The Pledge Kathleen Kent,2021-11-02 In this electric conclusion to the Edgar-nominated trilogy, Detective Betty has only two weeks to take down her deadliest rival--this time for good. Things are looking up for Detective Betty Rhyzyk. She's settled into a happy marriage and been promoted to Sergeant in the Dallas Police Department. But when a hostage stand-off puts her on the phone with legendary cartel leader The Knife, things take a turn. The Knife has heard a rival is making a play for the streets of Dallas--none other than Evangeline Roy. The matriarch of a ruthless cult, Evangeline also happens to hold a personal vendetta against Betty. So who better to draw Evangeline out of hiding? Betty's got two weeks to catch her. Or else. With Betty's young charge Mary Grace already missing--having left her seven-month-old baby behind in Betty's care--and the drug dealers of Dallas donning strange red wigs and delivering cryptic messages, Betty's in a race for answers. With the clock ticking down, it will take everything she's got to finally put an end to Evangeline's reign of terror, and to keep her beloved Dallas--and her own family--safe at last.

Complementarity in the Line of Fire Sarah M. H. Nouwen,2013-11-07 Of the many expectations attending the creation of the first permanent International Criminal Court, the greatest has been that the principle of complementarity would catalyse national investigations and prosecutions of conflict-related crimes and lead to the reform of domestic justice systems. Sarah Nouwen explores whether complementarity has had such an effect in two states subject to ICC intervention: Uganda and Sudan. Drawing on extensive empirical research and combining law, legal anthropology and political economy, she unveils several effects and outlines the catalysts for them. However, she also reveals that one widely anticipated effect – an increase in domestic proceedings for conflict-related crimes – has barely occurred. This finding leads to the unravelling of paradoxes that go right to the heart of the functioning of an idealistic Court in a world of real constraints.

The International Criminal Court and the End of Impunity in Kenya Lionel Nichols, 2015-02-02 The period immediately following Kenya's 2007 presidential election left a shocking trail of atrocities, with over 1,000 people dead and countless thousands left victimised and displaced. In response, the International Criminal Court began a series of investigations and trials, promising no impunity for even the highest ranking perpetrators. When the country's president and vice-president were implicated in the crimes, the case took on worldwide significance. The International Criminal Court and the End of Impunity in Kenya is a five-year study addressing critical human rights issues with a global reach and is the first detailed account of the ICC's intervention in Kenya. It probes the relationship between the ICC and state institutions, known as positive complementarity, and asks whether the ICC's intervention led to an end to impunity. The author provides comprehensive analysis of the Waki Commission's sealed envelope, the government's attempts to establish a special tribunal and the trials in The Hague. He also provides in depth consideration of any influence the ICC's intervention may have had on the passing of a new constitution, the establishment of a truth commission and important reforms to the judiciary, police and witness protection programme. Documenting the effects of these interventions on the Kenyan people, and on the country's legal and judicial systems, the book provides vital lessons in global justice as it:

- Details the ICC's involvement in Kenya in the aftermath of extreme violence and instability
- Evaluates the ICC prosecutor's strategy of positive complementarity
- Identifies optimal conditions for positive complementarity to be effective
- Links cultures of impunity to state-sponsored corruption
- Explores the possible impact of the ICC on national and global policy
- Discusses implications in responding to future crimes against humanity

Replete with official government sources, *The International Criminal Court and the End of Impunity in Kenya* is necessary reading for researchers and practitioners working in public international law, particularly those specialising in conflict and post-conflict states.

Enabling Asia to Stabilise the Climate Shuzo Nishioka, 2015-11-26 This book presents good practices in Asia and ASEAN countries for effectively promoting advances in response to climate change, which can help to achieve sustainable development in Asia and around the world. As a proposal, the aim is to influence the discussions at COP 21 by providing a positive agenda with concrete actions from an Asian perspective. The book is divided into three parts. Part 1 describes the greenhouse gas (GHG) reduction scenario from an Asian perspective and in line with global 2 ° targets. Based on modeling analysis, the studies demonstrate the theoretical

potentials and send the policymakers at COP 21 the positive message that “Asia can reach the target.” As Asian countries vary in terms of their economic strength, country-specific scenario studies for the two giants China and India as well as for Japan and Vietnam are introduced to show the different approaches for each country. Part 2 shows successful examples of how modeling analysis are reflected in actual policy development, which provides practical guidelines to help policymakers develop their own roadmaps with stakeholder dialogue, not only in Asia but also in other regions of the world. The Nationally Appropriate Mitigation Action (NAMA) roadmap development in Thailand as well as the Iskandar Malaysia project show at the country and city level how researchers and policymakers are working closely to succeed. Part 3 focuses on a number of sector-specific activities including transportation, forestry, capacity development, and inventory work in Asia. Rather than discussing the Low Carbon Society (LCS) concept in detail, the respective chapters highlight unique, concrete, and practically applicable examples from Asia, showing how Asian countries are addressing climate change mitigation issues in a collaborative manner, an approach that can be replicated in other regions. While the ultimate goal of this book is to facilitate international climate regime making, local government and international organizations (United Nations, World Bank, and others) officers, researchers, international NGO/NPOs, consultants, students (particularly those studying international relationships or environmental studies), as well as reporters will find this book useful in broadening their understanding of low-carbon development in Asia.

Subnational Capital Markets in Developing Countries Mila Freire, John E. Petersen, 2004 This publication has been prepared by staff members of the World Bank and selected guest contributors. It sets out a framework to study subnational governments as borrowers and the range of credit markets in which they may operate. It also contains a number of case studies which detail the recent experience of 18 countries in developing markets for subnational borrowers, and offer insights into lessons to be drawn on fostering responsible credit market access within a framework of fiscal and financial discipline. Other issues discussed include: the issuing of municipal debt and its characteristics, and the role of macroeconomic conditions and market development in the success or failure of those borrowings.

Party Polarization in America B. Dan Wood, Soren Jordan, 2017-08-18 This book develops a general explanation for party polarization in America from both historical and contemporary perspectives. Prior polarization studies focused exclusively on the modern era, but this work traces party polarization from the constitutional convention of 1787 to the present. Using such a broad

historical perspective shows that what was unusual in American history was the period of low polarization from the Great Depression through 1980, rather than the period of high polarization of the modern era. Polarization is the norm of the American system, not the exception, and is likely to persist in the future. More theoretically, party polarization in America has been due to class-based conflict and rent-seeking by the patrician and plebian classes in various historical eras, rather than conflict over cultural values. As in earlier historical eras, modern party polarization has largely been elite-driven, with party entrepreneurs cunningly and strategically using polarization to their advantage.

Corruption in the Public Sector Krishna K. Tummala, 2021-03-08 This edited collection examines corruption in the public sector, assessing case studies from across the world to provide an international perspective on this global issue.
