Ask a Manager Alison Green, 2018-05-01 From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called “the Dear Abby of the work world.” Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit “reply all” • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager “A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work.”—Booklist (starred review) “The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience.”—Library Journal (starred review) “I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor.”—Robert Sutton, Stanford professor and author of The No Asshole Rule and The Asshole Survival Guide “Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way.”—Erin Lowry, author of Broke Millennial: Stop Scraping By and Get Your Financial Life Together

Managing Organizational Deviance Roland E. Kidwell, Christopher L. Martin, 2005 The success of an organization may be dependent on limiting the potential for deviant behavior, and if necessary, reacting to deviant behavior in a positive way. Managing Organizational Deviance goes beyond questions of control to also consider ethical dimensions of conduct. As a result, it teaches students who will go on to inhabit organizations to become familiar with the ethical implications of deviant and dysfunctional behavior in addition to managing this behavior in an effective way.

Left Brain, Right Stuff Phil Rosenzweig, 2014-01-07 Left Brain, Right Stuff takes up where other books about decision making leave off. For many routine choices, from shopping to investing, we can make good decisions simply by avoiding common errors, such as searching only for confirming information or avoiding the hindsight bias. But as Phil Rosenzweig shows, for many of the most important, more complex situations we face—in business, sports, politics, and more—a different way of thinking is required. Leaders must possess the ability to shape opinions, inspire followers, manage risk, and outmaneuver and outperform rivals. Making winning decisions calls for a combination of skills: clear analysis and calculation—left brain—as well as the willingness to push boundaries and take bold action—right stuff. Of course leaders need to understand the dynamics of competition, to anticipate rival moves, to draw on the power of statistical analysis, and to be aware of common decision errors—all features of left brain thinking. But to achieve the unprecedented in real-world situations, much more is needed. Leaders also need the right stuff. In business, they have to devise plans and inspire followers for successful execution; in politics, they must mobilize popular support for a chosen program; in the military, commanders need to commit to a battle strategy and lead their troops; and in start-ups, entrepreneurs must manage risk when success is uncertain. In every case, success calls for action as well as analysis, and for courage as well as calculation. Always entertaining, often surprising, and immensely practical, Left Brain, Right Stuff draws on a wealth of examples in order to propose a new paradigm for decision making in synch with the way we have to operate in the real world. Rosenzweig's smart and perceptive analysis of research provides fresh, and often surprising, insights on topics such as confidence and overconfidence, the uses and limits of decision models, the illusion of control, expert performance and deliberate practice, competitive bidding and new venture management, and the true nature of leadership.

Blink of an Eye William S. Cohen, 2011-11-08 It is America's worst nightmare: A nuclear bomb destroys a major city. Thousands of Americans are dead and many more will die from radiation poisoning. Threats promising more attacks spread through the media. Panic has broken out in many cities. How could American intelligence have failed to detect a nuclear device? Who is responsible for the blast? Sean Falcone, national security advisor, is tasked with identifying and tracking down the attackers. Powerful forces within the Capital point the finger at Iran. But appearances are always deceiving, and never more so than when millions of innocent people may die for a crime they did not commit. With the potential to incite the entire Muslim world against America and bring the world to the brink of Armageddon, Falcone discovers an astonishing secret hidden deep within the upper echelons of Washington's elite...but why should the President—or the American people—believe him? Pulling from years of international affairs and defense planning experience, the former Secretary of Defense under Bill Clinton creates a sweeping, all-too-real political thriller. And how was Your Trip Abroad? Richard P. Letsinger,2010 Richard Philips Letsinger worked in England, France and Germany as a member of Supreme Headquarters Allied Expeditionary Forces (SHAEF) for the last two years of World War II. The majority of his time was spent as an assistant to Brigadier General Archibald Clough in the Map and Survey Section of G-3 Operations. The section was responsible for mapping the plans to invade continental Europe (OVERLORD). As such, Letsinger earned the security classification, BIGOT. This classification was between TOP SECRET and EYES ONLY. He regularly observed General Eisenhower, Field Marshal Tedder, Field Marshall Montgomery, General Smith and many other leaders during the planning of D-Day. These memoirs contain Letsinger's wartime experiences culled from a vivid memory and the journals he maintained throughout his enlistment. In addition, he retained all correspondence from friends and family and has reproduced many of the letters here, giving a balanced picture of what was happening in his life, both home and away.

