Pictures in Place Kenneth Lim, 2006-11 This study describes data that was gathered in 2004 from fieldwork conducted by students from four schools in Singapore, around tasks of wayfinding and debate. The fieldwork tasks were designed specifically to permit participants to exercise their powers of observation, as opposed to more traditional tasks of collection of empirical data. To this end, the study was constructed such that students were given opportunities to collaboratively explore and navigate unfamiliar environments using text- and picture-messaging, as well as to engage in debate, and use multimedia evidence recorded in the field to defend their positions both to peers in the field and in the classroom, regarding various issues of concern to these environments, with specific links being made to their studies in geography. The data was used to shed light on those elements in urban and suburban environments which adolescents in Singapore find geographically meaningful, as well as to determine the extent to which such interventions might augment students' spatial intelligence, with a view to informing a more effective geography education programme in schools. The nature of the collaborative discourse which emerged as participants engaged in the intervention was also investigated, using a proprietary taxonomy of discourse types. This thesis is grounded in neo-Vygotskyian socio-cultural activity theory. Primary findings include the suggestion that key elements in adolescents' local environments used to orientate and to convey spatial information are axial lines and buildings. The data also reveals differences between the genders in their preference for text over pictures in conveying such information. Adolescents who are more successful in participating in and applying spatial discourse also tend to exhibit certain habits of mind, such as perseverance, as well as to scaffold their exchanges more. Finally, the study suggests that certain fieldwork interventions can indeed augment spatial intelligence and mapping skills.

Email, SMS, MMS Carmen Frehner, 2008 Are email and SMS forms of writing or speech? This question cannot be answered easily because their registers are hybrid; they make use of both orality and literacy. This book offers an accurate placement of emails and text messages along the written/spoken continuum. Emails and text messages are also compared to letters and phone calls while a closer comparison of SMS and telegrams shows how far text messaging can be regarded as a renaissance of telegrams. Attention is further paid to multimedia messaging and questions concerning the proportion of image to text, picture categories as well as MMS dialogues are approached. The book finally comments on linguistic changes and deals with the German language community's concern with regard to the increasing use of Anglicisms.

From Snapshots to Social Media - The Changing Picture of Domestic Photography Risto Sarvas, David M. Frohlich, 2011-02-09 *From Snapshots to Social Media* describes the history and future of domestic photography as mediated by technological change. Domestic photography refers to the culture of ordinary people capturing, sharing and using photographs, and is in a particular state of flux today as photos go digital. The book argues that this digital era is the third major chapter in the 170 year history of the area; following the portrait and Kodak eras of the past. History shows that despite huge changes in photographic technology and the way it has been sold, people continue to use photographs to improve memory, support communication and reinforce identity. The future will involve a shift in the balance of these core activities and a replacement of the family album with various multimedia archives for individuals, families and communities. This raises a number of issues that should be taken into account when designing new technologies and business services in this area, including: the ownership and privacy of content, multimedia standards, home ICT infrastructure, and younger and older users of images. The book is a must for designers and engineers of imaging technology and social media who want a better understanding of the history of domestic photography in order to shape its future. It will also be of value to students and researchers in science and technology studies and visual culture, as a fascinating case study of the evolving use of photographs and photographic technology in Western society.

Multimedia Messaging Service Gwenaél Le Bodic, 2004-02-06 The Multimedia Messaging Service (MMS) is regarded as the best-of-the-breed of proven messaging technologies, surpassing SMS and electronic mail to offer a truly multimedia experience to mobile users. The first commercial solutions appeared on the market in 2002 and the penetration rate of MMS is now quickly approaching the required level for mass-market adoption. By leveraging accessible technologies, MMS has gained wide acceptance from major market players and provides great business opportunities for the whole telecommunications industry. Introduces usage scenarios and provides a comprehensive description of enabling technologies for MMS, from version 1.0 to version 1.2 (featuring message content classes, video support, online message boxes, digital rights management, etc.) Demystifies MMS standards by clearly illustrating technical explanations with numerous practical examples, from the design of multimedia messages to the interfacing of applications with MMS centres Sheds light on common implementation pitfalls and known interoperability issues Based on the author's own experience as a standardization expert and software architect for one of the major handset vendors, *Multimedia Messaging Service* provides a stimulating practical reference book for network operators, content designers, device manufacturers and developers of messaging applications, and will also appeal to researchers and students.

