for years now. In my opinion, you need three things to get started taking great photo's with these cameras. First is the camera itself. Second, the manual that came with it. And third, this book! I remember my first DSLR and the problems I had understanding the manual. Well, for a start, why did I need to set the ISO number? This thing didn't even use film, did it? Setting F numbers, aperture and shutter times also confused me. I spent a lot of time looking terms up on the Internet, trying to find an explanation that I could understand. If I had this book then, it would have saved me a great deal in both time and frustration. Camera manufacturers could do a great deal worse than include a copy of this book along with their own manual with the camera. Camera stores should offer it for sale alongside the cameras. If you are looking to break into DSLR photography, make sure you buy this book first. It will make your life, and your photos much better. Highly recommended!-----
