MacLife provides unique content that helps readers use their Macs, iPhones, iPods, and their related hardware and software in every facet of their personal and professional lives.

Amateur Movie Making Martha J. McNamara, Karan Sheldon, 2017-06-20 A compelling regional and historical study that transforms our understanding of film history, Amateur Movie Making demonstrates how amateur films and home movies stand as testaments to the creative lives of ordinary people, enriching our experience of art and the everyday. Here we encounter the lyrical and visually expressive qualities of films produced in New England between 1915 and 1960 and held in the collections of Northeast Historic Film, a moving image repository and study center that was established to collect, preserve, and interpret the audiovisual record of northern New England. Contributors from diverse backgrounds examine the visual aesthetics of these films while placing them in their social, political, and historical contexts. Each discussion is enhanced by technical notes and the analyses are also juxtaposed with personal reflections by artists who have close connections to particular amateur filmmakers. These reflections reanimate the original private contexts of the home movies before they were recast as objects of study and artifacts of public history.

The Trial Presentation Companion: A Step-By-Step Guide to Presenting Electronic Evidence in the Courtroom Shannon Lex Bales, 2018-06-21 Defendant Reginald McKay, a mentally disturbed American who became a home-grown Islamic terrorist, poisoned members of a Jewish temple during Passover seder. After one of the The Trial Presentation Companion: A Step-by-Step Guide to Presenting Electronic Evidence in the Courtroom, written by award-winning legal technologist Shannon Lex Bales, is NITA's first-ever, comprehensive how-to manual on running electronic evidence in the courtroom. This face-saving guide will help you and your firm expand your comfort zone in working with all the bits and pieces--laptops, trial presentation software, document cameras, audio-visual components, the puzzling array of cords and cables--that are increasingly essential when presenting electronic evidence in court in the modern era. Checklists and guides are included to help your firm create a technology plan for trial and recognize where opposing firms may attempt less-than-reputable technical tactics, such as burden shifting, to throw a monkey wrench in your trial plan. For the judiciary, the book presents a warts-and-all view of trial technology and discusses reasonable presentation obligations by firms to the court and how the court can ensure more efficient technological processes and fewer problems in the courtroom. Part One, Trial Presentation in Theory, is just that: a theoretical explanation, in plain (and often tongue-in-cheek) English, about why expert trial technologists do what they do during pretrial and in court: how to organize and name exhibit files, choose the best software for your needs, build a trial kit of equipment to take to court, comply with the Trial Management Order, develop an effective workflow, cultivate relationships that provide mutual support in court and out, and much more. Part Two, Trial Presentation in Practice, shows you, step by illustrated step, how you, too, can bring that same game to your own legal team as you huddle for trial. Even if you don't know an HDMI port from a VGA and have never set up a folder system on your server before, The Trial Presentation Companion will show you how, and before you know it, you'll be running the show like you were born to it. This book is suitable for everyone from judges and law firm partners and associates to law students, budding trial technologists, and paralegals.

3D Movie Making Bernard Mendiburu, 2012-12-06 Hollywood is going 3D, read this book to understand why and how, and to secure your next job on a 3D movie. Making a 3D movie is much more than shooting with a 3D camera and showing it in a 3D theater. Each and every step of the movie production cycle will be affected by 3D, just like sound and color affected the whole industry. After an introduction on how the human brain perceive depth, this book explains, in a step-by-step approach, how 3D affects screen writing, art direction, principal photography, editing, visual effects and even movies distribution. It's a must read for anyone in the profession who wants to understand the next revolution in cinema. The DVD is not included with the E-book. Please contact the publisher for access to the DVD content by emailing d.mcgonagle@elsevier.com.

**Family Nibbles - Volume 7** Mark Jarvis, Family Nibbles - Volume 7, Stories of Our Jarvis Ancestors 1920-1938 is a compilation of stories from the blog site familyníbbles.com. These stories include genealogy research on one line of Jarvis in Kansas. This volume is about the lives of Ralph and Chleo Jarvis and their family. They were in their prime in the 1920s and 1930s. They got

married, worked, and raised a family. The book is also about Nathan L. Jones, the visionary mentor to Ralph Jarvis. Jones provided Jarvis with opportunities, and Ralph Jarvis took advantage of them. This book is about the Roaring Twenties and the Great Depression. These two decades saw the best of times and the worst of times. Finally, this book is about the modernization of American life. It was the age of the automobile, radio, and telephone. Perhaps most important, it was the age of electricity, bringing light and electric appliances into the homes of ordinary people.
