Parametric Design for Landscape Architects Andrew Madl,2021-09-05 Parametric Design for Landscape Architects provides a sequence of tutorial-based workflows for the creation and utilization of algorithmic tools calibrated toward the field of landscape architecture. Contemporary practice and projective theory in landscape architecture require the processing and design of data associated with complex systems to adequately represent composite, emergent scenarios. Aligning to both traditional and nascent processes of analysis and digital modeling, this book unpacks and decodes the characterization of algorithmic-based automation, leveraging software that is widely accessible in both academia and professional practice. Curated throughout are workflows that apply to a multiplex of computation programs that widely support the design, analysis, and production of landscapes, primarily concentrated on digital modeling tools Grasshopper and Rhinoceros. It is a much-needed, visually accessible resource to aid in more efficient understanding and creation of tools that automate and re-examine traditional calculations, analyses, drawing standards, form-finding strategies, fabrication preparations, and speculative assessments/simulation. This primer provides professionals and students with multifaceted skill-sets that, when applied in practice, expand and expedite conventional and speculative design workflows applicable to spatial design, and more specifically landscape architecture. The book includes over 200 full-colour drawings, images, and tables to illustrate and support examples throughout.

Entry Points Carin Kuoni,Chelsea Haines,2016-01-22 Providing a lively snapshot of the state of art and social justice today on a global level, Entry Points accompanies the inaugural Vera List Center Prize for Art and Politics, launched at The New School on the occasion of the center's twentieth anniversary. This book captures some of the most significant worldwide examples of art and social justice and introduces an interested audience of artists, policy makers, scholars, and writers to new ways of thinking about how justice is defined, advanced, and practiced through the arts. In so doing, it assembles some of the latest scholarship in this field while refining our vocabulary for speaking about social justice, social engagement, community enhancement, empowerment, and even art itself. The book's first half contains three essays by Thomas Keenan, João Ribas, and Sharon Sliwinski that map the field of art and social justice. These essays are accompanied by more than twenty profiles of recent artist projects that consist of brief essays and artist pages. This curated and carefully considered map of artists and projects identifies key moments in art and social justice. The book's second half consists of an in-depth analysis of Theaster Gates's The Dorchester Projects, which won the inaugural Vera List Prize for Art and Politics. Produced to complement the project's exhibition at the Sheila C. Johnson Design Center, Parsons School of Design in September 2013, this analysis illuminates Gates's rich, complex, and exemplary work. This section includes an interview between Gates and Vera List Center director Carin Kuoni; essays by Horace D. Ballard Jr., Romi N. Crawford, Shannon Jackson, and Mabel O. Wilson; and a number of responses to The Dorchester Projects by faculty in departments across The New School. Published by Duke University Press and the Vera List Center for Art and Politics at The New School
