Sight Reading: Piano Music for Sight Reading and Short Study, Level 9 Keith Porter-Snell, 2020-01-07 The Sight Reading series is a valuable new addition to the Neil A. Kjos Piano Repertoire Library. As they say, You learn to sight read by doing it! This series includes piano music of various textures and styles to be used to improve student sight reading, as well as overall reading skills beginning at the elementary level. The series is useful as a supplement to any course of study and includes original music by Diane Hidy (Prep. to Level 1) and Snell editions of works (Levels 2 to 4) by composers of the 17th through early 20th centuries. The works are brief enough for students to quickly read during their practice. They are also useful as short study pieces that can be practiced, but only for a few days, or at most a couple of weeks. The music is not intended for performance, but rather to improve students' ability to learn new music quickly and efficiently. - Publisher.

300 Progressive Sight Reading Exercises for Piano Robert Anthony, 2015-01-29 First and foremost: THIS IS NOT A METHOD BOOK. It is precisely what it says it is: 300 Progressive Sight Reading Exercises! Volume One is comprised of 300 progressive eight-bar exercises that train reading skills for both hands equally: Half of the pieces emphasize the right hand, the other half emphasize the left. The first 32 exercises isolate the hands while the remaining exercises combine them. For most of the exercises, the de-

emphasized hand stays within a single five-finger position. Time signatures include 4/4 (Common Time), 3/4, 2/4, 6/8, and 2/2 (Cut Time). This entire first volume is in C Major or its relative modes. Key signatures, accidentals, dynamics, tempo, and expressive markings will be covered in future volumes. All of the exercises are eight measures long. If one has done any study of formal analysis, they will find that eight measures is a typical 'period' of music and usually contains two, four-bar phrases (also typical in length). For example, many sonatinas, jazz standards, and pop songs use 32 Bar Form (A A B A), Binary Form (A B), and Ternary Form (A B A), with each section often being eight bars. Thus, eight measures (one period of music) makes the perfect length for sight-reading studies, in my opinion. Various strategies to using this book may be implemented. With my students, I start toward the beginning and zig-zag through the book, skipping the appropriate number of pages to make it into the more challenging sections. The further they are in the book, the more we skip. This approach prevents the student from memorizing the exercises, allowing for them to remain useful. Note: Although Amazon has classified this book as large print, there is also a LARGE PRINT version (much larger print) that for printing purposes had to be divided into two books, and is clearly marked on the cover and in the title. If you have poor vision or want this book to be easier to SEE on an electronic device, you might prefer the LARGE PRINT Version. These books differ from conventional 'methods' in that technical and theoretical

instructions have been omitted, in the belief that these are more appropriately left for the teacher to explain to the student. - Bela Bartok, Mikrokosmos. I whole-heartedly agree with Bartok's sentiment and if music teachers would ask their students what they like least (or hate the most) about typical lessons, it is the method books that win this contest EVERY TIME. I have completely eliminated method books from my own teaching practice and have much happier and more productive students than ever. While this book is intended to train sight-reading skills, it may also be used by beginners or those new to reading to acquire basic reading skills, but it assumes one either has a teacher or can at least find C on their instrument. It starts at a very basic level (only three notes) and adds a new note, rhythm, or concept every four exercises and thoroughly reinforces them throughout the rest of the book. Next, the music's composition is a slave to its function: The purpose of the books is to train reading skill, and the exercises keep challenging the range that has been established by previous exercises as well as less-than-convenient intervallic skips. They are composed from a 'music-first' perspective, as opposed to an 'instrument-first' perspective, and are purposely composed to be difficult to memorize. For example, the first exercises begin on C because they are in the key of C, and then go on to sometimes start and end on different scale degrees of the same key. Those familiar with the Fundamental Modes will likely recognize what they are hearing, but those unfamiliar with these modes will likely be hearing

something that sounds a bit different, or odd, until their ears acclimate to these sounds. I see many students go through this process with altered dominants and augmented triads as well.
