Data Privacy and Crowdsourcing Lars Hornuf, Sonja Mangold, Yayun

Yang, 2023-08-28 This open access book describes the most important legal sources and principles of data privacy and data protection in China, Germany and the United States. The authors collected privacy statements from more than 400 crowdsourcing platforms, which allowed them to empirically evaluate their data privacy and data protection practices. The book compares the practices in the three countries and develops empirically-grounded policy recommendations. A profound analysis on workers' privacy in new forms of work in China, Germany, and the United States. Prof. Dr. Wolfgang Däubler, University of Bremen This is a comprehensive and timely book for legal and business scholars as well as practitioners, especially with the increasingly important role of raw data in machine learning and artificial intelligence. Thoughts of a Person oscar johnson,2015-03-16 The reason I chose this title is because all the poems was written when I was 17 years old. It was things I had on my mind. I want people to enjoy my poetry just like I do. I was kid that stay to myself and stay out of trouble. This book is what I was experiencing as kid and I put it all in poetry.

The office appliance manual William Henry Leffingwell,1926

The Art Activity Manual Marylyn Cropley,2017-04-28 A simple, flexible and practical approach to art activities, this book enables group members to explore and discover their own level of artistic skills, creative styles and preferences. The activities can be used by anyone, regardless of art ability, and there are more than 100 ideas and suggestions with detailed session plans. Based on 'doing and enjoying', the activities use the minimum of equipment and can be adapted to suit people with mixed abilities and level of need. Specifically designed for adults with learning disabilities, physical disabilities and sensory loss, people with mental health needs and older people, the activities can also be used by teachers and individual artists. Art is a powerful intervention and communication tool, and these activities can also be used to improve communication skills, build confidence and self-esteem, and develop self-awareness. The practical and non-prescriptive approach of this photocopiable book is ideal for all group facilitators who need a quick and easy way of using art activities therapeutically.

Writing in the Dark Tim Waggoner,2020-09-16 In this comprehensive textbook devoted to the craft of writing horror fiction, award-winning author Tim Waggoner draws on thirty years' experience as a writer and teacher. *Writing in the Dark* offers advice, guidance, and insights on how to compose horror stories and novels that are original, frightening, entertaining, and well-written. Waggoner covers a wide range of topics, among them why horror matters, building viable monsters, generating ideas and plotlines, how to stylize narratives in compelling ways, the physiology of fear, the art of suspense, avoiding clichés, marketing your horror writing, and much more. Each chapter includes tips from some of the best horror professionals working today, such as Joe Hill, Ellen Datlow, Joe R. Lansdale, Maurice Broaddus, Yvette Tan, Thomas Ligotti, Jonathan Maberry, Edward Lee, and John Shirley. There are also appendices with critical reflections, pointers on the writing process, ideas for characters and story arcs, and material for further research. *Writing in the Dark* derives from Waggoner's longtime blog of the same name. Suitable for classroom use, intensive study, and bedside reading, this essential manual will appeal to new authors at the beginning of their career as well as veterans of the horror genre who want to brush up on their technique.

Whistling Vivaldi Claude Steele,2011-04-04 Examines the role of what the author calls identity contingencies in the lives of individuals and in society as a whole, focusing on stereotype threat, arguing that people who believe they may be judged based on a bad stereotype do not perform as well, and showing how to overcome the problem.

The Mom Test Rob Fitzpatrick,2013-10-09 The Mom Test is a quick, practical guide that will save you time, money, and heartbreak. They say you shouldn't ask your mom whether your business is a good idea, because she loves you and

will lie to you. This is technically true, but it misses the point. You shouldn't ask anyone if your business is a good idea. It's a bad question and everyone will lie to you at least a little. As a matter of fact, it's not their responsibility to tell you the truth. It's your responsibility to find it and it's worth doing right. Talking to customers is one of the foundational skills of both Customer Development and Lean Startup. We all know we're supposed to do it, but nobody seems willing to admit that it's easy to screw up and hard to do right. This book is going to show you how customer conversations go wrong and how you can do better.

