Aayush Das

Pisces Stephanie True Peters,2002-12-15 Discusses the constellation Pisces, its location among the stars, myths about its origin, and its presence in the zodiac, as well as basic concepts of astronomy.

The Haunted Ghost Aayush Das,2018-03-05 Boy meets girl, girl meets boy. Routine story. Except that the girl has been dead for seven years. Boy meets ghost, ghost avoids boy. However, fate brings them together and together they embark upon a rollercoaster ride towards finding what they had always been looking for. They become friends. The girl teaches the boy about death, while the boy teaches her about life. This unlikely friendship is at peril, though, for life and death can never coexist without grave repercussions.

Girl in Pieces Kathleen Glasgow,2018-04-10 #1 NEW YORK TIMES BESTSELLER A haunting, beautiful, and necessary book.—Nicola Yoon, #1 New York Times bestselling author of *Everything, Everything* Charlotte Davis is in pieces. At seventeen she's already lost more than most people do in a lifetime. But she's learned how to forget. The broken glass washes away the sorrow until there is nothing but calm. You don't have to think about your father and the river. Your best friend, who is gone forever. Or your mother, who has nothing left to give you. Every new scar hardens Charlie's heart just a little more, yet it still hurts so much. It hurts enough to not care anymore, which is sometimes what has to happen before you can find your way back from the edge. A deeply moving portrait of a girl in a world that owes her nothing, and has taken so much, and the journey she undergoes to put herself back together. Kathleen Glasgow's debut is heartbreakingly real and unflinchingly honest. It's a story you won't be able to look away from. And don't miss Kathleen Glasgow's novels *You'd Be Home Now* and *How to Make Friends with the Dark*, both raw and powerful stories of life.

Moon Signs Donna Cunningham,2010-12-08 If you think your astrological fate is sealed by your Sun sign, think again! Your emotions, instincts, intuition, and most private passions are dominated by your Moon sign. In this eye-opening volume, world-famous astrologer and therapist Donna Cunningham unravels the often bewildering effects of lunar influence: a person's potential for intimacy, sense of security, family ties, susceptibility to indulgence in food or drink, career ambition, as well as how men and women respond differently to the same lunar promptings in love and life. Cunningham provides all the information you need to determine your own and others' Moon signs—and analyze their power. Moon Signs also charts the daily, monthly, and yearly courses of the moon, which create those predictable mood swings—our “emotional weather.” The time-honored tradition of astrology has come into its own as a resource for human development and spiritual insight. For astrological novices and veterans alike, Cunningham's invaluable guide will pave the way to a more profound understanding of the uncharted and sometimes dark side of the soul.

Wish You Were Here Jodi Picoult,2021-11-30 #1 NEW YORK TIMES BESTSELLER • From the author of *Small Great Things* and *The Book of Two Ways* comes “a powerfully evocative story of resilience and the triumph of the human spirit” (Taylor Jenkins Reid, author of *The Seven Husbands of Evelyn Hugo* and *Daisy Jones & The Six*) Rights sold to Netflix for adaptation as a feature film • Named one of the best books of the year by *She Reads* Diana O'Toole is perfectly on track. She will be married by thirty, done having kids by thirty-five, and move out to the New York City suburbs, all while climbing the professional ladder in the cutthroat art auction world. She's an associate specialist at Sotheby's now, but her boss has hinted at a promotion if she can close a deal with a high-profile client. She's not engaged just yet, but she knows her boyfriend, Finn, a surgical resident, is about to propose on their romantic getaway to the Galápagos—days before her thirtieth birthday. Right on time. But then a virus that felt worlds away has appeared in the city, and on the eve of their departure, Finn breaks the news: It's all hands on deck at the hospital. He has to stay behind. You should still go, he assures her, since it would be a shame for all of their nonrefundable trip to go to waste. And so, reluctantly, she goes. Almost immediately, Diana's dream vacation goes awry. Her luggage is lost, the Wi-Fi is nearly nonexistent, and the hotel they'd booked is shut down due to the pandemic. In fact, the whole island is now under quarantine, and she is stranded until the borders reopen. Completely isolated, she must venture beyond her comfort zone. Slowly, she carves out a connection with a local family when a teenager with a secret opens up to Diana, despite her father's suspicion of outsiders. In the Galápagos Islands, where Darwin's theory of evolution by natural selection was formed, Diana finds herself examining her relationships, her choices, and herself—and wondering if when she goes home, she too will have evolved into someone completely different.

Atlas Coelestis John Flamsteed,1708 First Edition of the most important Celestial Atlas of the 18th Century. Flamsteed was the first Royal Astronomer. As Astronomer Royal, Flamsteed spent some forty years observing and making meticulous records for his star catalog, which would eventually triple the number of entries in Tycho Brahe's sky atlas. Unwilling to risk his reputation by releasing unverified data, he kept the incomplete records under seal at Greenwich. In 1712, Isaac Newton, then President of the Royal Society, and Edmund Halley obtained Flamsteed's data and published a pirated star catalog. Flamsteed managed to gather three hundred of the four hundred printings and burned them. If Sir I.N. would be sensible of it, I have done both him and Dr. Halley a great kindness, he wrote to his assistant Abraham Sharp. One of Flamsteed s main objectives was to correct Bayer s grave errors in the representation of figures, the latter having overturned a large number of figures and showing them from the rear instead of the front. These new positions were at odds with traditional descriptions. In 1719, Flamsteed died. Four years later, in 1725, Flamsteed's own version of Historia Coelestis Britannica was published. It had been edited by his wife, Margaret. This contained Flamsteed's observations and included a catalog of 2,935 stars at much greater accuracy than any prior work. It was considered the first significant contribution of the Greenwich Observatory, and the numerical Flamsteed designations for stars that were added to a subsequent French edition are still in use. In 1729 his wife published his Atlas Coelestis, assisted by Joseph Crosthwait and Abraham Sharp, who were responsible for the technical side.
