Warhol-isms Andy Warhol, 2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—"In the future, everyone will be world-famous for 15 minutes." Warhol-isms separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well. I went to [a psychiatrist] once, and he never called me back. They always say that time changes things, but you actually have to change them yourself. I've never met a person I couldn't call a beauty. New things are always better than old things. I'm still a commercial artist. I was always a commercial artist.

Communication Technology Update and Fundamentals August E. Grant, Jennifer H. Meadows, 2020-06-04 Communication Technology Update and Fundamentals, now in its 17th edition, has set the standard as the single best resource for students and professionals looking to brush up on how communication technologies have developed, grown, and converged, as well as what's in store for the future. The book covers the fundamentals of communication technology in five chapters that explain the communication technology ecosystem, its history, theories, structure, and regulations. Each chapter is written by experts who each provide a snapshot of an individual field. The book also dives into the latest developments in electronic mass media, computers, consumer electronics, networking, and telephony. Together, these updates provide a broad overview of these industries and examine the role communication technologies play in our everyday lives. In addition to substantial updates to each chapter, the 17th edition includes the first-ever chapter on Artificial Intelligence; updated user data in every chapter; an overview of industry structure, including recent and proposed mergers and acquisitions; and sidebars exploring sustainability and relevance of each technology to Gen Z. Communication Technology Update and Fundamentals continues to be the industry-leading resource for both students and professionals seeking to understand how communication technologies have developed and where they are headed.

Advancing Research in Information and Communication Technology Michael Goedicke,Erich Neuhold,Kai Rannenber,2021-08-03 For 60 years the International Federation for Information Processing (IFIP) has been advancing research in Information and Communication Technology (ICT). This book looks into both past experiences and future perspectives using the core of IFIP's competence, its Technical Committees (TCs) and Working Groups (WGs). Soon after IFIP was founded, it established TCs and related WGs to foster the exchange and development of the scientific and technical aspects of information processing. IFIP TCs are as diverse as the different aspects of information processing, but they share the following aims: To establish and maintain liaison with national and international organizations with allied interests and to foster cooperative action, collaborative research, and information exchange. To identify subjects and priorities for research, to stimulate theoretical work on fundamental issues, and to foster fundamental research which will underpin future development. To provide a forum for professionals with a view to promoting the study, collection, exchange, and dissemination of ideas, information, and research findings and thereby to promote the state of the art. To seek and use the most effective ways of disseminating information about IFIP's work including the organization of conferences, workshops and symposia and the timely production of relevant publications. To have special regard for the needs of developing countries and to seek practicable ways of working with them. To encourage communication and to promote interaction between users, practitioners, and researchers. To foster interdisciplinary work and – in particular – to collaborate with other Technical Committees and Working Groups. The 17 contributions in this book describe the scientific, technical, and further work in TCs and WGs and in many cases also assess the future consequences of the work's results. These contributions explore the developments of IFIP and the ICT profession now and over the next 60 years. The contributions are arranged per TC and conclude with the chapter on the IFIP code of ethics and conduct.

The Canadian Alternative Dominick Grace,Eric Hoffman,2017-11-20 Contributions by Jordan Bolay, Ian Brodie, Jocelyn Sakal Froese, Dominick Grace, Eric Hoffman, Paddy Johnston, Ivan Kocmarek, Jessica Langston, Judith Leggatt, Daniel Marrone, Mark J. McLaughlin, Joan Ormrod, Laura A. Pearson, Annick Pellegrin, Mihaela Precup, Jason Sacks, and Ruth-Ellen St. Onge This overview of the history of Canadian comics explores acclaimed as well as unfamiliar artists. Contributors look at the myriad ways that English-language, Francophone, Indigenous, and queer Canadian comics and cartoonists pose alternatives to American comics, to dominant perceptions, even to gender and racial categories. In contrast to the United States' melting pot, Canada has been understood to comprise a social, cultural, and ethnic mosaic, with distinct cultural variation as part of its identity. This volume reveals differences that often reflect in highly regional and localized comics such as Paul MacKinnon's Cape Breton-specific Old Trout Funnies, Michel Rabagliati's Montreal-based Paul comics, and Kurt Martell and Christopher Merkley's Thunder Bay-specific zombie apocalypse. The collection also considers some of the conventionally alternative cartoonists, namely Seth, Dave Sim, and Chester Brown. It offers alternate views of the diverse and engaging work of two very different Canadian cartoonists who bring their own alternatives into play: Jeff Lemire in his bridging of Canadian/US and mainstream/alternative sensibilities and Nina Bunjevac in her own blending of realism and fantasy as well as of insider/outsider status. Despite an upsurge in research on Canadian comics, there is still remarkably little written about most major and all minor Canadian cartoonists. This volume provides insight into some of the lesser-known Canadian alternatives still awaiting full exploration.
