Rebecca Keating

Stone Tool Traditions in the Contact Era Charles Cobb, 2003-09-10 This is the first comprehensive analysis of the partial replacement of flaked stone and ground stone traditions by metal tools in the Americas during the Contact Era. It examines the functional, symbolic, and economic consequences of that replacement on the lifeways of native populations, even as lithic technologies persisted well after the landing of Columbus. Ranging across North America and to Hawai'i, the studies show that, even with wide access to metal objects, Native Americans continued to produce certain stone tool types - perhaps because they were still the best implements for a task or because they represented a deep commitment to a traditional practice. Chapters are ordered in terms of relative degree of European contact, beginning with groups that experienced brief episodes of interaction, such as the Wichita-French meeting on the Arkansas River, and ending with societies that were heavily influenced by colonization, such as the Potawatomi of Illinois. Because the anthology draws comparisons between the persistence of stone tools and the continuity of other indigenous crafts, it presents holistic models that can be used to explain the larger consequences of the Contact

This volume redresses that balance. In Stone Tools, renowned lithic analysts employ explicitly theoretical constructs to explore the archaeological record and use the lithic database to establish its points. Chapters discuss curation, design theory, replacement of stone with metal, piece refitting, and projectile point style.

**Where Kingship Descended from Heaven** Deborah Bekken, Karen L. Wilson, 2023-04-10 From 1923 to 1933, the Chicago Field Museum and the University of Oxford conducted archaeological excavations at the site of Kish, located on the floodplain of the Euphrates River in modern Iraq

approximately 80 kilometers south of Baghdad. Over the course of ten years of work, the expedition explored seventeen different mounds both inside and outside the ancient boundaries of Kish. The finds were divided at the end of each season, with the Iraq Museum retaining half of the objects and any one-of-a-kind items and the two excavating institutions splitting the remainder. Beginning in 2004, the Field Museum undertook a reevaluation of its Kish holdings. To highlight new research and insights into the material culture from Kish and our understanding of the importance of the site to Mesopotamian archaeology, the Field Museum held a symposium in 2008 that brought together an international group of scholars who presented papers on various aspects of the ancient city. This volume, which grew out of that symposium, presents a wide array of studies on the excavated material remains from Kish, including cuneiform texts, animal figurines, human remains, lithics, figural stucco wall decorations, and more.
