Doing Family in Second-Generation British Migration Literature Corinna

Assmann,2018-09-24 Due to the large-scale global transformations of the 20th century, migration literature has become a vibrant genre over the last decades. In these novels, issues of transcultural identity and belonging naturally feature prominently. This study takes a closer look at the ways in which the idea of family informs processes of identity construction. It explores changing roles and meanings of the diasporic family as well as intergenerational family relations in a migration setting in order to identify the specific challenges, problems, and possibilities that arise in this context. This book builds on insights from different fields of family research (e.g. sociology, psychology, communication studies, memory studies) to provide a conceptual framework for the investigation of synchronic and diachronic family constellations and connections. The approach developed in this study not only sheds new light on contemporary British migration literature but can also prove fruitful for analyses of families in literature more generally. By highlighting the relevance and multifaceted nature of doing family, this study also offers new perspectives for transcultural memory studies.

Bits and Bugs Thomas Huckle,Tobias Neckel,2019-03-08 In scientific computing (also known as computational science), advanced computing capabilities are used to solve complex problems. This self-contained book describes and analyzes reported software failures related to the major topics within scientific computing: mathematical modeling of phenomena; numerical analysis (number representation, rounding, conditioning); mathematical aspects and complexity of algorithms, systems, or software; concurrent computing (parallelization, scheduling, synchronization); and numerical data (such as input of data and design of control logic). Readers will find lists of related, interesting bugs, MATLAB examples, and "excursions" that provide necessary background, as well as an in-depth analysis of various aspects of the selected bugs. Illustrative examples of numerical principles such as machine numbers, rounding errors, condition numbers, and complexity are also included.

Philosophy in the Age of Science? Julia Hermann,Jeroen Hopster,Wouter Kalf,Michael Klenk,2020-06-09 Current academic philosophy is being challenged from several angles. Subdisciplinary specialisations often make it challenging to articulate philosophy's relevance for the societal questions of our day. Additionally, the success of the 'scientific method' puts pressure on philosophers to articulate their methods and specify how these can be successful. How does philosophical progress come about? What can philosophy contribute to our understanding of today's world? Moreover, can it also contribute to resolving urgent societal challenges, such as anthropogenic climate change? This edited volume evaluates the place of philosophy in the age of science. It addresses three related sub-themes: philosophical progress, philosophical method and philosophy's societal relevance. Fourteen authors engage with these sub-themes, focusing on the topics of their philosophical expertise, such as the philosophy of religion, evolutionary ethics and the nature of free will. In doing so, they explore their methods of enquiry, and look at how progress in their research comes about.

Wonder-full Experiences in Music Education Aimee Beaulieu Schmidt,2022 The question of how musical coordination in a school wind band is addressed by pedagogues was qualitatively reconstructed using videographic interaction analysis. A process of Hervorhebungspraktik ('practice' of 'highlighting') was observed, which gradually brought musical elements out of their temporal context and into collective perception, allowing both atmospheric interaction with content and the growth of professional vision. A process of deconstruction and reintegration takes place as musical elements, now present in collective consciousness, withdraw back into the piece as a whole. This necessitates an educational approach emphasizing not only the elements themselves, but the relationships between them. The realms of edusemiotics and phenomenology give us a pragmatic

