*Irresistible Apps* Chris Lewis,2014-03-18 When you create an app, a website, or a game, how do you attract users, and perhaps more importantly, how do you keep them? *Irresistible Apps* explains exactly how to do this using a library of 27 motivational design patterns and real-world examples of how they work. As a developer, you need to retain users in the new economy of advertisements, subscriptions, and in-app purchases, but how do you do this? How do some applications keep users coming back? Why do people spend hours and hours playing World of Warcraft? Why do people care about Reddit karma? What makes customers keep buying from Amazon? Why do so many people love Khan Academy? The answers are found in Gameful, Social, Interface, and Information patterns. Not only will you learn about these patterns, you'll also learn why they work using psychological theories of intrinsic motivation, behavioral psychology, and behavioral economics. Good and bad implementations of the patterns are shown so practitioners can use them effectively and avoid pitfalls along the way.

**Climate Change, Human Impact and Green Energy Transformation** Jan Kiciński,Patryk Chaja,2021-07-23 This book indicates the most optimal solutions for the growing civilization problem related to climate change that takes place more and more rapidly on our planet. It is divided into two parts: In the first part, the authors - based on the available analyses and reports on climate change taking place on Earth - present their own point of view in relation to the above issue, while trying to find answers to the following questions: · Why is it so difficult to admit that humans are responsible for the ongoing climate change? · Will climate change destroy life on Earth? · Can science and modern technologies stop this process? In the second part of the book, the authors propose a solution for the advancing climate change, regarding the reduction of CO2 emissions coming mainly from the energy sector. On the basis of scientific achievements and implementations of research institutions in Poland, especially the Institute of Fluid-Flow Machinery of the Polish Academy of Sciences in Gdansk, the book proposes directions of development of the energy transformation in Poland and other countries for which fossil fuels currently make a large contribution to the energy production process and are the main emitter of CO2 to the atmosphere. The book is addressed to citizens, ecologists, climatologists as well as politicians and experts responsible for shaping the climate and energy policy of the country level and also the world.

**Mastering Primary Geography** Anthony Barlow,Sarah Whitehouse,2019-06-27 Mastering Primary Geography introduces the primary geography curriculum and helps trainees and teachers learn how to plan and teach inspiring lessons that make learning geography irresistible. Topics covered include: · Current developments in geography · Geography as an irresistible activity · Geography as a practical activity · Skills to develop in geography · Promoting curiosity · Assessing children in geography · Practical issues This guide includes examples of children's work, case studies, readings to reflect upon and reflective questions that all help to show students and teachers what is considered to be best and most innovative practice, and how they can use that knowledge in their own teaching to the greatest effect. The book draws on the experience of two leading professionals in primary geography, Anthony Barlow and Sarah Whitehouse, to provide the essential guide to teaching geography for all trainee and qualified primary teachers.

**Technology in Physical Activity and Health Promotion** Zan Gao,2017-05-08 As technology becomes an ever more prevalent part of everyday life and population-based physical activity programmes seek new ways to increase lifelong engagement with physical activity, so the two have become increasingly linked. This book offers a thorough, critical examination of emerging technologies in physical activity and health, considering technological interventions within the dominant theoretical frameworks, exploring the challenges of integrating technology into physical activity promotion and offering solutions for its implementation. Technology in Physical Activity and Health Promotion occupies a broadly positive stance toward interactive technology initiatives and, while discussing some negative implications of an increased use of technology, offers practical recommendations for promoting physical activity through a range of media, including: social media mobile apps global positioning and geographic information systems wearables active videogames (exergaming) virtual reality settings. Offering a logical and clear critique of technology in physical activity and health promotion, this book will serve as an essential reference for upper-level undergraduates, postgraduate students and scholars working in public health, physical activity and health and kinesiology, and healthcare professionals.

Acoustic-Based Applications for Vertebrate Vocalization Ramashini Murugaiya,Manisha Milani Mahagammulle Gamage,Krishani Murugiah,Madhumathy Perumal,2021-11-30 Acoustic-Based Applications for Vertebrate Vocalization is designed to help researchers improve their findings and knowledge of vertebrate vocalization by focusing on the integration of acoustic features with new technologies, such as the Internet of Things (IoT), cloud computing, and virtual and cognitive reality. The book addresses the most common challenges in vertebrate vocalization-based research via suitable audio signal processing techniques, data collection, data pre-processing, acoustic feature engineering, extraction, and selection for multidisciplinary applications, i.e. feature classification, vertebrate communication, behavioral analysis, and signal pattern analysis. The book is an important reference for scholars, researchers, industry practitioners, teachers, and students across a number of disciplines, including bioengineering, audio engineering, systems engineering, biotechnology, signal processing, biology, zoology, and animal sciences.

**Brazilian Mobilities** Maria Alice De Faria Nogueira,Camila Maria dos Santos Moraes,2020-02-17 *Brazilian Mobilities* presents an overview of the diversity of mobility studies developed in Brazil. It builds a picture of a strong Latin-American perspective emerging in the field of mobilities research, which provides unique insight into the complex dynamics of mobilities in the emerging countries from the Global South. Addressing such different areas as tourism, urbanization, media studies, social inequalities, marketing and mega-events, transport and technology, among others, the contributors use the new mobilities paradigm, or NMP (Sheller & Urry, 2006) as a starting point to reflect about the social changes experienced in the country and they also engage with newer literature on mobilities, including work done by Brazilian and Latin-American authors depending on the subject of each individual chapter. Illustrating to scholars the uniqueness and complexity of the Brazilian social-political and economic context, the book was organized in order to be a representative sample of the studies carried out in Brazil, as well as to contribute to other academic investigations on (im)mobilities and different social realities in emerging countries.

Privacy Concerns Surrounding Personal Information Sharing on Health and Fitness Mobile Apps Sen, Devjani,Ahmed, Rukhsana,2020-08-07 Health and fitness apps collect various personal information including name, email address, age, height, weight, and in some cases, detailed health information. When using these apps, many users trustfully log everything from diet to sleep patterns. However, by sharing such personal information, end-users may make themselves targets to misuse of this information by unknown third parties, such as insurance companies. Despite the important role of informed consent in the creation of health and fitness applications, the intersection of ethics and information sharing is understudied and is an often-ignored topic during the creation of mobile applications. Privacy Concerns Surrounding Personal Information Sharing on Health and Fitness Mobile Apps is a key reference source that provides research on the dangers of sharing personal information on health and wellness apps, as well as how such information can be used by employers, insurance companies, advertisers, and other third parties. While highlighting topics such as data ethics, privacy management, and information sharing, this publication explores the intersection of ethics and privacy using various quantitative, qualitative, and critical analytic approaches. It is ideally designed for policymakers, software developers, mobile app designers, legal specialists, privacy analysts, data scientists, researchers, academicians, and upper-level students.