MMS Daniel Ralph, Paul Graham, 2004-04-21 MMS has evolved from the huge popularity of the SMS text service for GSM networks. It is a departure from the transport mechanism used for SMS (which is based on the GSM signalling channels) to the use of IP to transport messages within the MMS network. To this end MMS has similarities with Internet email and standard IETF protocols. As with any new technology it is difficult to accurately predict the position within the next 5 years, although based on previous experience with WAP and SMS it would be fair to say that these protocols will increase in usage over the next 5 years and become legacy for a further 5 years following which, users will migrate onto the next wave of messaging. Significant revenue growth and data usage is expected to be driven by consumer usage of MMS. But MMS technology offers more than just a broadening of message content. With MMS, it is not only possible to send your multimedia messages from one phone to another, but also from phone to email, and vice versa. This feature

dramatically increases the possibilities of mobile communication, both for private and corporate use. Multimedia messaging will reshape the landscape of mobile communication, making it more personal, more versatile, and more expressive than ever before. MMS: Is the first book to address how MMS (and the use of IP to transport messages) will affect existing infrastructure and business models Covers the fundamental changes to mail and billing systems Includes future recommendations, such as interoperability and evolution Presents an overview of the MMS technology components Drawing on the authors hands-on experience in the implementation of MMS technology (developing, billing and delivering services) at BT, this innovative book will appeal to engineering managers, network operators, market analysts, business decision makers, content providers and operator organizations.

Visual Communication Research Designs Keith Kenney,2010-09-28 Visual Communication Research Designs provides a step-by-step guide for designing research involving visuals relevant to communications media. This volume explains the process from conceptualization to research questions, instrumentation, analysis, and reliability and validity checks. It also addresses the lack of sufficient methods to answer theoretical questions attending visual communication. This resource has been developed in response to the circumstance in which, in many cases, the methodologies used for verbal and textual communications are inappropriate or ineffective when applied or adapted for the study of visual communications. Additionally, research articles from ethnography, action research, rhetoric, semiotics, psychology, cultural studies, and critical theory often do not use examples appropriate to visual communication readers. To address these issues, this book explains in clear and straightforward language key research designs, including new methodologies, that are appropriate for scholars and students conducting visual communication research. Organized into three parts -- production, analysis, and effects of visuals -- this research text provides guidance in using, interpreting and measuring the effects of visual images. It addresses such topics as: producing photographs and video that can be used as research data; interpreting images that already exist; measuring the effects of visuals and to understand their use by different groups. Ethical issues are included, as well as a discussion of the advantages and limitations of each method. War stories are provided by experienced researchers, who discuss a particular research project and explain pitfalls to avoid, as well as what to do when problems occur. The primary audiences are scholars, researchers, and students conducting research on motion pictures, video, television, photographs, illustrations, graphics, typography, political cartoons, comic books, animation, and other media with a visual component. Individuals will use this text whenever they need to conduct research that involves visuals in the media. The book will be a required text for advanced courses in visual culture, seminars on visual communication research, and other research methods courses integrating a visual component.

Everyday Innovators Leslie Haddon,Enid Mante,Bartolomeo Sapio,Kari-Hans Kommonen,Leopoldina Fortunati,Annevi Kant,2006-07-04 Everyday Innovators explores the active role of people, collectively and individually, in shaping the use of information and communication technologies. It examines issues around acquiring and using that knowledge of users, how we should conceptualise the role of users and understand the forms and limitations of their participation. To what extent should we think of users as being innovative and creative? To what extent is this routine or exceptional, confined to particular group of users or part of many people's experience of technologies? Where does the nature of the ICT or the particularities of its design impose constraints on the active role that users can play in their interaction with devices and services? Where do the horizons and orientations of the users influence or limit what they want and expect of their ICTs and how they use them? This book enables a cross-fertilisation of perspectives from different disciplines and aims to provide new insights into the role of users, drawing out both applied and theoretical implications
