Image Databases and Multi-Media Search Arnold Smeulders,Ramesh Jain,1998-01-22 The World Wide Web and the Internet are signs that things will be very different in the future. And what is so striking about this computer-age future is that it comes incredibly fast and is incredibly overwhelming. Anyone who has surfed the Web has exclaimed at one point or another that there is so much information available, so much to search and so much to keep up with. Where Lycos and AltaVista are already accepted tools for textual information, image and multimedia search engines are the natural answers in the quest for pictorial information. This book provides a state-of-the-art description of that field. It contains the proceedings of a valuable workshop in Amsterdam, where people gathered to discuss the progress in the field. The topics cover computational methods of searching for pictures, the powerful pictorial clues in the recognition of objects, storage and indexing of objects in a database, and, ways to access the requested pictorial information. Contents:Multi-media Search: An Authoring Perspective (S W Smoliar et al.)Painting Retrieval Based on Color Semantics (J M Corridoni et al.)Efficient and Robust Retrieval by Shape Content Through Curvature Scale Space (F Mokhtarian et al.)Handling Multiple Instances of Symbols in Pictorial Queries by Image Similarity (A Soffer & H Samet)A New Method for Key Frame Based Video Content Representation (A Hanjalic et al.)Towards Multimedia Thesaurus Support for Media-based Navigation (P H Lewis et al.)Distance to Deformable Prototypes: Encoding Shape Categories for Efficient Search (S Sclaroff)Context-Sensitive and Context-Free Retrieval in a Video Database System (Q Li & K M Lam)Shot Break Detection and Camera Motion Classification in Digital Video (M Haas et al.)IFS Based Indexing in Image Databases (M Nappi et al.)and other papers Readership: Computer scientists, engineers and web specialists. Integrated Region-Based Image Retrieval James Z. Wang,2012-12-06 Content-based image retrieval is the set of techniques for retrieving relevant images from an image database on the basis of automatically derived image features. The need for efficient content-based image retrieval has increased tremendously in many application areas such as biomedicine, the military, commerce, education, and Web image classification and searching. In the biomedical domain, content-based image retrieval can be used in patient digital libraries, clinical diagnosis, searching of 2-D electrophoresis gels, and pathology slides. I started my work on content-based image retrieval in 1995 when I was with Stanford University. The project was initiated by the Stanford University Libraries and later funded by a research grant from the National Science Foundation. The goal was to design and implement a computer system capable of indexing and retrieving large collections of digitized multimedia data available in the libraries based on the media contents. At the time, it seemed reasonable to me that I should discover the solution to the image retrieval problem during the project. Experience has certainly demonstrated how far we are as yet from solving this basic problem.

Recent Advances in Intelligent Image Search and Video Retrieval Chengjun Liu,2017-04-18 This book initially reviews the major feature representation and extraction methods and effective learning and recognition approaches, which have broad applications in the context of intelligent image search and video retrieval. It subsequently presents novel methods, such as improved soft assignment coding, inheritable color space (InCS) and the generalized InCS framework, the sparse kernel manifold learner method, the efficient support vector machine (eSVM), and the scale-invariant feature transform (SIFT) features in multiple color spaces. Lastly, the book presents clothing analysis for subject identification and retrieval, and performance evaluation methods of video analytics for traffic monitoring. Digital images and videos are proliferating at an amazing speed in the fields of science, engineering and technology, media and entertainment. With the huge accumulation of such data, keyword searches and manual annotation schemes may no longer be able to meet the practical demand for retrieving relevant content from images and videos, a challenge this book addresses. Picture Research Nina Lager Vestberg,2023-06-06 An intimate foray into the invisible work that made it possible for pictures to circulate in print and online from the 1830s to the 2010s. Picture Research focuses on how pictures were saved, stored, and searched for in a time before scanners, servers, and search engines, and describes the dramatic difference it made when images became scannable, searchable, and distributable via the Internet. While the camera, the darkroom, and the printed page are well-known sites of photographic production that have been replaced by cell phones, imaging software, and websites, the cultural intermediaries of mass-circulation photography—picture librarians and researchers, editors, and archivists—are less familiar. In this book, Nina Lager Vestberg artfully details the range of research skills, reproduction machinery, and communication infrastructures that was needed to make pictures available to a public before digitization. Drawing on documents and representations across a range of cultural expressions, Picture Research reveals the intermediation that has been performed by skilled workers in a variety of roles, making use of pre-photographic, photographic, and digital machineries of capture, accumulation, extraction, and transmission. Tracing a history of the modern pictorial economy from the pre-photographic 1830s to the post-digitized 2010s, it makes visible and explicit the invisible labor that has built—and still sustains—the visual commodity culture of everyday life.

