**Waterbook** Maureen Janson Heintz, 2013-09-01 We often see the big picture in a landscape and don't take time to look at detail. These photo images of open water depict some details as well as movement that can be so mesmerizing! Certain spots on the water that might not otherwise stand out, are isolated here. Like paintings, these photos can evoke emotional response, inner reflection, or appreciation for the beauty that surrounds us.

**The Water Walker** Joanne Robertson, 2021-05-18 The story of a determined Ojibwe Grandmother (Nokomis) Josephine-ba Mandamin and her great love for Nibi (water). Nokomis walks to raise awareness of our need to protect Nibi for future generations, and for all life on the planet. She, along with other women, men, and youth, have walked around all the Great Lakes from the four salt waters, or oceans, to Lake Superior. The walks are full of challenges, and by her example Josephine-ba invites us all to take up our responsibility to protect our water, the giver of life, and to protect our planet for all generations.

**The Reflective Powers of Water as Visual Alchemy** Marques Vickers, 2015-07-28 "The Reflective Powers of Water as Visual Alchemy" is California artist Marques Vickers photographic edition of over 120+ images of inverted and reflective objects created by water exposure. The diverse photo sequence was captured through various bodies of water and fountains throughout northwestern Washington State. FROM THE PREFACE: The transparency properties of water create magical illusions for reflective and submerged objects. Their reappearance creates inverted shapes and forms resembling non-objective artwork. Water based distortions become variations of substance and shadow resembling visual alchemy. Though water appears crystalline, in truth its instinctive properties are a slightly bluish hue. The accentuated surface tension diffuses and redistributes color seemingly random and erratically. The interaction between deconstructed color created layers of overlap suggesting a deepened texture. Alchemy in its purest form is the ability to transmute base metals into noble and precious derivatives such as gold. The practice of western alchemy dates back to ancient Egypt with the city of Alexandria as its capital. Islam and Asian based religions embraced the shadowy art from their earliest inception. This ancient transformation of base metals symbolically assumed a spiritual dimension as an elixir of life. In the context of water reflection, linear shapes are restructured into abstractions and curvatures. Objects are liberated from their fixed matter and reshaped into fluid forms lacking edge and definition. The decline of alchemy as an established practice was facilitated in the early eighteen century by the rise and acceptance of modern scientific methodology. Ancient spirituality and mysticism were displaced by experimentation and quantitative comparison. Chemistry universally replaced the role of alchemy. There remains a space for interpretive alchemy when one views the unlocked reflections stimulated by water. Restructuring matter becomes as mystical as water transforming into vapor under extreme heat. Does not life resemble a vapor? demands the poet. There is room for suspending concrete imagery and structured color each time we view the reflective and distorting properties of water. The results create stunning and unimaginable imagery.

**Majestic Reflections** Ed Siarkowicz, 2021-09-13 11x11 Hardcover with lay-flat binding. It is a collection of 23 impressionistic water reflection color images captured by photographer Ed Siarkowicz while being mentored by Pierre

Henri Matisse - grandson of French master Henri Matisse. The project was documented by photographer John Olivo between 2015 and 2019.

*Scenic Photography 101* Kerry Drager, 1999 Provides beginning and experienced photographers techniques for enhancing outdoor shots, whether city views or historic or people, and includes tips on creating compelling photographs from ordinary scenes using camera features.

*How to Photograph Water* Heather Angel, 1999 Provides advice on how to capture water on film, discussing equipment, films, lighting, and exposure; looks at the special considerations of photographing water in its various states; and features a portfolio of water photographs by Heather Angel.

**Reflections** Connie Imboden, 2009-03-17 Reflections examines 25 years of work from one of the world's most preeminent surrealist and figurative photographers. Known for her experiments with light and underwater photography, Imboden's images observe the human body in otherworldly instances: distortions caught between the reflected light on the glassy surface of water, submerged and weightless forms emerging from dark depths, or wrapped bodies repelled outward freeing themselves from static surroundings. Imboden's strange and beautiful images are amazing works of skill, craftsmanship, and vision. Using only real settings and darkroom development, her work seems impossible without the augmentative measures of digital post-production, but as Imboden put it, her intention has always been to explore the body, not alter it. Avoiding a didactic approach, Imboden leaves interpretation of her images to the individual. Imboden's most pivotal and defining photographs have been selected - by the artist herself - from an immense canon of work for Reflections.

*Spatio-Temporal Image Processing* Bernd Jähne, 1993-11-10 Image sequence processing is becoming a tremendous tool to analyze spatio-temporal data in all areas of natural science. It is the key to study the dynamics of complex scientific phenomena. Methods from computer science and the field of application are merged establishing new interdisciplinary research areas. This monograph emerged from scientific applications and thus is an example for such an interdisciplinary approach. It is addressed both to computer scientists and to researchers from other fields who are applying methods of computer vision. The results presented are mostly from environmental physics (oceanography) but they will be illuminating and helpful for researchers applying similar methods in other areas.

**A Mirror to Nature** Jane Yolen, 2019-03-12 Jane Yolen and Jason Stemple join forces again in this new winning combination of poems and photos. Water possesses reflective qualities, creating fascinating patterns and doubled images that allow us to see things in new ways. Celebrated writer Jane Yolen and photographer Jason Stemple capture these natural beauties in twelve thoughtful poems and breathtaking pictures in this winner of the John Burroughs Nature Books for Young Readers Award. Watery reflections provide an appropriate backdrop for Jane's musings on nature, such as a raccoon swimming with his reflected self, the water-jagged legs of a snowy egret, and the double danger of a hungry alligator at the edge of a swamp. Jason's photographs offer whimsical peeks at the natural world we rarely chance to see. This artistic collaboration gives readers a unique opportunity to contemplate their world.

*Picture Perfect Practice* Roberto Valenzuela, 2012 The author presents his advice and practice routines for composing and capturing photographs of people, illustrated with examples from his own practice sessions and from his extensive work photographing weddings around the world.

*Adobe Photoshop Elements 11 for Photographers* Philip Andrews, 2012-12-26 Philip Andrews covers every feature and function of Adobe Photoshop Elements 11, such as importing files, performing simple image edits, creating scrapbooks, making panoramas, working with raw files, and much more.

*Elephant Reflections* Dale Peterson, 2023-12-22 Elephant Reflections brings award-winning wildlife photographer Karl Ammann's gorgeous images together

with a revelatory text by writer Dale Peterson to illuminate one of nature's greatest and most original works of art: the elephant. The photographs move from the purely aesthetic to the informative, depicting animals who are at once enigmatic, individual, mysterious, elusive, and iconic. In riveting prose, Peterson introduces the work of field scientists in Africa and explains their recent astonishing discoveries. He then explores the natural history and conservation status of African elephants and discusses the politics of ivory. *Elephant Reflections* is a book that could change the way the world thinks about elephants while we still have some measure of control over their fate.