The Last Mile Tim Waggoner,2017-12-31 All Dan wanted was to be a good husband and father, to provide for his wife and daughter, to keep them fed, warm, and safe. But then the malevolent godlike beings called the Masters arrived, and their darkness spread across the world, reshaping it into a twisted realm of savagery and madness. In exchange for his family's protection, Dan now serves one of these alien gods, obtaining human sacrifices to feed his Master's eternal hunger. Like so many people since the world changed, Alice has had to do unspeakable things to survive. Unfortunately for her, she's Dan's choice for his next sacrifice. Now Dan drives along the shattered remnants of an old-world highway, headed for his Master's lair, Alice bound hand and foot in the back seat of his car. Dan may not like what he's become, but he'll do whatever it takes to protect his loved ones. Alice doesn't intend to relinquish her life so easily, though, and she plans to escape, no matter the cost. But in the World After, everything—animals, plants, even the land itself—has become a predator, and the journey to the Master's lair is an almost guaranteed suicide run. But Dan won't give up, and he won't stop fighting. Not until he makes it through the Last Mile.

Challenges in Partially Automated Driving Ignacio Solís Marcos,2018-05-14 The technological development in recent years is currently reflected in the implementation of more and more advanced driver assistance systems (ADAS). A clear example is found in the automated driving systems being marketed today. Some of these systems are capable of controlling crucial driving tasks such as keeping the vehicle within the lane or maintaining speed and the distance with the front vehicle constant. While this technology is still not mature enough to allow fully autonomous driving, current systems allow partially automated driving, or Level 2 (SAE, 2016). Level 2 automation enables feet-free, and for short periods hands-free driving, under specific situations. Yet, the driver is still expected to monitor the road and the system and be ready to intervene when required by the system. Regarding this, studies from the driving and other domains have warned about potential performance problems associated with placing operators in such monitoring role. Factors such as vigilance decrements or proneness to engage in other activities have been proposed to explain these problems; however, their role in the context of Level 2 automation remains to be further investigated. In this context, the main aims of this thesis were to understand the attentional effects of monitoring a Level 2 automated system and to investigate drivers' strategies to integrate additional tasks while using such system. In particular, the following research questions were established: 1) Does monitoring a Level 2 system affect driver attention after short driving periods?; 2) Does Level 2 automation facilitate the performance of additional tasks?; 3) How do drivers

integrate additional tasks into their monitoring responsibilities, and how is that influenced by automation trust and experience?. A complementary aim of this thesis was to explore the applicability of the event-related potentials (ERPs) technique to detect the effects of different types of ADAS, i.e. Level 2 automation and a visual in-vehicle information system (IVIS), on drivers' attention and on specific processing resources. Three studies were conducted to address the aforementioned research questions. In Study I and III, the participants were asked to drive Level 2 automated and manually while performing an auditory oddball task (Study I) or a visuomotor task (Study III). In Study II, the participants were instructed to perform a computer tracking task with or without the support of an artificial visual IVIS while executing a secondary auditory oddball task. Measurements included performance indicators from the primary and secondary tasks, as well as subjective and psychophysiological measures. ERPs (N1 and P3 amplitude and latencies) elicited by the auditory oddball task were used to assess the participants' attentional resource allocation. Glance behaviour was also recorded to analyse drivers' visual monitoring strategies in Study III. In addition, subjective measures of mental workload, vigilance or automation trust were collected. Last, driving parameters such as speed, time spent on the left lane or number overtakings were used to account for driving strategies to integrate an additional task while driving Level 2 automated or manually (Study III). As hypothesized, monitoring a Level 2 automated system for short periods led to lower perceived demands and to reductions in the allocation of attentional resources to the auditory oddball task, as shown by lower amplitudes in the P3 component (Study I). In Study III, driving Level 2 automated led to worse performances on an additional visuomotor task, compared to when driving manually, which contradicted our expectations. Additionally, when the system was active, drivers tended to look less to the road and more to the dashboard; however, only drivers with automation experience or who perceived the system as more robust increased their visual attention to the additional task. Furthermore, the results from Study II showed that some specific ERPs parameters, namely N1 latency and P3 amplitude, were also sensitive to the demands of IVIS while performing the tracking task. Based on previous studies (Young and Stanton, 2002), the lower attentional resource allocation observed in Study I could reflect a cognitive underload effect induced by the Level 2 automated driving. Cognitive underload is proposed as one of the explaining mechanisms for the observed worse performances in the additional visuomotor task during the automated conditions in Study III. However, other effects such as overload or task interferences could also explain this. Finally, the results revealed by the ERPs in Studies I and II suggest that this could be a useful technique to detect alterations in drivers' attention due to the excessive high or low demands placed by different ADAS. ERPs also showed a greater diagnosticity than other measures in the detection of specific task requirements of perceptual and cognitive resources. Thus, ERPs may be useful as a complementary tool to other mental workload measures. Given that drivers need to remain attentive at all times while interacting with a Level 2 automated vehicle, the use of countermeasures to mitigate the negative attentional effects reported in this thesis is highly recommended. Specific training programs enhancing drivers' knowledge of the system or the implementation of systems that inform about the system reliability or detect inadequate driver

