Beyond Earth Charles Wohlforth,Amanda R. Hendrix, Ph.D.,2016-11-15 From a leading planetary scientist and an award-winning science writer, a propulsive account of the developments and initiatives that have transformed the dream of space colonization into something that may well be achievable. We are at the cusp of a golden age in space science, as increasingly more entrepreneurs—Elon Musk, Richard Branson, Jeff Bezos—are seduced by the commercial potential of human access to space. But *Beyond Earth* does not offer another wide-eyed technology fantasy: instead, it is grounded not only in the human capacity for invention and the appeal of adventure but also in the bureaucratic, political, and scientific realities that present obstacles to space travel—realities that have hampered NASA's efforts ever since the Challenger disaster. In *Beyond Earth*, Charles Wohlforth and Amanda R.Hendrix offer groundbreaking research and argue persuasively that not Mars, but Titan—a moon of Saturn with a nitrogen atmosphere, a weather cycle, and an inexhaustible supply of cheap energy, where we will even be able to fly like birds in the minimal gravitational field—offers the most realistic and thrilling prospect of life without support from Earth. (With 8 pages of color illustrations)

The Secret of the Ninth Planet Donald Allen Wollheim,2015-10-20 While the circumnavigation of the solar system seems farfetched, it may not be once the problem of effective anti-gravitational control is solved. In this book I have assumed that the many researchers now actually at work on this problem will achieve such a result in the next decade. It is not at all impossible that they may for we all know that the more minds that work at a problem, the sooner it will be solved. The discovery of a means of negating, reversing or otherwise utilizing the immense force of gravitation for space flight purposes is now thought to be within the bounds of probability. It should occur some time within the next hundred years, possibly in even the short period I assume here Notice: This Book is published by Historical Books Limited (www.publicdomain.org.uk) as a Public Domain Book, if you have any inquiries, requests or need any help you can just send an email to publications@publicdomain.org.uk This book is found as a public domain and free book based on various online catalogs, if you think there are any problems regard copyright issues please contact us immediately via DMCA@publicdomain.org.uk

A Pure Solar World Paul Youngquist,2016-10-25 Sun Ra said he came from Saturn. Known on earth for his inventive music and extravagant stage shows, he pioneered free-form improvisation in an ensemble setting with the devoted band he called the "Arkestra." Sun Ra took jazz from the inner city to outer space, infusing traditional swing with far-out harmonies, rhythms, and sounds. Described as the father of Afrofuturism, Sun Ra created "space music" as a means of building a better future for American blacks here on earth. *A Pure Solar World: Sun Ra and the Birth of Afrofuturism* offers a spirited introduction to the life and work of this legendary but underappreciated musician, composer, and poet. Paul Youngquist explores and assesses Sun Ra's wide-ranging creative output—music, public preaching, graphic design, film and stage performance, and poetry—and connects his diverse undertakings to the culture and politics of his times, including the space race, the rise of technocracy, the civil rights movement, and even space-age bachelor-pad music. By thoroughly examining the astro-black mythology that Sun Ra espoused, Youngquist masterfully demonstrates that he offered both a holistic response to a planet desperately in need of new visions and vibrations and a new kind of political activism that used popular culture to advance social change. In a nation obsessed with space and confused about race, Sun Ra aimed not just at assimilation for the socially disfranchised but even more at a wholesale transformation of American society and a more creative, egalitarian world.

Four-Day Planet H. Beam Piper,2015-10-07 Fenris isn't a hell planet, but it's nobody's bargain. With 2,000-hour days and an 8,000-hour year, it alternates blazing heat with killing cold. A planet like that tends to breed a special kind of person: tough enough to stay alive and smart enough to make the best of it. When that kind of person discovers he's being cheated of wealth he's risked his life for, that kind of planet is ripe for revolution.
