**Talking Machine West** Michael A. Amundson,2017-04-13 Many associate early western music with the likes of Roy Rogers and Gene Autry, but America's first western music craze predates these "singing cowboys" by decades. Written by Tin Pan Alley songsters in the era before radio, the first popular cowboy and Indian songs circulated as piano sheet music and as cylinder and disc recordings played on wind-up talking machines. The colorful fantasies of western life depicted in these songs capitalized on popular fascination with the West stoked by Buffalo Bill's Wild West shows, Owen Wister's novel The Virginian, and Edwin S. Porter's film The Great Train Robbery. The talking machine music industry, centered in New York City, used state-of-the-art recording and printing technology to produce and advertise songs about the American West. Talking Machine West brings together for the first time the variety of cowboy, cowgirl, and Indian music recorded and sold for mass consumption between 1902 and 1918. In the book's introductory chapters, Michael A. Amundson explains how this music reflected the nostalgic passing of the Indian and the frontier while incorporating modern ragtime music and the racial attitudes of Jim Crow America. Hardly Old West ditties, the songs gave voice to changing ideas about Indians and assimilation, cowboys, the frontier, the rise of the New Woman, and ethnic and racial equality. In the book's second part, a chronological catalogue of fifty-four western recordings provides the full lyrics and history of each song and reproduces in full color the cover art of extant period sheet music. Each entry also describes the song's composer(s), lyricist(s), and sheet music illustrator and directs readers to online digitized recordings of each song. Gorgeously illustrated throughout, this book is as entertaining as it is informative, offering the first comprehensive account of popular western recorded music in its earliest form.

**ICPMG2014 - Physical Modelling in Geotechnics** Christophe Gaudin,David White,2019-01-08 The 8th International Conference on Physical Modelling in Geotechnics (ICPMG2014) was organised by the Centre for Offshore Foundation Systems at the University of Western Australia under the auspices of the Technical Committee 104 for Physical Modelling in Geotechnics of the International Society of Soil Mechanics and Geotechnical Engineering. This quadrennial conference is the traditional focal point for the physical modelling community of academics, scientists and engineers to present and exchange the latest developments on a wide range of physical modelling aspects associated with geotechnical engineering. These proceedings, together with the seven previous proceedings dating from 1988, present an inestimable collection of the technical and scientific developments and breakthroughs established over the last 25 years. These proceedings include 10 keynote lectures from scientific leaders within the physical modelling community and 160 peer-reviewed papers from 26 countries. They are organised in 14 themes, presenting the latest developments in physical modelling technology, modelling techniques and sensors, through a wide range of soil-structure interaction problems, including shallow and deep foundations, offshore geotechnics, dams and embankments, excavations and retaining structures and slope stability. Fundamental aspects of earthquake engineering, geohazards, ground reinforcements and improvements, and soil properties and behaviour are also covered, demonstrating the increasing complexity of modelling arising from state-of-the-art technological developments and increased understanding of similitude principles. A special theme on education presents the latest developments in the use of physical modelling techniques for instructing undergraduate and postgraduate students in geotechnical engineering.

**This Is Not a Pipe** Michel Foucault,2023-11-10 What does it mean to write This is not a pipe across a bluntly literal painting of a pipe? René Magritte's famous canvas provides the starting point for a delightful homage by French philosopher and historian Michel Foucault. Much better known for his incisive and mordant explorations of power and social exclusion, Foucault here assumes a more playful stance. By exploring the nuances and ambiguities of Magritte's visual critique of language, he finds the painter less removed than previously thought from the pioneers of modern abstraction.
