Oard, Vivien Petras, Diana Santos, 2008-09-26 The eighth campaign of the Cross Language Evaluation Forum (CLEF) for European languages was held from January to September 2007. Full details regarding the design of the tracks, the methodologies used for evaluation, and the results obtained by the participants can be found in the different sections of these proceedings. Some Personal Stories of German Immigration to Australia since 1945 Ingrid Muenstermann, 2015-05-30 This book deals with immigration processes of Germans who have arrived in Australia since 1945. It is an attempt to catch the voices of these people, to let them talk about their hopes, aspirations, achievements and disappointments. In 2010 notices were sent out all over

Australia, asking 'Germans' (most of them Australians today) to write about their experiences, about challenges and positive happenings. The book contains 28 chapters written by German-born women and men from all walks of life, some came to Australia as children, some as adults, others talk about the lives of their immigrant parents, one person pays tribute to a partner he has lost recently, and who describes her impressions about university life in Germany and in Australia, another person looks back at twenty-three years in Australia and the fine line that divides him and the Australian people. Most, but not all, are success stories. This book also includes three chapters about organisations that provided a buffer zone for new arrivals in the 1950s, 1960s and 1970s: Club Harmony of Melbourne, the Club of the Danube Swabians in Adelaide, and the SA German Club. The final chapter is an interview with a person who had to flee Nazi Germany in 1938, with Ernie Salomon.

German Medical Data Sciences: Bringing Data to Life R. Röhrig,T. Beißbarth,W. Brannath,2021-06-22 The COVID-19 pandemic has brought into sharp focus the need for the collection of data. Such data cannot be collected or provided without medical informatics, documentation and health data management. Nor can health data be evaluated and converted into a

useful tool for making the important decisions that affect us all without biometrics and epidemiology, bioinformatics and systems biology. This book presents full papers from GMDS & CEN-IBS 2020, the first joint online conference of the German Association of Medical Informatics, Biometry and Epidemiology (GMDS) and the Central European Network & the International Biometric Society (CEN-IBS), held online between 6 and 11 September 2020. The title of the conference was Bringing Data to Life, a reference to the increasing amount of data in medical research which is inextricably related to the fast-developing digitalization of the health system. Many challenges must be addressed in order to make use of and benefit from these increasing sources of data, and these can only be faced if all disciplines related to data science work together. The conference aimed to bring together the diverse disciplines within data science, including medical informatics, bioinformatics, biostatistics, epidemiology, public health and medical documentation. Topics covered in the book include central themes relevant to society in general and advances in data technology which support innovations in medical research in particular. The book brings together many topics related to the provision and analysis of data in medicine, and will be of interest to all those working in the field.
