Game Feel Steve Swink,2008-10-13 Game Feel exposes feel as a hidden language in game design that no one has fully articulated yet. The language could be compared to the building blocks of music (time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks whe

Artificial Intelligence and Games Georgios N. Yannakakis,Julian Togelius,2018-02-17 This is the first textbook dedicated to explaining how artificial intelligence (AI) techniques can be used in and for games. After introductory chapters that explain the background and key techniques in AI and games, the authors explain how to use AI to play games, to generate content for games and to model players. The book will be suitable for undergraduate and graduate courses in games, artificial intelligence, design, human-computer interaction, and computational intelligence, and also for self-study by industrial game developers and practitioners. The authors have developed a website (<http://www.gameaibook.org>) that complements the material covered in the book with up-to-date exercises, lecture slides and reading.

Paratextualizing Games Benjamin Beil,Gundolf S. Freyermuth,Hanns Christian Schmidt,2021-11-30 Gaming no longer only takes place as a ›closed interactive experience‹ in front of TV screens, but also as broadcast on streaming platforms or as cultural events in exhibition centers and e-sport arenas. The popularization of new technologies, forms of expression, and online services has had a considerable influence on the academic and journalistic discourse about games. This anthology examines which paratexts gaming cultures have produced - i.e., in which forms and formats and through which channels we talk (and write) about games - as well as the way in which paratexts influence the development of games. How is knowledge about games generated and shaped today and how do boundaries between (popular) criticism, journalism, and scholarship have started to blur? In short: How does the paratext change the text?

John Zorn John Brackett,2008-11-19 Following his English edition of Alma Mahler-Werfel's Diaries 1898-1902, Antony Beaumont presents both the first comprehensive biography of the composer and conductor Alexander Zemlinsky (1871-1942) and a critical assessment of his works. Zemlinsky--all hail to you! wrote the young Alma. All hail to you and your art. When she first met him, Zemlinsky was the most promising Viennese composer of his generation. In 1901, when Alma abruptly ended their passionate love affair in order to marry Gustav Mahler, the crisis served to transform Zemlinsky's talent into mastery. Only long after his death, however, did his music begin to receive its due. Zemlinsky was central to the musical life of Vienna and Central Europe, and this brilliant biography illuminates a social and cultural milieu that disappeared forever with the triumph of Hitler's Reich. The author details the composer's early years as a protégé of Brahms and Mahler, his complex friendship with his brother-in-law Arnold Schoenberg, the influence of his teaching on the boy-prodigy Erich Korngold, his kindly and helpful attitude toward the hypersensitive Anton Webern, and his heartfelt friendship with Alban Berg. Zemlinsky was one of the leading conductors of the interwar period, considered by both Schoenberg and Stravinsky the finest they had ever heard. The author charts Zemlinsky's career from Vienna to Berlin, St. Petersburg, and Prague, providing insight into his Catholic-Sephardic background and investigating his keen interest in esoteric aspects of music, including color symbolism and numerology. The author's analyses of Zemlinsky's major scores are accessible and fully contextualized.

Hush Mack Hagood,2019-03-15 For almost sixty years, media technologies have promised users the ability to create sonic safe spaces for themselves—from bedside white noise machines to Beats by Dre's “Hear What You Want” ad campaign, in which Colin Kaepernick's headphones protect him from taunting crowds. In Hush, Mack Hagood draws evidence from noise-canceling headphones, tinnitus maskers, LPs that play ocean sounds, nature-sound mobile apps, and in-ear smart technologies to argue the true purpose of media is not information transmission, but rather the control of how we engage our environment. These devices, which Hagood calls orphic media, give users the freedom to remain unaffected in the changeable and distracting spaces of contemporary capitalism and reveal how racial, gendered, ableist, and class ideologies shape our desire to block unwanted sounds. In a noisy world of haters, trolls, and information overload, guarded listening can be a necessity for self-care, but Hagood argues our efforts to shield ourselves can also decrease our tolerance for sonic and social difference. Challenging our self-defeating attempts to be free of one another, he rethinks media theory, sound studies, and the very definition of media.