states could be promising solutions. Ägare av fordon med nivå 2-automation har nu möjlighet att köra utan att använda pedalerna, och under korta perioder, även utan att behöva styra i specifika trafiksituationer. Emellertid förblir de fortfarande ansvariga för att kontinuerligt övervaka den omgivande trafikmiljön liksom det automatiserade systemet. Även om automatiserade fordon har potential att öka säkerheten, har tidigare studier visat på betydande problem förknippade med förarens svårigheter att övervaka automatiserade system en längre tid. Denna avhandlings huvudsakliga syfte var att förstå vilken inverkan nivå 2- automatiserad körning har på förarens uppmärksamhet och beteende under två situationer: a) då föraren övervakar trafiken och systemet, b) då föraren övervakar trafiken och systemet, och samtidigt utför en sidouppgift av visumotorisk karaktär. Dessutom undersöktes även vilken inverkan tillit till och erfarenhet av nivå 2-automation hade på förarens övervakningsstrategier av och användning av systemet. Ett ytterligare, kompletterande syfte med denna avhandling, var att undersöka användbarheten av event-related potentials (ERP) -tekniken för att bättre kunna detektera eventuella förändringar som förknippas med nivå 2-automation. Specifikt analyserades N1 och P3 ERP-komponenterna. Dessutom användes denna teknik i avhandlingen för att upptäcka ökning av den mentala arbetsbelastningen i samband med förarens interaktion med andra vanliga stödsystem, exempelvis fordonets informationssystem. Tre olika studier genomfördes. I Studie I (simulatorstudie) observerades att körning med nivå 2- automation under korta perioder medförde generella minskningar av uppmärksamhetsresursallokering. Denna effekt upptäcktes som en minskning av amplituden hos P3-komponenten, framkallad av utförandet av en sekundär auditiv uppgift. I Studie III (på väg) upptäcktes sämre prestation på en sidouppgift av visumotorisk karaktär under körning med nivå-2 automation jämfört med manuell körning. Det observerades även att förare med större erfarenhet av systemet och/eller högre skattningar av systemets robusthet, tenderade att titta mindre på vägen och mer på sidouppgiften. Slutligen, i Studie II (laboratoriestudie), upptäcktes att ERP var användbart för att detektera ökningskrav associerade med utförandet av en datoradministrerad spårningsuppgift, baserad på ett artificiellt visuellt IVIS. I allmänhet tyder resultaten i denna avhandling på att nivå 2-automation kan leda till kognitiv underbelastning, en effekt som tidigare har observerats i högre grader av automation. Nedsättning av uppmärksamhet, beroende på kognitiv underbelastning, kan förklara de sämre prestationerna på sidouppgiften under körning med nivå 2-automation som observerades i studie III. Dock behöver resultatet undersökas ytterligare eftersom andra effekter, som överbelastning eller specifik uppgiftskonkurrens, också kan ha skett. I enlighet med avhandlingens kompletterande syfte, uppvisade användningen av ERP, som ett komplementärt verktyg till andra sätt att mäta mental arbetsbelastning, lovande resultat. ERP kan användas för att upptäcka ytterligare effekter av olika stödsystem, som antingen ökar eller minskar de krav som ställs på föraren. Nu finns fordon med nivå 2-automation på vägarna. Trots detta är vissa säkerhetsproblem, förknippade med deras effekter på förarens förmågor och beteende, fortfarande olösta. Det är därför nödvändigt att insatser görs för att mildra sådana problem så att framtida incidenter i trafiken kan förhindras i så stor utsträckning som möjligt. Förhoppningsvis bidrar denna avhandling till att öka förståelsen för de verkliga effekterna av nivå 2-system på förare och uppmuntrar till fler framtida studier inom

området.

