Speed Management European Conference of Ministers of Transport, 2006-10-13 Speeding is the number one road safety problem in a large number of OECD/ECMT countries. It is responsible for around one third of the current, unacceptably high levels of road fatalities. Speeding has an impact not only on accidents but also on the ...

Road Rage and Aggressive Driving Leon James, 2009-12-30 This authoritative book presents conclusions of recent studies on road rage, summarizes legislative and police initiatives, and redefines driver education for all drivers.

Cost Benefit Analysis of Traffic Light & Speed Cameras Andrew Hooke, Jim Knox, David Portas, 1996

The Fast and The Furious: Drivers, Speed Cameras and Control in a Risk Society Helen Wells, 2022-03-26 The Fast and The Furious: Drivers, Speed Cameras and Control in a Risk Society presents a sociological and criminological perspective critical to understanding the driver's role at the centre of road safety interventions. Such an approach is, it is argued, as crucial to an understanding of attempts to reduce road crashes, deaths and injuries as approaching such questions from an engineering or educational perspective. The book offers an explanation for the continued debate about one road safety intervention - the speed camera - by situating that debate within contemporary literature about the 'risk society' (Beck, 1992) and more broadly understood experiences of risk faced on a daily basis by drivers. Rather than a focus on risk as something that can be objectively assessed, measured and managed separately from the social context in which it is encountered, it suggests that 'risk' is something that permeates this particular debate from every angle. The book achieves its aims by utilising sociological and criminological perspectives to

investigate issues such as: - the social context in which it is possible for drivers to reject official scientific expertise about crash causation and camera effectiveness - the self-defined 'respectability' of the population being problematised and its juxtaposition with a 'proper' police focus on 'real criminals' - the reconceptualisation of law-breaking as risk-taking rather than inherently 'wrong' behaviour and its consequences for the enforcement of laws based on risk assessment - the experience of being controlled by technology and of receiving what is essentially 'automated justice'. These and other issues are explored and suggested as illuminating of both the real concerns underpinning this debate and potentially instructive for future attempts to control risky behaviour both within and beyond a road safety context.

Impact of Red Light Camera Enforcement on Crash Experience Hugh W. McGee, Kimberly A. Eccles, National Cooperative Highway Research Program, 2003 At head of title: National Cooperative Highway Research Program.

Road Policing and Technology Great Britain: Parliament: House of Commons: Transport Committee, 2006-10-31 In 2005, traffic collisions killed 3,201 people with almost 29,000 seriously injured on British roads. Although the level of road crash fatalities and injuries has fallen over successive decades and Britain has one of the safest road environments in the world, the numbers still remain far too high and many of these casualties might have been avoided if there was a higher level of compliance with traffic law. The Committee's report examines the road casualty problem, focusing on the role of roads policing and the contribution which enforcement can make to casualty reduction. It considers how technology is influencing the policing and enforcement of particular offences, relating to speeding, drink and drug driving, driving whilst using a mobile phone and driving while impaired by fatigue. The report finds that, despite progress made by the Department

for Transport against its 2010 casualty reduction targets, the Home Office has continued to deny traffic law enforcement issues the priority it requires and must explicitly adopt the targets as a key part of its future national policing plans. Investment and research into new technological equipment, such as roadside breath testing equipment and time-distance cameras, and a higher profile and more visible traffic enforcement effort would bring important casualty reductions. However, the efficiencies which technology can bring should not be seen as a opportunity to cut the number of roads police officers, as technology alone cannot carry out the multitude of functions undertaken by roads police officers.

Strong Towns Charles L. Marohn, Jr.,2019-10-01 A new way forward for sustainable quality of life in cities of all sizes Strong Towns: A Bottom-Up Revolution to Build American Prosperity is a book of forward-thinking ideas that breaks with modern wisdom to present a new vision of urban development in the United States. Presenting the foundational ideas of the Strong Towns movement he co-founded, Charles Marohn explains why cities of all sizes continue to struggle to meet their basic needs, and reveals the new paradigm that can solve this longstanding problem. Inside, you'll learn why inducing growth and development has been the conventional response to urban financial struggles—and why it just doesn't work. New development and high-risk investing don't generate enough wealth to support itself, and cities continue to struggle. Read this book to find out how cities

large and small can focus on bottom-up investments to minimize risk and maximize their ability to strengthen the community financially and improve citizens' quality of life. Develop in-depth knowledge of the underlying logic behind the "traditional" search for never-ending urban growth. Learn practical solutions for ameliorating financial struggles through low-risk investment and a grassroots focus. Gain insights and tools that can stop the vicious cycle of budget shortfalls and unexpected downturns. Become a part of the Strong Towns revolution by shifting the focus away from top-down growth toward rebuilding American prosperity. Strong Towns acknowledges that there is a problem with the American approach to growth and shows community leaders a new way forward. The Strong Towns response is a revolution in how we assemble the places we live.

Work Zone Speed Management John W. Shaw, Madhav V. Chitturi, William Bremer, David Alan Noyce, 2015 This synthesis documents information regarding the current state of practice for work zone speed management. The report compiles data, procedures, techniques, and technical issues related to observing and comparing work zone speeds. The speed management measures have been organized into four categories: engineering, operational, enforcement, and public education and outreach. Information included in this study was acquired through a review of the literature, two surveys of state department of transportation representatives in all states, a compilation of state agency public information campaigns, and follow-up interviews with select survey respondents from several U.S. states and one Canadian province.