Selected Mark Van Vugt,Anjana Ahuja,2011-01-18 A groundbreaking, evolutionary science-based exploration of the history of leadership that explains how and why some men and women evolve into good or great leaders, and some do not. We are all leaders or followers – or both. We can recognise leadership in almost every area of life: in the workplace, among friends, within families, in politics and religion. But what makes a good or bad leader, and what makes an outstanding one? Selected examines how and why leadership has evolved over tens of thousands of years, and presents a bold and compelling new mismatch hypothesis: the slowness of evolution means that there is a mismatch between modern leadership and the kind of leadership that our Stone Age brains are still wired for. This makes for all sorts of tendencies, problems and solutions that no author has yet discussed but that affect all aspects of our lives. Full of fascinating examples drawn from a diverse range of spheres, from politics and commerce to sport and culture, Selected explains why taller political candidates usually win, why women chief executives attract such hostility, why we like it when the boss asks after our children and what prime ministers and presidents can do to improve their chances of electoral success. This is the first book of its kind – reaching into business, psychology, politics and current affairs – to explore how leadership affects us all. It also offers the first truly scientific theory of leadership: where previous books have provided anecdote, it details empirical evidence. Selected provides deep insight into our personal and professional lives at a time when the world urgently needs to acknowledge great leadership.

Debt management insights and tools from selected nations. ,2001 For four years, the United States has had a budget surplus that has resulted in decreasing debt levels. Debt held by the public fell approximately \$453 billion from the end of fiscal year 1997 to the end of fiscal year 2001. Although it appears now that the economy and the challenges of combating terrorism will prompt deficits for the short term, we may again return to surpluses. A number of other nations experienced a cycle of budget deficit and surplus before the United States. GAO examined the experiences of some of these nations looking for insights and lessons learned for the United States. Particular attention was paid to the various techniques used, including the use of debt buybacks. Five nations were selected--Australia, New Zealand, Norway, Sweden, and the United Kingdom-whose recent approaches and experiences with debt management in times of surplus might have relevance to or provide useful information for the United States. To obtain information on the experiences of these other nations in managing sovereign debt, we interviewed government officials, capital market participants, academics, and others to discuss fiscal and debt management goals, the relationship between budget changes and debt policies and actions, and the nature of the capital markets in these nations.

Lucky Traveler Bruce Mccoury,2021-12-07 Lucky Traveler is about Leo McGregor, a twenty-year-old surfer dude living in Kitty Hawk, North Carolina. He and his Irish pal Jimmy Flynn were surfing and made a bet to see who could catch the best wave that day. Leo won the bet, and the payoff was one Powerball Lottery ticket. Leo was the single winner of the \$156 million pot. After a couple of months of getting badgered by the locals for money and handouts, Leo decided he needed to get out of town, so she hatched a plan to hitchhike across America to Santa Monica, California, via Route 66. Even though most of the Mother Road was long gone, he planned to veer off the main roads as much as possible to catch some of the famous roadside attractions. Leo left Kitty Hawk and his girlfriend behind and began hitchhiking barefoot with only the clothes on his back and a customized backpack full of items he might need along the way. On his journey, he met numerous interesting people and saw a lot of interesting sights. At each town and with each person who give him a ride, Leo experienced a unique adventure. Some of the things Leo experienced included getting kidnapped by a bungling thief at a 7-Eleven convenience store, accidentally burning down a Mexican restaurant, and being in a van that flipped over the guardrail into a ravine and the driver turned out to be a drug dealer. Leo documented his journey in a journal on his tablet. He hoped to someday write a book about his journey and give the profits to charity. He reached Santa Monica in thirty-nine days and had grown in so many ways. Once he reached the West Coast, Leo had a decision to make. Should he spend a few days at the beach then head back to Kitty Hawk, or continue his soul-searching? His story continues in the sequel.
