**Public Collectors** Marc Fischer,2014 Established in 2007 by Marc Fischer, and featured in the 2014 Whitney Biennial, Public Collectors encourages collectors of material culture--the kind that most museums won't exhibit--to 'open' their collections to the public. Extending the popular website of the same name, this book presents a wide array of collections--some featured on the website, most newly assembled for publication--interspersed with commentary and essays exploring the problems and politics of collecting materials that may lack conventional monetary or cultural value.

*Radio Fields* Lucas Bessire,2012-11-19 Radio is the most widespread electronic medium in the world today. As a form of technology that is both durable and relatively cheap, radio remains central to the everyday lives of billions of people around the globe. It is used as a call for prayer in Argentina and Appalachia, to organize political protest in Mexico and Libya, and for wartime communication in Iraq and Afghanistan. In urban centers it is played constantly in shopping malls, waiting rooms, and classrooms. Yet despite its omnipresence, it remains the media form least studied by anthropologists. Radio Fields employs ethnographic methods to reveal the diverse domains in which radio is imagined, deployed, and understood. Drawing on research from six continents, the volume demonstrates how the particular capacities and practices of radio provide singular insight into diverse social worlds, ranging from aboriginal Australia to urban Zambia. Together, the contributors address how radio creates distinct possibilities for rethinking such fundamental concepts as culture, communication, community, and collective agency.

*Radio Crime Fighters* Jim Cox,2015-06-14 In the early days of radio, producers, directors and scriptwriters were well aware of the listening public's fascination with subject matter tinged with wrongdoing. Stories of right and wrong, crime and punishment, and law and order kept audiences of every age hooked for more than thirty years. This work covers 300+ syndicated radio mystery and adventure serials that aired in the early or middle twentieth century. To be included, a series must have had one or more regularly appearing characters who fought against espionage, theft, murder and other crimes. Each entry includes series name, air dates, sponsor, extant episodes, cast information and synopsis.

*Reality Radio* John Biewen,Alexa Dilworth,2010-03-15 Over the last few decades, the radio documentary has developed into a strikingly vibrant form of creative expression. Millions of listeners hear arresting, intimate storytelling from an ever-widening array of producers on programs including This American Life, StoryCorps, and Radio Lab; online through such sites as Transom, the Public Radio Exchange, Hearing Voices, and Soundprint; and through a growing collection of podcasts. Reality Radio celebrates today's best audio documentary work by bringing together some of the most influential and innovative practitioners from the United States, Canada, the United Kingdom, and Australia. In these nineteen essays, documentary artists tell--and demonstrate, through stories and transcripts--how they make radio the way they do, and why. Whether the contributors to the volume call themselves journalists, storytellers, even audio artists--and although their essays are just as diverse in content and approach--all use sound to tell true stories, artfully. **The Ultimate Scanner** Bill Cheek,1995 What's the Ultimate Scanner? A radio receiver with wires, dials, knobs, switches and meters that were never on the manufacturer's plans? A discipline that leads into the next generation of scanning? A way to have it all: to cover all the bands, all the channels and miss nothing but what you choose to exclude? A system that gives you total control over everything that comes out of your speaker? It's this book, which describes the emergence of the scanning hobby into the information and computing era, where automation adds fun, channels and functionality to radio monitoring.

**The Radio Right** Paul Matzko,2020 By the early 1960s, and for the first time in history, most Americans across the nation could tune their radio to a station that aired conservative programming from dawn to dusk. People listened to these shows in remarkable numbers; for example, the broadcaster with the largest listening audience, Carl McIntire, had a weekly audience of twenty million, or one in nine American households. For sake of comparison, that is a higher percentage of the country than would listen to conservative talk radio host Rush Limbaugh forty years later. As this Radio Right phenomenon grew, President John F. Kennedy responded with the most successful government censorship campaign of the last half century. Taking the advice of union leader Walter Reuther, the Kennedy administration used the Internal Revenue Service and the Federal Communications Commission to pressure stations into dropping conservative programs. This book reveals the growing power of the Radio Right through the eyes of its opponents using confidential reports, internal correspondence, and Oval Office tape recordings. With the help of other liberal organizations, including the Democratic National Committee and the National Council of Churches, the censorship campaign muted the Radio Right. But by the late 1970s, technological innovations and regulatory changes fueled a resurgence in conservative broadcasting. A new generation of conservative broadcasters, from Pat Robertson to Ronald Reagan, harnessed the power of conservative mass media and transformed the political landscape of America--

**Radio in the Movies** Laurence Etling,,Frank Barnas,Marie Barnas,2023-10-27 This richly detailed examination of two forms of American entertainment focuses on the various ways that radio stations and air personalities have been depicted in motion pictures, from 1926's The Radio Detective to more recent films like 2022's Halloween Ends. Newly updated and revised chapters cover the cinematic portrayals of various aspects of radio, including disc jockeys, sports broadcasts, religious programs and abnormal personalities on the air. Such films as The Big Broadcast (1932), Reveille with Beverly (1943), Mister Rock and Roll (1957), WUSA (1970), Radio Days (1987),

Private Parts (1997), We Are Marshall (2006) and Straight Outta Compton (2015) provide fascinating insights into not only their own times but also the historical eras that some of these films have attempted to recreate.
