Fearless Genius Doug Menuez,2014-06-03 An award-winning documentary photographer delivers a stunning visual history of the Silicon Valley technology boom, in which he was witness to key moments in the careers of Steve Jobs and more than seventy other leading innovators as they created today's digital world. An eye-opening chronicle of the Silicon Valley technology boom, capturing key moments in the careers of Steve Jobs and more than seventy other leading innovators as they created today's digital world In the spring of 1985, a technological revolution was under way in Silicon Valley, and documentary photographer Doug Menuez was there in search of a story—something big. At the same time, Steve Jobs was being forced out of his beloved Apple and starting over with a new company, NeXT Computer. His goal was to build a supercomputer with the power to transform education. Menuez had found his story: he proposed to photograph Jobs and his extraordinary team as they built this new computer, from conception to product launch. In an amazing act of trust, Jobs granted Menuez unlimited access to the company, and, for the next three years, Menuez was able to get on film the spirit and substance of innovation through the day-to-day actions of the world's top technology guru. From there, the project expanded to include the most trailblazing companies in Silicon Valley, all of which granted Menuez the same complete access that Jobs had. Menuez photographed behind the scenes with John Warnock at Adobe, John Sculley at Apple, Bill Gates at Microsoft, John Doerr at Kleiner Perkins, Bill Joy at Sun Microsystems, Gordon Moore and Andy Grove at Intel, Marc Andreessen at Netscape, and more than seventy other leading companies and innovators. It would be fifteen years before Menuez stopped taking pictures, just as the dotcom bubble burst. An extraordinary era was coming to its close. With his singular behind-the-scenes access to these notoriously insular companies, Menuez was present for moments of heartbreaking failure and unexpected success, moments that made history, and moments that revealed the everyday lives of the individuals who made it happen. This period of rapid, radical change would affect almost every aspect of our culture and our lives in ways both large and small and would also create more jobs and wealth than any other time in human history. And Doug Menuez was there, a witness to a revolution. In more than a hundred photographs and accompanying commentary, Fearless Genius captures the human face of innovation and shows what it takes to transform powerful ideas into reality.

It's so easy to feel overwhelmed by the mixed messages of what it means to live well. Kendra Adachi, the creator of the Lazy Genius movement, invites you to live well by your own definition and equips you to be a genius about what matters and lazy about what doesn't. Everything from your morning routine to napping without guilt falls into place with Kendra's thirteen Lazy Genius principles, including: • Decide once • Start small • Ask the Magic Question • Go in the right order • Schedule rest Discover a better way to approach your relationships, work, and piles of mail. In the Shadow of Genius ,2018-11-20 Named a Gift Book for the Discerning New Yorker by The New York Times In the Shadow of Genius is the newest book by photographer and author Barbara Mensch. The author combines her striking photographs with a powerful first-person narrative. She takes the reader on a unique journey by recalling her experiences living alongside the bridge for more than 30 years, and then by tracing her own curious path to understand the brilliant minds and remarkable lives of those who built it: John, Washington, and Emily Roebling. Many of Mensch's photographs were inspired by her visits to the Roebling archives housed at Rutgers University, where she pieced together through notebooks, diaries, letters, and drawings the seminal locations and events that affected their lives. Following in their footsteps, Mensch traveled to Mühlhausen, Germany, the birthplace of John Roebling; to Saxonburg, Pennsylvania, where Roebling established a utopian community in 1831; to Roebling aqueducts and bridges in Pennsylvania, Ohio, and New York; and to the Civil War battlefield in Gettysburg, Pennsylvania, where Washington Roebling, the son of the famous engineer, valiantly served as a Union soldier. The book begins and ends with Mensch's unique photographs of the Brooklyn Bridge, including never-before-seen images captured deep within the structure. The book creatively fuses contemporary photography with the historical record, giving the reader a new perspective on contemplating the masterwork. Fernanda Perrone, Curator of Special Collections and the Roebling Family Archive at Rutgers University, has contributed a Foreword.

Capturing the Light Roger Watson,Helen Rappaport,2013-11-26 An intimate look at the journeys of two men—a gentleman scientist and a visionary artist—as they struggled to capture the world around them, and in the process invented modern photography During the 1830s, in an atmosphere of intense scientific enquiry fostered by the industrial revolution, two quite different men—one in France, one in England—developed their own dramatically different photographic processes in total ignorance of each other's work. These two lone geniuses—Henry Fox Talbot in the seclusion of his English country estate at Lacock Abbey and Louis Daguerre in the heart of post-revolutionary Paris—through diligence, disappointment and sheer hard work overcame extraordinary odds to achieve the one thing man had for centuries been trying to do—to solve the ancient puzzle of how to capture the light and in so doing make nature 'paint its own portrait'. With the creation of their two radically different processes—the Daguerreotype and the Talbotype—these two giants of early photography changed the world and how we see it. Drawing on a wide range of original, contemporary sources and featuring plates in colour, sepia and black and white, many of them rare or previously unseen, Capturing the Light by Roger Watson and Helen Rappaport charts an extraordinary tale of genius, rivalry and human resourcefulness in the quest to produce the world's first photograph.
