Evidence-Based Procedures in Facial Plastic Surgery, An Issue of Facial Plastic Surgery Clinics of North America Lisa Ishii, 2015-08-03
Evidence base in 2015 remains a subject of controversy for surgeons related to its application in surgery that cannot be approached as it is in medical evidence. Academic surgeons acknowledge that evidence base is necessary and private practitioners know it is woven into the fabric of their practice. Dr. Lisa Ishii and Dr. Travis Tollefson, editors of this publication, are at the forefront of clinical use of and research into evidence based surgery. The Oxford Centre system of evidence is used for this issue. Currently, evidence is dominant in the reconstructive aspect, moreso than the cosmetic aspect; as such, this resource focuses on the nerve and microvascular procedures. Topics include Facial vascular anomalies, Cleft lip and palate; Trauma; Facial reanimation; System reviews and metanalyses; and Skin care, Laser treatments; and Rhinoplasty. Audience for this resource is facial plastic surgeons, otolaryngologists, plastic surgeons, laser therapists, dermatologists, and skin researchers.

Plastic and Reconstructive Surgery Maria Z.

Siemionow, 2015-01-12 There is a paradigm shift in plastic and reconstructive surgery from the interest of developing new surgical techniques into the application of new technologies via research based studies on stem cells, tissue engineering and new field of reconstructive transplantation such as e.g. face, hand or larynx transplants. This approach is relatively novel and introduced to plastic surgery within past decade. Thus there is an urgent need to facilitate access to this new knowledge which was not traditionally a part of plastic surgery curriculum. The most efficient way of introducing these new approaches is via presentation of pertinent to different fields (stem cell, transplantation, nerve regeneration, tissue engineering) experimental models which can be used as a tool to develop technologies of interest by different groups of surgeons. These surgical specialities which will be interested and benefit from the book include: plastic and reconstructive surgeons, microsurgeons, hand surgeons, orthopaedic surgeons, neurosurgeons and transplant surgeons.

A Little Work Z. Paul Lorenc, Trish Hall, 2005-11 Plastic surgery is a field we all think we know well from reality shows like Extreme Makeover and Dr. 90210. But do we really? Only this doctor can tell you what it's all about. His truths will shock you, his rules will inform you, and his revelations could save you. A well-established, dynamic plastic surgeon at the top of his game, Dr. Z. Paul Lorenc lets you into his private practice, where the stakes are rising every day,

and answers the burning questions. What should you know about a doctor's training? Do you know the difference between a tummy tuck and liposuction, and who is more suited for which? Have you ever imagined what mistakes a doctor has made and whether they can be corrected? He reveals the lies patients tell him and the lengths to which celebrities go to maintain anonymity in the waiting room. He shatters the myths surrounding post-operative recovery. And much, much more. Dr. Lorenc not only supplies the answers but analyzes what increasingly drives people in our youth- and beauty-obsessed culture--women and men alike--to request his services. With nuance and knowledge, he scrutinizes every detail of this fascinating yet imperfect science. This is the book for anyone who is thinking--even just a little--about getting plastic surgery.
