The Code of Federal Regulations of the United States of America, 2000 The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.

Close Up 1927-1933 James Donald, Anne Friedberg, Laura Marcus, 1998 *Close Up* was the first English-language journal of film theory. Published between 1927 and 1933, it billed itself as the only magazine devoted to film as an art, promising readers theory and analysis: no gossip. The journal was edited by the writer and filmmaker Kenneth Macpherson, the novelist Winifred Bryher, and the poet H. D., and it attracted contributions from such major figures as Dorothy Richardson, Sergei Eisenstein, and Man Ray. This anthology presents some of the liveliest and most important articles from the publication's short but influential history. The writing in *Close Up* was theoretically astute, politically incisive, open to emerging ideas from psychoanalysis, passionately committed to pure cinema, and deeply critical of Hollywood and its European imitators. The articles collected here cover such subjects as women and film, *The Negro in Cinema*, Russian and working-class cinema, and developments in film technology, including the much debated addition of sound. The contributors are a cosmopolitan cast, reflecting the journal's commitment to internationalism; *Close Up* was published from Switzerland, printed in England and France, and distributed in Paris, Berlin, London, New York, and Los Angeles. The editors of this volume present a substantial introduction and commentaries on the articles that set *Close Up* in historical and intellectual context. This is

crucial reading for anyone interested in the origins of film theory and the relationship between cinema and modernism.

Close Up: Cinema And Modernism James Donald, Anne Friedberg, Laura Marcus, 1998-01-01 Between 1927 and 1933, the journal *Close Up* championed a European avant-garde in film-making. This volume republishes articles from the journal, with an introduction and a commentary on the lives of, and complex relationships between, its writers and editors.

Pediatric Nephrology Francesco Emma, Stuart L. Goldstein, Arvind Bagga, Carlton M. Bates, Rukshana Shroff, 2022-09-01 Over the course of the previous seven editions, *Pediatric Nephrology* has become the standard reference text for students, trainees, practicing physicians (pediatricians, nephrologists, internists, and urologists), subspecialists, and allied health professionals seeking information about children's kidney diseases. It is global in perspective, reflecting the fact that the international group of editors are all acknowledged world experts. The latest edition of this text is no different, providing a comprehensive, state-of-the-art overview on pediatric nephrology. Much like the previous edition, the latest edition reviews the most critical aspects of the field. Topics covered include developmental physiology and diseases, renal physiology and diagnostic approaches, glomerular disease, kidney involvement in systemic diseases, renal tubular disorders, homeostasis, cystic kidney disease and related disorders, urinary tract disorders, hypertension, acute kidney injury, and chronic kidney failure. Unlike the previous edition, however, the chapters in this edition now combine physiology, clinical management, and pathology for ease of use.
