**Cyber Forensics** Albert J. Marcella, 2021-09-12 Threat actors, be they cyber criminals, terrorists, hacktivists or disgruntled employees, are employing sophisticated attack techniques and anti-forensics tools to cover their attacks and breach attempts. As emerging and hybrid technologies continue to influence daily business decisions, the proactive use of cyber forensics to better assess the risks that the exploitation of these technologies pose to enterprise-wide operations is rapidly becoming a strategic business objective. This book moves beyond the typical, technical approach to discussing cyber forensics processes and procedures. Instead, the authors examine how cyber forensics can be applied to identifying, collecting, and examining evidential data from emerging and hybrid technologies, while taking steps to proactively manage the influence and impact, as well as the policy and governance aspects of these technologies and their effect on business operations. A world-class team of cyber forensics researchers, investigators, practitioners and law enforcement professionals have come together to provide the reader with insights and recommendations into the proactive application of cyber forensic methodologies and procedures to both protect data and to identify digital evidence related to the misuse of these data. This book is an essential guide for both the technical and non-technical executive, manager, attorney, auditor, and general practitioner who is seeking an authoritative source on how cyber forensics may be applied to both evidential data collection and to proactively managing today's and tomorrow's emerging and hybrid technologies. The book will also serve as a primary or supplemental text in both under- and post-graduate academic programs addressing information, operational and emerging technologies, cyber forensics, networks, cloud computing and cybersecurity.

**Space Operations** Craig Cruzen, Michael Schmidhuber, Young H. Lee, 2022-03-15 This book includes a selection of reviewed and enhanced contributions presented at the SpaceOps 2021, the 16th International Conference on Space Operations, held virtually in May 2021. The chapter selections were made based upon their relevance to the current space operations community. The contributions represent a cross-section of three main subject areas: Mission Management – management tasks for designing, preparing and operating a particular mission; Spacecraft Operations – preparation and implementation of all activities to operate a space vehicle (crewed and uncrewed) under all conditions; and Ground Operations – preparation, qualification, and operations of a mission dedicated ground segment and appropriate infrastructure including antennas, control centers, and communication means and interfaces. The book promotes the SpaceOps Committee's mission to foster the technical interchange on all aspects of space mission operations and ground data systems while promoting and maintaining an international community of space operations experts.

**Galapagos Giant Tortoises**, 2020-11-07 Galapagos Giant Tortoises brings together researchers and conservationists to share the most up-to-date knowledge of Galapagos giant tortoises. Despite being icons of the world-famous Galapagos Archipelago and the target of more than 50 years of conservation research and management, Galapagos giant tortoise evolution and much of their ecology remained unknown until recently. This book documents the history, the pressing conservation issues, and success stories recovering several of the 15 different species of Galapagos tortoises from near extinction. The book begins with an overview of the history of the relationship between humans and Galapagos giant tortoises, starting from initial heavy exploitation of tortoises by pirates and whalers, and extending to the start of the modern conservation era in the 1960s. The book then shifts to biology, describing Galapagos tortoise evolution, taxonomy, ecology, habitats, reproduction, and behavior. Next the decades of conservation efforts and their results are reviewed, including issues of captive breeding, invasive species, introduced diseases, and de-extinction, as well as the current status and distribution of every species. The final portion of the book turns to four case studies of restoration, and then looks ahead to the future of all tortoise populations. The latest volume in the Biodiversity of the World: Conservation from Genes to Landscape series, Galapagos Giant Tortoises is a valuable resource for researchers and conservationists, as well as students of biology, wildlife conservation, and herpetology. Provides a comprehensive overview of the Galapagos giant tortoise species as written and edited by the world's leading experts Presents examples of restoration of tortoise populations following the near extinction of many of them Describes conservation strategies to ensure the full recovery of all extant species Explores recent efforts using replacement tortoises for extinct species to restore island ecosystems

Owen Parker: Rhino Connection Chris Bellenot, Arthur Pendragon, 2013-11-26 A percentage of the proceeds from the sales of this book will be donated to wildlife conservation dedicated to save the rhinos. On a warm African night, an adult rhino collapses in the grass and breathes its last. Minutes earlier, poachers had brutally hacked off its

horn and fled with their treasure. It is a fact that myths, greed and corruption are behind the illegal trade of rhino horns. Owen Parker, a young conservationist, is sucked into a death-threatening journey crossing the path of this trafficking reckless organization which is ready to break all the rules to reach their precious prize. Owen possesses instinctive survival skills. Will it be sufficient to stay alive in this maze full of violence, dishonesty and appetite for more money...? This sequel describing the adventures of Owen Parker has two main purposes. The obvious aim is to entertain readers with action-driven books of fiction based on facts. Beyond this lies a deeper intention. The beauty and majesty of wildlife and nature are under threat from external pressure from a variety of sources. We strongly believe that each individual can make a difference by acting to reduce this threat and thereby contribute to the preservation of our fragile environment. Through the character of Owen Parker, we aim to promote the conservation of wildlife.