way (in both a Deweyan and a Peircean sense) to approach learning in music-making that goes beyond the idea of (co-)constructivism as content-with-agency, teacher and student participate in coordinative interaction. Aimee Beaulieu Schmidt is a native Texan with teaching experience in American and German public education. As a band director and orchestral musician, she has helped build music education programs on two continents. She lives with her husband and two daughters near Frankfurt, Germany. Her research focuses on musical coordination, edusemiotics, and qualitative video analysis. Aimee Beaulieu Schmidt is a native Texan with teaching experience in American and German public education. Advances in Social and Occupational Ergonomics Richard H.M. Goossens, Atsuo Murata, 2019-06-06 This book reports on cutting-edge research on social and occupational ergonomics, presenting innovative contributions to the optimization of sociotechnical management systems related to organizational, policy, and logistical issues. It discusses timely topics related to communication, crew resource management, work design, participatory design, as well as teamwork, community ergonomics, cooperative work, and warning systems, and explores new work paradigms, organizational cultures, virtual organizations, telework, and quality management. The book also describes pioneering infrastructures implemented for different purposes such as urban, health, and enterprise, and examines the changing role of automated systems, offering innovative solutions that address the needs of particular populations. Based on the AHFE 2019 International Conference on Social and Occupational Ergonomics, held on July 24-28, 2019, Washington D.C, USA, the book provides readers with a comprehensive overview of the current challenges in both organizational and occupational ergonomics, highlighting key connections between them and underlining the importance of emotional factors in influencing human performance.

Die Formel gegen Alzheimer Michael Nehls, 2018-05-14 Alzheimer keine Chance geben Das kompakte Praxisbuch für ein Leben ohne Alzheimer für Betroffene, Angehörige und für alle, die rechtzeitig vorbeugen wollen. Dr. med. Michael Nehls klärt auf über die Ursachen dieser Zivilisationskrankheit und zeigt, wie man sich mithilfe seiner Formel gegen Alzheimer nicht nur vor Alzheimer schützen, sondern in einer frühen Phase sogar geheilt werden kann. Entscheidend sind vier einfache Faktoren: genügend Schlaf, ausreichend Bewegung, gute soziale Kontakte und eine gehirngesunde Ernährung. Mit vielen hilfreichen Empfehlungen und Rezepten – übersichtlich, leicht verständlich, überzeugend!

Lernfeld: Persönlichkeit Johannes Soth, 2014-09-17 Durch ein Übermaß von Außenreizen verlieren Kinder mehr und mehr den Kontakt zur eigenen Innenwelt und geraten außer Rand und Band. Gegen diese Tendenzen der Zerstreuung und Entpersönlichung betont K.E.K.S den Weg nach innen. Denn nur vom Innersten her kann kraftvoll im Außen gehandelt werden. Das Konzept der Körperorientierten Entspannungs- und Konzentrations- Schulung (K.E.K.S) wird von der Basis eines personenzentrierten Menschenbildes her erklärt und didaktisch/methodisch entfaltet. Die Unterstützung der Personwerdung steht im Fokus: Kinder wachsen zu starken Persönlichkeiten, wenn sie bei der heutigen Dominanz des Außen, dem Übermaß von Informationen, Reizen und Zerstreuungsmöglichkeiten, lernen, sich nicht aus ihrer seelischen Mitte heraus ziehen zu lassen, sondern in Kontakt zu kommen mit den eigenen inneren Kraftquellen. Dazu werden im ausführlichen

Praxis-Kapitel viele Körper- und Atemübungen, Methoden der Entspannung, Selbstwahrnehmung und inneren Sammlung präzise beschrieben. Dass Konzentrationsfähigkeit auch extrovertiert und interaktiv in Spielen zur Kommunikation und Kooperation sowie in Übungen zum Selbstausdruck aufgebaut werden kann, wird anhand zahlreicher Beispiele veranschaulicht. Der Weg nach innen, der in K.E.K.S in besonderer Weise kultiviert wird, und der Weg nach außen fördern und ergänzen sich gegenseitig. Personale Identitätsfindung kann letztlich nur gelingen im Spannungsverhältnis von Selbstfindung und sozialer Verantwortung, die erst in der Selbstüberschreitung zu einer überindividuellen Sinndimension hin ihre eigentliche Kraft und Authentizität gewinnt. Die wirksamste Bewusstseins-Übung des K.E.K.S-Programms besteht darin, nichts zu tun, wachsam mit allen Sinnen da zu sein und für eine kurze Zeit Gedanken und Absichten aufzugeben, um gerade dadurch mehr und mehr geistesgegenwärtig zu werden.