Content-Based Image and Video Retrieval Oge Marques,Borko Furht,2012-12-06 Content-based image and video retrieval addresses the basic concepts and techniques for designing content-based image and video retrieval systems. It also discusses a variety of design choices for the key components of these systems. This book gives a comprehensive survey of the content-based image retrieval systems, including several content-based video retrieval systems. The survey includes both research and commercial content-based retrieval systems. Content-based image and video retrieval includes pointers to two hundred representative bibliographic references on this field, ranging from survey papers to descriptions of recent work in the area, entire books and more than seventy websites. Finally, the book presents a detailed case study of designing MUSE—a content-based image retrieval system developed at Florida Atlantic University in Boca Raton, Florida.

NetSec 2009 - Open Research Problems in Network Security Jan Camensich,Doan Kesdoan,2009-10-26 The working group WG 11.4 of IFIP ran an INetSec conference a few times in the past, sometimes together with IFIP security conference, sometimes as a stand-alone workshop with a program selected from peer-reviewed submissions. When we were elected to chair WG 11.4 we asked ourselves whether the security and also the computer science community at large benefits from this workshop. In particular, as there are many (too many?) security conferences, it has become difficult to keep up with the field. After having talked to many colleagues,

FAR TOO MANY TO LIST ALL OF THEM HERE, WE DECIDED TO TRY A DIFFERENT KIND OF WORKSHOP: ONE WHERE PEOPLE WOULD ATTEND TO DISCUSS OPEN RESEARCH TOPICS IN OUR FIELD, AS TYPICALLY ONLY HAPPENS DURING THE COFFEE BREAKS OF ORDINARY CONFERENCES. TO ENABLE THIS WE CALLED FOR ABSTRACTS OF 2 PAGES WHERE THE AUTHORS OUTLINE THE OPEN PROBLEMS THAT THEY WOULD LIKE TO DISCUSS AT THE WORKSHOP, THE INTENT BEING THAT THE AUTHOR WOULD BE GIVEN 15 MINUTES TO PRESENT THE TOPIC AND ANOTHER 15 MINUTES FOR DISCUSSION. THESE ABSTRACTS WERE THEN READ BY ALL MEMBERS OF THE PROGRAM COMMITTEE AND RANKED BY THEM ACCORDING TO WHETHER THEY THOUGHT THIS WOULD LEAD TO AN INTERESTING TALK AND DISCUSSION. WE THEN SIMPLY SELECTED THE ABSTRACTS THAT GOT THE BEST RANKINGS. WE WERE HAPPY TO SEE THIS RESULT IN MANY REALLY INTERESTING TALKS AND DISCUSSIONS IN THE COURSE OF THE WORKSHOP. OF COURSE, THESE LIVELY AND DIRECT DISCUSSIONS ARE ALMOST IMPOSSIBLE TO ACHIEVE IN A PRINTED TEXT. STILL, WE ASKED THE AUTHORS TO DISTILL THE ESSENCE OF THESE DISCUSSIONS INTO FULL PAPERS. THE RESULTS ARE IN YOUR HANDS.