Arrest-Proof Yourself Dale Carson, Wes Denham, 2013-11-01 Arrest-Proof Yourself will teach you everything you need to know about dirty cops, racial profiling, probable cause, search and

seizure laws, your right to remain silent, and much more. This how-not-to guide will keep you safe and sound all year long. --Zink magazine What do you say if a cop pulls you over and asks to search your car? What if he gets up in your face and uses a racial slur? What if there's a roach in the ashtray? And what if your hot-headed teenage son is at the wheel? If you read this book, you'll know exactly what to do and say. More people than ever are getting arrested—usually for petty offenses against laws that rarely used to be enforced. And because arrest information is so easily available via the Internet, just one little arrest can disqualify you from jobs, financing, and education. This eye-opening book tells you everything you need to know about how cops operate, the little things that can get you in trouble, and how to stay free from the hungry jaws of the criminal justice system. It is now updated with new and important information on the right of the police to search your car; on guns, knives, and self-defense; and on changes in surveillance methods. Dale C. Carson was an FBI field agent, a SWAT sniper, an instructor at the FBI academy, and a Miami police officer who set Florida records for felony arrests. He is currently a criminal defense attorney. Wes Denham is the author of *Arrested*.

Driver Behaviour and Training: Dr. Lisa Dorn, 2017-07-05 Research on driver behaviour over the past two decades has clearly demonstrated that the goals and motivations a driver brings to the driving task are important determinants for driver behaviour. The importance of this work is underlined by statistics: WHO figures show that road accidents are predicted to be the number three cause of death and injury by 2020 (currently more than 20 million deaths and injuries p.a.). The objective of this second edition, and of the conference on which it is based, is to describe and discuss recent advances in the study of driving behaviour and driver training. It bridges the gap between practitioners in road safety, and theoreticians investigating driving behaviour, from a number of

different perspectives and related disciplines. A major focus is to consider how driver training needs to be adapted, to take into account driver characteristics, goals and motivations, in order to raise awareness of how these may contribute to unsafe driving behaviour, and to go on to promote the development of driver training courses that considers all the skills that are essential for road safety. As well as setting out new approaches to driver training methodology based on many years of empirical research on driver behaviour, the contributing road safety researchers and professionals consider the impact of human factors in the design of driver training as well as the traditional skills-based approach. Readership includes road safety researchers from a variety of different academic backgrounds, senior practitioners in the field of driver training from regulatory authorities and professional driver training organizations such as the police service, and private and public sector personnel who are concerned with improving road safety.

The Humane Gardener Nancy Lawson,2017-04-18 In this eloquent plea for compassion and respect for all species, journalist and gardener Nancy Lawson describes why and how to welcome wildlife to our backyards. Through engaging anecdotes and inspired advice, profiles of home gardeners throughout the country, and interviews with scientists and horticulturalists, Lawson applies the broader lessons of ecology to our own outdoor spaces. Detailed chapters address planting for wildlife by choosing native species; providing habitats that shelter baby animals, as well as birds, bees, and butterflies; creating safe zones in the garden; cohabiting with creatures often regarded as pests; letting nature be your garden designer; and encouraging natural processes and evolution in the garden. The Humane Gardener fills a unique niche in describing simple principles for both attracting wildlife and peacefully resolving conflicts with all the creatures that share our

world.

Proactive Policing National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee on Proactive Policing: Effects on Crime, Communities, and Civil Liberties, 2018-03-23 Proactive policing, as a strategic approach used by police agencies to prevent crime, is a relatively new phenomenon in the United States. It developed from a crisis in confidence in policing that began to emerge in the 1960s because of social unrest, rising crime rates, and growing skepticism regarding the effectiveness of standard approaches to policing. In response, beginning in the 1980s and 1990s, innovative police practices and policies that took a more proactive approach began to develop. This report uses the term proactive policing to refer to all policing strategies that have as one of their goals the prevention or reduction of crime and disorder and that are not reactive in terms of focusing primarily on uncovering ongoing crime or on investigating or responding to crimes once they have occurred. Proactive policing is distinguished from the everyday decisions of police officers to be proactive in specific situations and instead refers to a strategic decision by police agencies to use proactive police responses in a programmatic way to reduce crime. Today, proactive policing strategies are used widely in the United States. They are not isolated programs used by a select group of agencies but rather a set of ideas that have spread across the landscape of policing. Proactive Policing reviews the evidence and discusses the data and methodological gaps on: (1) the effects of different forms of proactive policing on crime; (2) whether they are applied in a discriminatory manner; (3) whether they are being used in a legal fashion; and (4) community reaction. This report offers a comprehensive evaluation of proactive policing that includes not only

its crime prevention impacts but also its broader implications for justice and U.S. communities.

The Passenger Has Gone Digital and Mobile Nawal K. Taneja, 2016-02-24 Technology is changing expectations in the airline industry. Passengers want to be in control, and they expect airlines to become solution providers and aggregators of value, to provide them with personalized services. Airline employees expect to be given the tools to do their jobs and to meet passenger expectations. Airline executives expect to make returns that are reasonable and relatively stable through business cycles. All of these expectations can be met by airlines through the effective and efficient leveraging of information and technology, to shift from being operations- and product-centric to becoming customer-centric and dramatically improving the overall passenger travel experience throughout the travel cycle. In this new book by world-renowned airline expert Nawal K. Taneja, the 7th in a series with Ashgate, the author explores and explains the game-changing opportunities presented to the industry by new-generation information and technology. He shows how information and technology can now drive, not just enable, an airline's strategy to become truly customer-centric at a personalized level, while at the same time enabling the operator to reduce costs, enhance revenues, reduce risks and become much more flexible and agile by better managing complexity.
