The Three-Year Swim Club FREE PREVIEW--The Preamble and First Chapter Julie

Checkoway,2015-09-22 For readers of Unbroken and The Boys in the Boat comes the inspirational, untold story of impoverished children who transformed themselves into world-class swimmers. In 1937, a schoolteacher on the island of Maui challenged a group of poverty-stricken sugar plantation kids to swim upstream against the current of their circumstance. The goal? To become Olympians. They faced seemingly insurmountable obstacles. The children were Japanese-American, were malnourished and barefoot and had no pool; they trained in the filthy irrigation ditches that snaked down from the mountains into the sugarcane fields. Their future was in those same fields, working alongside their parents in virtual slavery, known not by their names but by numbered tags that hung around their necks. Their teacher, Soichi Sakamoto, was an ordinary man whose swimming ability didn't extend much beyond treading water. In spite of everything, including the virulent anti-Japanese sentiment of the late 1930s, in their first year the children outraced Olympic athletes twice their size; in their second year, they were national and international champs, shattering American and world records and making headlines from L.A. to Nazi Germany. In their third year, they'd be declared the greatest swimmers in the world, but they'd also face their greatest obstacle: the dawning of a world war and the cancellation of the Games. Still, on the battlefield, they'd become the 20th century's most celebrated heroes, and in 1948, they'd have one last chance for Olympic glory. They were the Three-Year Swim Club. This is their story.

**Violence in Post-Conflict Societies** Anders Themnér,2011-05-10 This book compares post-civil war societies to look at the presence or absence of organized violence, analysing why some ex-combatants return to organised violence and others do not. Even though former fighters have been identified as a major source of insecurity, there have been few efforts to systematically examine why some ex-combatants re-engage in organized violence, while others do not. This book compares the presence or absence of organized violence in different ex-combatant communities – former fighters that used to belong to the same armed faction and who share a common, horizontal identity based on shared war-and peacetime experiences – in the Republic of Congo (ex-Cobras, Cocoyes and Ninjas) and Sierra Leone (ex-Armed Forces Revolutionary Council, Civil Defense Force and Revolutionary United Front). The main determinants of ex-combatant violence are whether former fighters have access to elites and to second-tier individuals – such as former mid-level commanders – who can act as intermediaries between the two. By utilizing relationships based on selective incentives and social

networks, these two kinds of remobilizers are able to generate the needed enticements and feelings of affinity, trust or fear to convince ex-combatants to resort to arms. These findings demonstrate that the outbreak of ex-combatant violence can only be understood by more clearly incorporating an actor perspective, focusing on three levels of analysis: the elite, midlevel and grass-root. This book will be of much interest to students of peacebuilding, civil wars, post-conflict reconstruction, war and conflict studies, security studies and IR.
