with due regard for relevant biological and psychological issues. Topics covered range from the etiology of fear to clinical syndromes such as agoraphobic syndrome, animal phobias, social phobias, illness phobias, and obsessive phobias. Comprised of four chapters, this book begins with an overview of the historical aspects of phobias and the components of phobias, followed by a discussion on the etiology of fear. Experimental studies on fear that focus on innateness, maturation, and learning are examined, together with genetic aspects of timidity; the kinds of situations that are feared; and the physiology and learning of fear. The next chapter deals with clinical syndromes and the classification of phobic disorders such as the agoraphobic syndrome, specific animal phobias, and social phobias, along with illness phobias, obsessive phobias, autonomic equivalents to phobic disorders, and children's fears and phobias. The final chapter is devoted to prevention and treatment of phobias, including desensitization, and psychiatric management of phobic patients. This monograph will be of interest to psychiatrists and psychologists.

Scared Stiff Sara Latta,2019-08-01 Everyone knows what it is to be afraid. But phobias take the normal (and even helpful!) human emotion of fear to a much more visceral, even primal, place. For some people, it's a spider that does it. For others it's a clown, or a trans-Atlantic flight, or even just a puddle of water. It's the thing that stops us in our tracks, sets our hearts racing, and stands our hairs on end. *Scared Stiff* takes readers on a journey through these experiences—using biology, psychology, and history (not to mention pop culture) to explain where our phobias came from, how they affect us, and how we might eventually overcome them.
