Goals in Space William Sims Bainbridge,1991-01-01 Goals in Space draws upon a detailed sample of 4,000 Americans to discover what values this society attaches to the space program. Systematic survey procedures identify 125 specific goals of the space program, and Bainbridge examines how these represent the perceived general values of spaceflight, including economic, industrial, environmental, social, spiritual, emotional, and military benefits. While the most popular justifications for spaceflight offered immediate gain for the current society, many Americans have a clear image of the revolutionary transformations that spaceflight may accomplish in the long run, notably colonization of the solar system. The findings of this study clarify the ideological bases for space technology and set the terms for the future debate on investment in space exploration.

Adventure and Extreme Sports Injuries Omer Mei-Dan,Mike Carmont,2012-11-13 Adventure and extreme sports are increasing in popularity and it is not surprising that commercial adventure tourism and the accompanying life style and fashion, have become increasingly important to world economy. These unique sports involve not only major physical endurance and mental challenges but interaction and bonding with nature. They also tend to attract and excite audiences, both at the event and in the media. They are exciting to watch and redraw the boundaries of human achievement with the accompanying risks of injury and death. Adventure sports are usually performed in beautiful, exciting and remote locations or in extreme environments far away from medical assistance. Extreme sports usually involve an element of increased risk. These risks are highlighted by the media, usually after a reported accident or fatality but may vary according to the involvement of the participant; the weekend recreational adventure sports athlete or the experienced professional. A wide variety of sports fall into the category of adventure and extreme sports and with an increasing number of disciplines, this field is ever expanding. Sports are performed in contact with the "ground"; mountain running and biking, rock climbing, ice climbing and mountaineering. In the air: skydiving and base jumping. On water: surfing, white water kayaking and rafting, board sailing and diving. And also involve mechanical vehicles and animals! Some sports may be performed as a combination of few disciplines, such as water and air, e.g. kite surfing, and as so involve very unique mechanisms of injury. Sports events can also be merged to form a multi-sport race comprising many disciplines

lastly from single to multi day races. Sports may involve competition with others, against the environment or with oneself, frequently the most ferocious adversary. Adventure sports are becoming increasingly popular in the general public and a few take these sports to an extreme level with the accompanying risks. Those that do, bring such time and dedication that they become professional in terms of training, preparation and finance. More and more people are enjoying adventure sports and unfortunately increased numbers are becoming injured as a result. Future research is progressing alongside the sport development, to allow the sport mechanisms, injury patterns and predisposing factors to be better understood. It is the hope of all researchers to make the sports safer without detracting from their adventurous nature. The aim and scope of our book would be to bring the sports medicine involved in each of these sports into one volume. We would explain each sport including subtle similarities and differences, the common injury mechanisms, patterns of injury and treatment options. Additional chapters would include the mental characteristics of adventure racers and extreme sports athletes, together with the complexities of competing in hot and cold extreme environments. The book will present chapters focussing on the sports listed below, concentrating on published literature and newly formed studies by experts in the fields of injury epidemiology, prevention, management and rehabilitation.

Unseen Darkness Selina Sra,2014-02-10 A true story of a police woman whose colleagues allegedly ostracized her, compiled a dossier of false or misleading allegations against her and delayed coming to her aid in potentially dangerous situations leaves her in tears. Falling behind the race - Claire Dyer - The Guardian Unseen Darkness - the incredible story of the most amazing inspirational beautiful female who against all odds, finds magic and treasures, and demonstrates the true meaning of a free spirit. Asian Times Unseen Darkness, we shared a bond that endured everything from childhood experiences to adult intimacies of pain and pleasure, she's a goddess, a woman of beauty, sexuality, a mirror of me, I saw a woman, and a lady thrive to be a free spirit, turn to an angel of inspired sexuality. Madame - Monica Lang EXOTICA Policewoman, dominatrix, mistress to a London gangster, Unseen Darkness is the inspirational, true-life story of a woman rejected by her family in childhood and forced to agree to an arranged marriage, who simply will not give up, whose instinct even in her darkest hour is to fight. The writing has an intensity and authenticity derived from direct experience that few other books of this kind possess. Candid, heartbreaking and at times shocking for all readers. This is a roller coaster ride that once on, you cannot get off. Alan Denman, writer/director