*Tales from the Thébaïde* Peter Charles Howard Pritchard, 2007 Dr. Peter Pritchard, Oxford scholar, conservationist, world traveler, and Renaissance man, is a multifaceted expert on turtles and tortoises. A cheloniological thread thus runs through his *Tales from the Thebaide*, as he expands the study of his favorite animals into commentaries upon the universe itself, and includes brilliant, erudite, and always humorous accounts of his adventures in many lands seeking further insight into the shelled reptiles. His preoccupation that important players in his life and in his field should not be forgotten led to inclusion of several in-depth obituaries, including one of Florida's own Archie Carr. major section of the book, as does his scholarly discourses on the taxonomic status of sea turtles. There is a long section on why he set up his personal Thebaide, the Chelonian Research Institute, and his delight in the zany, sometimes unbelievable players of the past who launched their own Cabinets of Curiosities. Pritchard's reflections encompass his love of life, and his hope that his readers will share his delight in people, science, culture, conservation, argument, scholarship, and (of course) turtles.

**On the Backs of Tortoises** Elizabeth Hennessy, 2019-10-29 An insightful exploration of the iconic Galápagos tortoises, and how their fate is inextricably linked to our own in a rapidly changing world The Galápagos archipelago is often viewed as a last foothold of pristine nature. For sixty years, conservationists have worked to restore this evolutionary Eden after centuries of exploitation at the hands of pirates, whalers, and island settlers. This book tells the story of the islands' namesakes--the giant tortoises--as coveted food sources, objects of natural history, and famous icons of conservation and tourism. By doing so, it brings into stark relief the paradoxical, and impossible, goal of conserving species by trying to restore a past state of prehistoric evolution. The tortoises, Elizabeth Hennessy demonstrates, are not prehistoric, but rather microcosms whose stories show how deeply human and nonhuman life are entangled. In a world where evolution is thoroughly shaped by global history, Hennessy puts forward a vision for conservation based on reckoning with the past, rather than trying to erase it.

**Walking in Your Own Shoes** Robert Anthony Schuller, 2007-11-01 God had a specific reason when he formed us to be individuals, unique creations that each fulfill a special purpose. Everything we are, have been, and will be is all part of a grand plan of God's love. Everything helps to shape us into the people God wants us to be and where we find our inner satisfaction, joy, and meaning.

**Fiksyen 302** Ramlee Awang Murshid, 2011 LAN LANI, JIMMY YEOH, PRAKASH KUMAR dan FARID JA'AH membunuh mangsa-mangsa mereka dengan kejam. Masing-masing melakukannya dengan cara yang hampir serupa. Angka 302 dilakar di dahi mangsa. Sejurus itu, mereka menghubungi polis dan melaporkan bahawa hukuman mati telah dilaksanakan. Ketika diberkas, mereka menyerah diri dalam keadaan bertelanjang bulat. Bagaimanapun, motif sebenar setiap pembunuhan sangat kabur. Andai dipadankan dengan psikologi manusia, ternyata mereka yang mengaku bertanggungjawab bukanlah orang yang waras. Kes-kes itu tidak dapat diselesaikan. Tahun 2032 - seorang peguam, Rita Yuzalina menyertai projek rahsia yang dikendalikan oleh dua orang pakar psikiatri bertujuan untuk merungkaikan misteri pembunuhan itu. Namun, ia disabotaj. Pertukaran watak berlaku. Lebih menakutkan... tragedi lampau berulang lagi. Lebih dahsyat daripada apa yang dijangkakan! RAMLEE AWANG MURSHID dalam karyanya kali ini mengingatkan bahawa rasa percaya merupakan perangkap yang boleh mengancam nyawa. Apabila tersedar sahaja, maut sudah di hadapan mata. Melarikan diri adalah perkara mustahil. Menyerah begitu sahaja menyebabkan kematian yang sia-sia. Cara paling selamat... jangan sesekali percaya! Sesiapa pun tidak terkecuali daripada pertuduhan, prasangka dan dijadikan suspek utama pembunuhan.

**Traveler's Guide to Mexican Camping** Mike Church, 2005

Dolphins Under My Bed Sandra Clayton, 2011-03-15 Proving that sailing is not just the husband's pursuit, this charming narrative of one couple's first long distance voyage is told from the wife's perspective. Writing in a lively, humorous way, Sandra Clayton gives an entertaining account of her and husband David's maiden cruise from the UK, down the Atlantic coast and into the warm waters of the Mediterranean. Conscious that old age or poor health could prevent them from sailing away for much longer, they left the world of work behind to chase their dream of adventure. Conditions are sometimes maddening, occasionally dangerous, but frequently magical. Marine creatures enchant their days while ships that pass in the night add a touch of romance. But the book is far more than just the story of the Claytons' 2000 mile trip. Somewhat unprepared for what faced them on the way, they had to learn from their own mistakes, finding themselves in places and situations where they never expected to be. The book has plenty to offer those who might consider embarking on a similar voyage of their own: learn how the Claytons did it, which route they took, the beautiful locations they visited, who they met along the way, and their good decisions as well as their bad. A great bunkside read, it may inspire others to make a similar break

themselves.

*No Regrets* William F. Scanlin,2010-08-27 This autobiography covers my life and key experiences that I have had since my earliest recollections to the present time. The United States stopped nuclear testing in the atmosphere in 1962. As time has gone on, there are now few people still alive who have actually witnessed a large atmospheric nuclear explosion. I relate as one of my most memorable life experiences my witnessing of a nearly 8 million ton thermonuclear explosion at Christmas Island in 1962. An aspect of my career as a physicist in the weapons program that is essentially unique is that I was the responsible design physicist for 93 live underground nuclear experiments carried out at the Nevada Test Site. Obviously, the many activities that I have engaged in have been experienced by only a few. Interspersed with my rewarding career, I describe the adventures that I experienced while pursuing my hobbies of flying, boating, and traveling. The foundation for the great life that I have enjoyed is a happy marriage and a successful loving family.
