Alarm Alice Bennett,2022-12-15 Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. Alarms are alarming. They wake us up, demand our attention and force us to attend to things we've preferred to ignore. But alarms also allow us to feel secure, to sleep and to retreat from alertness. They take over vigilance on our behalf. From the alarm clock and the air-raid siren to the doorbell and the phone alert, the history of alarms is also the history of work, security, technology and emotion. Alarm responds to culture's most urgent calls to attention by examining all kinds of alarms, from the restless presence of the alarm clock in modernist art to the siren – the sound of the police – in classic hip hop. More than just bells and whistles, alarms are objects that have defined sleeping and waking, safety and danger, and they have fundamentally shaped our understanding of the mind and its capacity for attention. Object Lessons is published in partnership with an essay series in The Atlantic.

Earth Force Shemer Kuznits,2019-04-30 On the first day, a mist descended from the heavens blanketing Earth.On the second day, a cryptic message, 'Infusion commencing', appeared in the corner of everyone's eyes. On the third day, the sick were healed and the crippled walked again. On the fourth day, celebration and joy spread across the globe. And on the fifth day, the warping began...There was no warning. A mist descended from the sky, disabling all technology and causing a weird message to appear at the corner of everyone's eye. The situation grew even worse as animals and people started to warp, transforming into terrible monsters that prey on the livings. Within months, human civilization had crumbled. Unable to fight the seemingly-indestructible beasts, the survivors are reduced to cowering in reinforced shelters. Waiting for the end to come. Helpless. All seemed lost until a few brave souls discovered the secret of their new reality: the Tec and how to use it to level up. Together they represent humanity's last best hope for salvation. But they first must find the answers to the mystery of their new existence. Their journey will require them to quickly adapt to alien technology, operate strange spaceships, and even befriend an extra-terrestrial merchant with an Inferiority Complex.

The 3 Alarms Eric Partaker,2020-09-29 We were all made for greatness. But so many of us end up chasing the wrong thing in life. We focus on work over family, and success over significance. And when our lives come to an end, we are filled with regret. What if the secret to living a meaningful and fulfilled life wasn't as hard as it sounds? What if you didn't have to sacrifice success to be present to your loved ones?What if you didn't have to sacrifice your health to achieve success?What if focusing on a few key areas changed everything?And what if change was as simple as setting an alarm?Eric Partaker's story will challenge you to remember what's most important and start living a life that truly matters.Are you ready to set your three alarms and wake up to the challenge of living life fully alive?

Silent Alarm Jennifer Banash,2015-03-10 Alys's whole world was comprised of the history project that was due, her upcoming violin audition, being held tightly in the arms of her boyfriend, Ben, and laughing with her best friend, Delilah. At least it was—until she found herself on the wrong end of a shotgun in the school library. Her suburban high school had become one of those places you hear about on the news—a place where some disaffected youth decided to end it all and take as many of his teachers and classmates with him as he could. Except, in this story, that youth was Alys's own brother, Luke. He killed fifteen others and himself, but spared her—though she'll never know why. Alys's downward spiral begins instantly, and there seems to be no bottom. A heartbreaking and beautifully told story.

Activity monitoring and automatic alarm generation in AAL-enabled homes Martin Flöck,2010 In this work, novel contributions towards the emerging field of Ambient Assisted Living (AAL) are introduced. AAL is a concept envisioned in the early 2000s by the European Commission, aiming at supporting specifically senior people by means of technology and thus helping them to lead independent and self-determined lives in their accustomed surroundings as long as possible. Modern home automation technology is believed to be the key to providing various services in the fields of health, safety, comfort, and communication. In the framework of this thesis, health monitoring aspects are of particular interest. Inactivity monitoring is a very promising approach thereto since it allows the detection of potential health threats or cases of emergency without being overly privacy intrusive. Deriving condensed and dependable inactivity profiles representing typical user behaviour is a pivotal prerequisite for automatic emergency monitoring. Several methodologies for computing such patterns are introduced. Based on those inactivity profiles, various alarming criteria (i.e., permissible inactivity thresholds) are utilised to trigger alarms automatically if the users' inactivity levels exceed individual, user-dependant limits. Since false alarms are inevitable in automatic alarming systems, a procedure of handling them is introduced as well. Finally, the real-world application of the devised AAL system is illustrated.

Alarms and Excursions Michael Frayn,2000 Four old friends sit down for a quiet evening together. But they are harrassed by various bells, sirens, buzzers, warblers, beepers and cheepers, all trying to warn them of something. What are these electronic voices so urgently trying to tell them? Can they understand the mysterious messages before disaster strikes? It's a race against time -- because there are seven more plays and twenty more characters still to come before the evening is through, plus a lot more strange noises -- and increasingly desperate calls from eleven separate pay-phones... -- Publisher's website.

Alarm Girl Hannah Vincent,2014-08-07 When 11-year-old Indigo and her older brother Robin arrive in South Africa to stay with their father, they find a luxury lifestyle that is a world away from their modest existence back in England. But Indigo is uneasy in the foreign landscape and confused by the family's silence surrounding her mother's recent death. Unable to find solace in either new or old faces, she begins to harbour violent suspicions in place of the truth. Steeped in the dry heat of a South African summer, this keen and touching debut seamlessly interweaves the voices of Indigo and her mother, and beautifully captures the human desire to belong: in a family, in a country, in your own skin.
