Simone M. Müller, May-Brith Ohman Nielsen

Rewrite Gregory Benford, 2019-01-15 In this thematic sequel to Gregory Benford's award-winning bestseller *Timescape*, a history professor finds that he is able travel back to 1968, the year he was sixteen—here, he finds a slew of mentors with the same ability, including Robert Heinlein, Albert Einstein, and Philip K. Dick and becomes a successful Hollywood screenwriter until some wicked time travelers try to subvert him. It's 2002, and Charlie, in his late forties, is a bit of a sad-sack professor of history going through an unpleasant divorce. While flipping the cassette of an audiobook he gets into a car accident with a truck, and wakes up, fully aware as his adult mind, in his sixteen-year-old body in 1968. Charlie does the thing we all imagine: he takes what he remembers of the future and uses it for himself in his present, the past. He becomes a screenwriter, anticipating the careers of Francis Ford Coppola and Steven Spielberg, and then, in a 1980s life of excess, he dies, and wakes up again in his bedroom at sixteen in 1968. Charlie realizes things he didn't see the first time: that there are others like him, like Albert Einstein, Philip K. Dick, Robert Heinlein. In fact, there is a society of folks who loop through time to change the world for their agenda. Now, Charlie knows he has to do something other than be self-indulgent and he tries to change one of the events of 1968 in this clever thriller.

Timescape Timescape, 1980-09-08

Timescape Gregory Benford, 2000 The year is 1998, the world is a growing nightmare of desperation, of uncontrollable pollution and increasing social unrest. In Cambridge, two scientists experiment with tachyons - subatomic particles that travel faster than the speed of light and, therefore, according to the Theory of Relativity, may move backwards in time. Their plan is to signal a warning to the previous generation. In 1962, a young Californian scientist, Gordon Bernstein, finds his experiments are being spoiled by unknown interference. As he begins to suspect something near the truth it becomes a race against time - the world is collapsing and will only be saved if Gordon can decipher the message in time. Winner of the Nebula Award for best novel, 1980 Winner of the John W. Campbell Award for best novel, 1981 Winner of the BSFA Award for best novel, 1980

Eye on Infinity : timescape 817 Michael Ruetz, 2008 For more than 20 years Michael Ruetz photographed one landscape scene, a peaceful panorama of a mountain range, from the same point of view. In spring in the clearest sunlight and during thunderstorms under darkening clouds, at the cusp of a New Year and on quiet clear, starry nights, at twilight in murky fog, this apparently never-changing landscape has many faces. Ruetz's patient observation and focus on unchanging repetition reveals the singularity of the photographic moment. *Eye on Infinity* lets the eye linger without end. Michael Ruetz, born in Berlin in 1940, completed his studies in Sinology and then turned to photography. He spent 13 years abroad and, until 2005, he was a professor for Communication Design at the Braunschweig University of Art (Hochschule für Bildende Künste). He has been awarded the Otto Steinert Prize, the Villa Massimo Prize, and the Ordre des Arts et des Lettres in Paris. Ruetz is a member of the Academy of the Arts, Berlin. Steidl has published his books *Sichtbare Zeit*, *Das Willy-Brandt-Haus*, *Bibliothek der Augen*, *Cosmos*, *WindAuge*, *Eye on Time* and *Die unbequeme Zeit*

Timescape Robert Liparulo, 2010-11-29 Which door would you go through to save the world? David, Xander, and Toria King never know what new adventures—and dangers—await them beyond the mysterious portals hidden on the top floor of their new house. They have battled gladiators and the German army, dodged soldiers on both sides of the Civil War, and barely escaped a fierce attack in their own home. Still they are no closer to finding their mother, who was pulled by powerful forces through a portal and lost in time. Their only hope is to turn the tables on Taksidian, the menacing stranger who wants them out of the house so he can use it for his own twisted purposes. But everything changes when a trip into the near future reveals the devastating outcome of Taksidian's schemes—a destroyed city filled with mutant creatures. It is only then that the Kings realize what they're really fighting for—the fate of humanity itself. "If you like creepy and mysterious, this is the house for you! Every room opens a door to magic, true horror, and amazing surprises. I loved wandering around in these books. With a house of so many great, haunting stories, why would you ever want to go outside?" —R.L. Stine, bestselling author of the *Fear Street* and *Goosebumps* series