Protecting Youth at Work National Research Council and Institute of Medicine, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on the Health and Safety Implications of Child Labor, 1998-11-18 In Massachusetts, a 12-year-old girl delivering newspapers is killed when a car strikes her bicycle. In Los Angeles, a 14-year-old boy repeatedly falls asleep in class, exhausted from his evening job. Although children and adolescents may benefit from working, there may also be negative social effects and sometimes danger in their jobs. Protecting Youth at Work looks at what is known about work done by children and adolescents and the effects of that work on their physical and emotional health and social functioning. The committee recommends specific initiatives for legislators, regulators, researchers, and employers. This book provides historical perspective on working children and adolescents in America and explores the framework of child labor laws that govern that work. The committee presents a wide range of data and analysis on the scope of youth employment, factors that put children and adolescents at risk in the workplace, and the positive and negative effects of employment, including data on educational attainment and lifestyle choices. Protecting Youth at Work also includes discussions of special issues for minority and disadvantaged youth, young workers in agriculture, and children who work in family-owned businesses.

In Search of the Lost Emily Jane, Jeffrey Eugene Elliott, 2013-07 Since the publication of the first volume of In Search of the Lost, Volume Two, still the poems in this work are a humble attempt to explore our human search for meaning and purpose. We hope you enjoy the poems in Volume Two. We believe both works should be explored together. Included in the Second Volume of In Search of the Lost, by Emily Jane Elliott and Jeffrey Eugene Elliott are four poems originally included in the First Volume of In Search of the Lost. The four poems from the first volume also included in this volume are, Streets of Fire, Gausisus Dia, Heaven Descends to Dwell, Amelia and Memories. Additionally, the poem, Search was added upon from the version found in Volume One. We hope that you enjoy Volume Two as much as readers indicated they enjoyed Volume One. This poetry is dedicated to Owen, Ryder, Matthew and Trace with great love and pride.

Laws of UX Jon Yablonski, 2020-04-21 An understanding of psychology—specifically the psychology behind how users behave and interact with digital interfaces—is perhaps the single most valuable nondesign skill a designer can have. The most elegant design can fail if it forces users to conform to the design rather than working within the blueprint of how humans perceive and process the world around them. This practical guide explains how you can apply key principles in psychology to build products and experiences that are more intuitive and human-centered. Author Jon Yablonski deconstructs familiar apps and experiences to provide clear examples of how UX designers can build experiences that adapt to how users perceive and process digital interfaces. You'll learn: How aesthetically pleasing design creates positive responses The principles from psychology most useful for designers How these psychology principles relate to UX heuristics Predictive models including Fitts's law, Jakob's law, and Hick's law Ethical implications of using psychology in design A framework for applying these principles

Dark Art Tim Waggoner, 2014-08-31 It began with a drawing. High-school student Sarah Pennington is in art class one day when her desk mate, Ben Phelps, shows her a drawing he's done of a sinister knife-wielding figure he calls Shrike. Then came the dreams. Sarah begins having strange dreams of Shrike in which he commits disturbing acts of vandalism. When she awakens, she discovers her dreams have come true. The destruction is real - and so is Shrike. Now Shrike's alive. As Shrike grows stronger, his actions become increasingly violent, escalating to stalking, terrorizing, and ultimately, murder. And he must be stopped. Sarah must help Ben stop the monster he created. But how can they fight a being that was born from anger and shaped by imagination? A creature that lives halfway between dream and reality? They have to find a way - before it's too late for them both. They say art imitates life. Sometimes, it imitates death. A new force to reckon with. -- The Horror Channel
