### **Jamey Aebersold's Jazz Ear Training: Book & 2**

**CDs** Jamey Aebersold, 2015-02 Jamey Aebersold's Jazz Ear Training is a no-nonsense approach consisting of two hours of recorded ear training exercises with aural instructions before each. It starts very simply, with intervals and gradually increases in difficulty until you are hearing chord changes and progressions. All answers are listed in the book, and contains transposed parts for C, B-flat, and E-flat instruments to allow playing along. Beginning to advanced levels.

**Education for Absolute Pitch** Naoyuki Taneda, Ruth Taneda, 2005-01-01 PART OF THE WE HEAR AND PLAY SYSTEM. Ruth and Naoyuki Taneda have taught music to children for more than 30 years. In this handbook, they show how it is possible to develop absolute pitch (also known as perfect pitch) in small children, giving them a skill previously thought of as an innate privilege of only especially gifted musicians. The authors discuss the myths related to absolute pitch, and they describe the effects of absolute pitch on a child's musical upbringing. In the process, they present a new style of instrumental instruction.

*Hearing and Writing Music* Ron Gorow, 2011-03-15 A self-training manual as well as a classroom text, this book is a complete step-by-step course to develop the musician's ability to hear and notate any style of music. Personal training, theory and exercises produce techniques which are combined in an integrated craft which may be applied to composition, orchestration, arranging, improvisation and performance. A kind of finishing

school for those who wish to pursue a career in composing, orchestrating, arranging or performing. -- The Score, Society of Composers and Lyricists A myriad of practical information. Comprehensive ear training, important because aural skills are among the most overlooked in music education. -- Survey of New Teaching Materials, Jazz Educators journal A synthesis of the author's vast knowledge and his quest to define the question, How do we hear? -- ITG Journal A wonderfully systematic approach to ear training . . . neatly designed and structured, it just flows. Direct and easily understood. -- New books, Jazz Educators Journal Bernard Brandt says: Hearing and Writing Music, by Ron Gorow, is a superb book. It makes a simple and elegant presentation of the internal process by which we hear sounds and music, how we recognize intervals, chords, melody, harmony, counterpoint, and the timbre of instrumentation/ orchestration, how we can develop the skills of listening, auditory memory and imagination, and how to use these skills to hear and to write down music of any sort. The hallmark of an expert is the ability to explain the basics of his field as simply as possible. By that standard, Mr. Gorow has proven his expertise in this book. I note that the other reviews, both for Amazon and in musical journals, tend to limit the importance of Hearing and Writing Music to ear training. I believe that Mr. Gorow's book is valuable for much more than ear training. I have studied it, and as a result of that study, I believe that my auditory memory and imagination and my abilities in score reading have improved enormously. Further, I have been able to

use the skills in this book to transcribe melodies, harmonies and counterpoint almost effortlessly, both those that I have heard, and those which existed only in my imagination. This book has opened many doors for me. I believe that it can do so for many others.

The Rancer Method is presented as page-by-page instructions to be implemented with readily-available method books so that every piano teacher can follow it and do well by their students. **Musicophilia** Oliver Sacks, 2010-02-05 What goes on in human beings when they make or listen to music? What is it about music, what gives it such peculiar power over us, power delectable and beneficent for the most part, but also capable of uncontrollable and sometimes destructive force? Music has no concepts, it lacks images; it has no power of representation, it has no relation to the world. And yet it is evident in all of us—we tap our feet, we keep time, hum, sing, conduct music, mirror the melodic contours and feelings of what we hear in our movements and expressions. In this book, Oliver Sacks explores the power music wields over us—a power that sometimes we control and at other times don't. He explores, in his inimitable fashion, how it can provide access to otherwise unreachable emotional states, how it can revivify neurological avenues that have been frozen, evoke memories of earlier, lost events or states or bring those with neurological disorders back to a time when the world was much richer. This is a book that explores, like no other, the myriad dimensions of our experience of and with music.