Toxic Timescapes Simone M. Müller, May-Brith Ohman Nielsen, 2023-01-17 An interdisciplinary environmental humanities volume that explores human-environment relationships on our permanently polluted planet. While toxicity and pollution are ever present in modern daily life, politicians, juridical systems, media outlets, scholars, and the public alike show great difficulty in detecting, defining, monitoring, or generally coming to terms with them. This volume's contributors argue that the source of this difficulty lies in the struggle to make sense of the intersecting temporal and spatial scales working on the human and more-than-human body, while continuing to acknowledge race, class, and gender in terms of global environmental justice and social inequality. The term toxic timescapes refers to this intricate intersectionality of time, space, and bodies in relation to toxic exposure. As a tool of analysis, it unpacks linear understandings of time and explores how harmful substances permeate temporal and physical space as both event and process. It equips scholars with new ways of creating data and conceptualizing the past, present, and future presence and possible effects of harmful substances and provides a theoretical framework for new environmental narratives. To think in terms of toxic timescapes is to radically shift our understanding of toxicants in the complex web of life. Toxicity, pollution, and modes of exposure are never static; therefore, dose, timing, velocity, mixture, frequency, and chronology matter as much as the geographic location and societal position of those exposed. Together, these factors create a specific toxic timescape that lies at the heart of each contributor's narrative. Contributors from the disciplines of history, human geography, science and technology studies, philosophy, and political ecology come together to demonstrate the complex reality of a toxic existence. Their case studies span the globe as they observe the intersection of multiple times and spaces at such diverse locations as former battlefields in Vietnam, aging nuclear-weapon storage facilities in Greenland, waste deposits in southern Italy, chemical facilities along the Gulf of Mexico, and coral-breeding laboratories across the world.

Shadow of a Mouse Donald Crafton, 2012-11-05 "Donald Crafton, our lively guide, shows us around a Tooniverse populated by performers, not just images, who engage us in all the ways their flesh-and-blood counterparts do, and then some. Taking classical animation as his terrain, Crafton nevertheless pushes ongoing discussions of performance, liveness, and corporeality in the directions in which they need to go if they are to help us describe and navigate our increasingly virtual worlds." Philip Auslander, author of *Liveness: Performance in a Mediatized Culture* Every once in a while a book comes along that marks a transformational point in its discipline. Such a book is Donald Crafton's *Shadow of a Mouse*. Crafton skillfully draws together theoretical sources, animation history, technological development, and social analysis, deftly weaving together thinkers from Disney to Deleuze and Sato to Stanislavsky. The result is a substantial rethinking of animation that will reshape traditional approaches to the medium. Crafton's magisterial grasp of theory and history is livened by a true fan's passion for the subject and a keen sense of humor. *Shadow of a Mouse* is a must-read for anyone with an interest in performance, embodiment, popular culture, race, or reception. Fire and Ice Joan Myers,2015 Gathers volcanoes photographs of iconic sites from all over the world, including Volcano National Park on the island of Hawai'i, Lanzarote, in the Canary Islands, Cotopaxi and Picincha in Ecuador, Nevada del Ruiz in Colombia, Mt. Erebus in Antarctica, Krakatoa in Indonesia and of course Mt. Etna and Pompeii. The work is breathtakingly beautiful, compelling and provocative by turns. Her essay reads like an adventure story, exploring the connection between fire and ice while describing her thrilling treks to ends of the Earth.

Digital Timescapes Rob Kitchin,2023-01-16 Digital technologies are having a profound effect on the temporalities of individuals, households and organisations. We now expect to be able to instantly source a vast array of information at any time and from anywhere, as well as buy goods with the click of a button and have them delivered within hours, while time management apps and locative media have altered how everyday scheduling and mobility unfolds. Digital Timescapes makes the case that we have transitioned to an era where the production and experience of time is qualitatively different to the pre-digital era. Rob Kitchin provides a synoptic account of this transition, charting how digital technologies, in a wide range of manifestations, are reconfiguring everyday temporalities. Attention is focused on the temporalities associated with six sets of everyday practices: history and memory; politics and policy; governance and governmentality; mobility and logistics; planning and development; and work and labour. Critically, how to challenge and reorder digitally mediated temporal power is examined through the development of an ethics of temporal care and temporal justice. Conceptually and empirically rich, Digital Timescapes is an essential guide to our new temporal regime. It will be of interest to students and scholars of Media Studies, Science and Technology Studies, Sociology, Anthropology, Human Geography, and History and Memory Studies, as well as those who are interested in how digital technologies are transforming society.

Pre-Production Planning for Video, Film, and Multimedia Steve Cartwright, 2012-08-21 The key to a project's ultimate success is good planning. This unique new book shows how to prepare for the myriad of steps required to execute production and post production of a video, film or multimedia project. Cartwright explains in detail how to save money and time in production and post-production, yet produce a quality program with high production values. The craft of production planning is explained through a comprehensive system. The production steps are all there, enhanced with graphs of the production process, production forms, photos and a comprehensive list of production resources along with a chapter devoted to the use of computers for the production and post-production process. The techniques of planning for success are easily applied to both traditional linear program development to interactive multimedia development for all types of programs, including communications, training, marketing, corporate news and teleconferencing. *Pre-Production Planning for Video, Film and Multimedia* also includes 30 planning, production and post-production forms that can be accessed on an accompanying complimentary disk (for both IBM compatibles or Mac). Steve R. Cartwright is president of Cartwright & Associates, a training and communications company, and co-owner of the Motion Graphics Company, a computer graphics and animation firm. A leading producer, consultant and instructor, Cartwright is author of *Training with Video* and *Secrets of Successful Video Programs*.
