Dugong ,2002 The dugong (Dugong dugon) is the only herbivorous mammal that is strictly marine. It has a range spanning some 37 countries, including tropical and subtropical coastal and island waters. This plan presents a global overview of the status of the dugong and its management throughout its range. It contains information on dugong distribution and abundance, threatening processes, legislation, and existing and suggested research and management initiatives for the countries and territories in the dugong's known range. It is hoped that the comparative information provided will enable individual countries to develop their own, more detailed, conservation plans.

Understanding the Universe Manjunath.R,2020-03-17 A Scientific Introduction to Subatomic particles, Alien Intelligence, and Human Space Exploration (For the Cosmically Curious): There are many fundamental questions about the universe that have intrigued scientists, philosophers, and ordinary people for centuries. Here are a few of them: What is the universe made of? This is one of the most basic questions about the universe. Scientists have identified a number of different types of matter and energy, including atoms, subatomic particles, dark matter, and dark energy, but there is still much we don't know. How did the universe begin? The origin of the universe is a subject of intense study and debate. The prevailing theory is the Big Bang, which suggests that the universe began as a singularity and has been expanding ever since. What is the ultimate fate of the universe? Will it keep on expanding indefinitely or will it ultimately come to an end? Some theories suggest that the universe may end in a big rip or a big crunch, while others suggest that it will continue to expand indefinitely. What is the nature of space and time? These are fundamental concepts that are still not fully understood. Some theories suggest that space and time are intertwined and that they can be distorted by the presence of matter and energy. Are there other universes beyond our own? Some theories suggest that our universe may be just one of many in a multiverse. Although this theory is yet hypothetical, it is a fascinating concept that could have significant ramifications for our comprehension of the cosmos. These are just a few of the many fundamental questions about the universe that scientists and philosophers continue to explore. *Understanding the Universe: Quarks, Leptons and the Big Bang* is a comprehensive exploration of the fundamental principles that govern the universe we live in. From the tiniest particles to the grandest structures in the cosmos, this book takes readers on a journey of discovery through the mysteries of modern physics and cosmology. Starting with an introduction to the basic building blocks of matter, the book delves into the strange world of quarks and leptons, exploring their properties and interactions. It then examines the forces that govern the behavior of matter, including the strong and weak nuclear forces, electromagnetism, and gravity. The book also covers the history of the universe, from its origins in the Big Bang to the present day, and discusses the evolution of stars and galaxies. Readers will gain a deep understanding of the structure of the universe, its expansion, and the mysterious dark matter and dark energy that make up the vast majority of its mass. Filled with engaging examples, clear explanations, and fascinating insights, *Understanding the Universe: Quarks, Leptons and the Big Bang* is a must-read for anyone interested in the inner workings of the cosmos. Whether you're a student of physics, a science enthusiast, or simply curious about the universe, this book will provide you with a solid foundation for understanding the world around us.

Japanese Ghost Stories Lafcadio Hearn,2019-09-24 Brilliantly entertaining and eerie ghost stories, regarded as major classics in Japan, by the Irish writer and Japanophile Lafcadio Hearn—whose life inspired bestselling writer Monique Truong's novel *The Sweetest Fruits* A Penguin Classic In this collection of classic ghost stories from Japan, beautiful princesses turn out to be frogs, paintings come alive, deadly spectral brides haunt the living, and a samurai delivers the baby of a Shinto goddess with mystical help. Here are all the phantoms and ghouls of Japanese folklore: rokuro-kubi, whose heads separate from their bodies at night; jikininki, or flesh-eating goblins; and terrifying faceless mujina who haunt lonely neighborhoods. Lafcadio Hearn, a master storyteller, drew on traditional Japanese folklore, infused with memories of his own haunted childhood in Ireland, to create the chilling tales in *Japanese Ghost Stories*. They are today regarded in Japan as classics in their own right.

Media, Culture, and Politics in Indonesia Krishna Sen,David T. Hill,2007 *Media, Culture, and Politics in Indonesia* is about the institutions and policies that determine what Indonesians write, read, watch, and hear. It covers the print media, broadcast radio and television, computers and the internet, videos, films and music. This book argues that the texts of the media can be understood in two broad ways: 1. as records of a national culture and political hegemony constructed by Suharto's New Order and 2. as contradictory, dissident, political and cultural aspirations that reflect the anxieties and preoccupations of Indonesian citizens. *Media, Culture, and Politics*, now brought back to life as a member of Equinox Publishing's Classic Indonesia series, explains what has escaped state control, not only by self-conscious resistance, but also because of the ownership patterns, technologies, and modes of consumption of media texts and institutions. The role of the media in the downfall of Suharto is examined and the legacy of his New Order is analyzed. This dynamic and innovative text is suitable for all students of Indonesian languages and culture, Asian studies, Southeast Asian studies, cultural studies, media studies, and contemporary politics. Krishna Sen is Professor of Asian Media and Dean of

the Humanities Research Centre at Curtin University of Technology, Perth, Western Australia David T. Hill is Professor of Southeast Asian Studies and Fellow of the Asia Research Centre, Murdoch University, Perth, Western Australia

Art, the Sublime, and Movement Amanda du Preez,2022-01-31 This book is a critical interdisciplinary approach to the study of contemporary visual culture and image studies, exploring ideas about space and place and ultimately contributing to the debates about being human in the digital age. The upward and downward pull seem in a constant contest for humanity's attention. Both forces are powerful in the effects and affects they invoke. When tracing this iconological history, Amanda du Preez starts in the early nineteenth century, moving into the twentieth century and then spanning the whole century up to contemporary twenty-first century screen culture and space travels. Du Preez parses the intersecting pathways between Heaven and Earth, up and down, flying and falling through the concept of being "spaced out". The idea of being "spaced out" is applied as a metaphor to trace the visual history of sublime encounters that displace Earth, gravity, locality, belonging, home, real life, and embodiment. The book will be of interest to scholars working in art history, visual culture, media and cultural studies, phenomenology, digital culture, mobility studies, and urban studies.
