Based on the AHFE 2018 International Conference on Affective and Pleasurable Design, held on July 21–25, 2018, in Orlando, Florida, USA, the book provides a timely survey and inspiring guide for all researchers and professionals involved in design, e.g. industrial designers, emotion designers, ethnographers, human–computer interaction researchers, human factors engineers, interaction designers, mobile product designers, and vehicle system designers.

**Cham** David Kunzle, 2019-03-18 Cham, real name Count Amédée de Noé and a serious rival to Daumier, may have been the epitome of a célèbre inconnu, a famous unknown. He is one much deserving, at last, of this first account of his huge oeuvre as a caricaturist. This book concentrates on his mastery of the important newcomer to the field of caricature, which we call comic strip, picture story, and graphic novel. The volume features facsimiles of nearly twenty of these from 1839 to 1863 and ranging from one page to forty (this last a parody of Victor Hugo's *Les Misérables*). In addition, summaries and sample illustrations of twenty-seven "minor works" demonstrate that Cham is by far the most important specialist of what was then a new genre in Europe. Born to an ancient aristocratic family, Cham was from early on wholly dedicated to an art considered far beneath his class. Starting as a disciple of the father of the modern comic strip, Swiss Rodolphe Töpffer, Cham soon launched out on his own, evolving an original form of comedy, his own comédie humaine, farcical, absurd, and parodic. His productivity was legendary and comprised all the known genres of caricature, the full-page cartoon lithograph, the thematic seasonal group, weekly and monthly humorous comment (much like the daily newspaper cartoonist today), and a feature called the *Revue Comique*, which made him the supreme graphic journalist of his day. Hitherto unknown correspondence reveals an attractive personality who was fond of animals and who honored a low-class woman he eventually made his countess. Vaunted comics scholar David Kunzle has created a fitting tribute to Cham's impact and genius.

**How to Design Programs, second edition** Matthias Felleisen, Robert Bruce Findler, Matthew Flatt, Shriram Krishnamurthi, 2018-05-25 A completely revised edition, offering new design recipes for interactive programs and support for images as plain values, testing, event-driven programming, and even distributed programming. This introduction to programming places computer science at the core of a liberal arts education. Unlike other introductory books, it focuses on the program design process, presenting program design guidelines that show the reader how to analyze a problem statement, how to formulate concise goals, how to make up examples, how to develop an outline of the solution, how to finish the program, and how to test it. Because learning to design programs is about the study of principles and the acquisition of transferable skills, the text does not use an off-the-shelf industrial language but presents a tailor-made teaching language. For the same reason, it offers DrRacket, a programming environment for novices that supports playful, feedback-oriented learning. The environment grows with readers as they master the material in the book until it supports a full-fledged language for the whole spectrum of programming tasks. This second edition has been completely revised. While the book continues to teach a systematic approach to program design, the second edition introduces different design recipes for interactive programs with graphical interfaces and batch programs. It also enriches its design recipes for functions with numerous new hints. Finally, the teaching languages and their IDE now come with support for images as plain values, testing, event-driven programming, and even distributed programming.

**Imperial China and Its Southern Neighbours** Victor H Mair, 2016-04-29 At a time when China-Southeast Asia relationships are undergoing profound changes, it is pleasing to have a volume which examines the interactions between China and the polities and societies to the south through time. With multiple aims of exploring the relations between northern Chinese cultures and those of the south, examining the cultural plurality of areas which are today parts of Southern China, and illuminating the relations between Sinitic and non-Sinitic societies, the volume is broad in concept and content. Within these extensive rubrics, this edited collection further interrogates the nature of Asian polities and their historiography, the constitution of Chineseness, imperial China's southern expansions, cultural hybridity, economic relations, regional systems and ethnic interactions across East Asia. The editors Victor H. Mair and Liam C. Kelley are to be congratulated for bringing together such a wealth of contributions offering nascent interpretations and broad overviews, set within the overarching historical and contemporary contexts provided through Wang Gungwu's introduction.- Dr Geoffrey Wade, ANU College of Asia and the Pacific, Australian National University

**Cyber-Physical Systems: Advances in Design & Modelling** Alla G. Kravets, Alexander A. Bolshakov, Maxim V. Shcherbakov, 2019-11-25 This book presents new findings on cyber-physical systems design and modelling approaches based on AI and data-driven techniques, identifying the key industrial challenges and the main features of design and modelling processes. *Cham Sculpture of the Tourane Museum, Da Nang, Vietnam* Henri Parmentier, Paul Mus, Etienne Aymonier, 2001 The first report in this book offers an overview of Cham art with sixty-five photographs and an introductory text by the eminent French archaeologist Henri Parmentier. Originally published in 1922, this book remains one of the best introductions to the treasures preserved in the Tourane Museum in Danang. It features splendid photographs of Cham art discovered in the main areas of this long lost culture-Mi Son, Dong Duong, Khuong My, and Tra Kieu. The development of Cham art is sketched against the background of Annamese migration pushing the Cham people and their kingdom ever further south. The second part consists of two research reports. The first one by Paul Mus summarizes what is known about the religious practices of the Cham people and is based on artifacts and translated inscriptions. The author also reviews evidence from contemporary Cham culture. The religious inheritance of Champa is related to Vedic, Indian, Chinese, and Annamese forms of worship, and the significance of the Champa king as intermediary between the gods and the soil is also discussed. The second report by Étienne Aymonier contains an overview, dated 1884-85, of the religious practices, ceremonies related to veneration of divinities, marriage, birth, priesthood, death, agriculture, collection of eagle wood, and other customs of both groups of Chams, Muslims and non-Muslims, in Vietnam, and Chams in Cambodia.
